*Commentary on the Letter to the Hebrews* Saint Cyril (Patriarch of Alexandria),2021

Commentaries on Romans, 1-2 Corinthians, and Hebrews Cyril,2022-03-08 But in fact Christ has been raised from the dead . . . Cyril of Alexandria (c. 378–444) was one of the most significant figures in the early church: bishop of the church, defender of orthodoxy, proponent of Alexandrian theology. Indeed, he is probably best known as the supporter of the term Theotokos (God-bearer) with regard to Mary in opposition to Nestorius during the early Christological controversies. But Cyril viewed himself, first and foremost, as an interpreter of Scripture. In this volume in IVP Academic's Ancient Christian Texts series, Joel Elowsky and David Maxwell offer—for the first time in English—a translation of the surviving Greek and Syriac fragments of Cyril's commentaries on four New Testament epistles: Romans, 1–2 Corinthians, and Hebrews. Abounding with Cyril's insights regarding these canonical texts and biblical themes such as the triune nature of God, Christ's sacrificial death, and justification, these commentaries are essential tools for understanding Cyril's reading of Holy Scripture. Ancient Christian Texts is a series of new translations, most of which are here presented in English for the first time. The series provides contemporary readers with the resources they need to study for themselves the key writings of the early church. The texts represented in the series are full-length commentaries or sermon series based on biblical books or extended scriptural passages. Ancient Christian Texts are new English translations of full-length commentaries or sermon series from ancient Christian authors that allow you to study key writings of the early church fathers in a fresh way.

*Armenia* Deirdre Holding,Tom Allen,2018-12-12 This new, thoroughly updated 5th edition of Bradt's Armenia remains the only standalone guide available to this mountainous post-Soviet republic at the crossroads of Europe. Packed with detailed background information and invaluable practical advice, Bradt's Armenia remains the essential choice for anyone travelling to this beautiful country. New for this edition is coverage of the gastronomic revival in Yerevan, increased coverage of local music and nightlife, and expanded sections on protected areas, particularly the National Parks, including overview maps of their trail networks. Also new is information on the Transcaucasian Trail, hitch-hiking as a mode of transport, volunteering opportunities for longer-term travellers, and Yerevan as a popular base for 'digital nomads' and young diaspora Armenians. In addition, there is a wealth of new details for adventure travellers, including guidance on hiking and trekking, camping, mountain biking, cycle touring, rock climbing, off-road driving, and

winter sports including ski touring. New long-distance trails are covered, too. Bradt's Armenia provides all of the information needed for a successful trip and covers all the most popular sights as well as those off-the-beaten track, including Dilijan National Park and the stunning forested mountains of Tavush, a region which is undergoing a renaissance as a place to explore and reconnect with nature; Areni village, one of the birthplaces of wine 6,000 years ago; and Vayots Dzor, the 'valley of woes', whose side valleys are abundant with wildlife-spotting opportunities. Tatev village and proposed National Park are included, as are the Orbelian caravanserai and other remnants of the ancient Silk Road trading route network that once criss-crossed the Caucasus region. Rich in both history and spectacular scenery, Armenia is a truly captivating country. Whether seeking out ancient monasteries dotted within dramatic landscapes, wandering through one of Yerevan's impressive museums or admiring the intricate stone carvings at Noratus, you'll find opportunities to delve into this nation's past at every turn. Add to this the welcoming locals, superb hiking possibilities and abundant bird life, and you'll soon discover why Armenia is worth more than just a fleeting visit.

East-West Artistic Transfer through Rome, Armenia and the Silk Road Christiane Esche-Ramshorn,2021-09-05 This book examines the arts and artistic exchanges at the 'Christian Oriental' fringes of Europe, especially Armenia. It starts with the architecture, history and inhabitants of the lesser

known pilgrim compounds at the Vatican in the Middle Ages and Renaissance, of Hungary, Germany, but namely those of the most ancient of Churches, the Churches of the Christian Orient Ethiopia and Armenia. Without taking an Eurocentric view, this book explores the role of missionaries, merchants, artists (for example Momik, Giotto, Minas, Domenico Veneziano, Duerer), and artefacts (such as fabrics, inscriptions and symbols) travelling into both directions along the western stretch of the Silk Road between Ayas (Cilicia), ancient Armenia and North-western Iran. This area was truly global before globalization, was a site of intense cultural exchanges and East-West cultural transmissions. This book opens a new research window into the culturally mixed landscapes in the Christian Orient, the Middle East and North-eastern Africa by taking into consideration their many indigenous and foreign artistic components and embeds Armenian arts into today's wider art historical discourse. This book will be of interest to scholars in art history, architectural history, missions, trade, Middle Eastern arts and the arts of the Southern Caucasus.

Eastern Christianity in Its Texts Cyril Hovorun, 2022-08-25 Surveying theological literature produced in the Christian East from the first through the 20th century, Eastern Christianity in its Texts explores different theological themes (analytical and mystical), genres (epistles, treatises, and poetry), and milieux (Greek, Armenian, Western and Eastern Syriac, Russian and Romanian). The book illustrates the evolution of the Orthodox thought, how it influenced and was influenced by intellectual, social, and political environments. It demonstrates a theology in context, and yet displays consistency in the traditions spread through different epochs and countries. The book is divided in five parts, each standing for an epoch with distinct features: formation of the Christian identity in the era before Constantine, golden age of theology in the period of Late Antiquity, the pinnacle of erudism and mysticism in the eastern Middle Ages, wrestling with the Modernity imported from the West in the 18th-19th centuries, and finally theological polyphony in the 20th century.

Following recent political changes, the story of this new republic is rapidly being rewritten, with transformations extending far beyond the vibrant capital of Yerevan. *Postmetaphysical Thinking II* Jürgen Habermas, 2017-06-16 'There is no alternative to postmetaphysical thinking': this statement, made by Jürgen Habermas in 1988, has lost none of its relevance. Postmetaphysical thinking is, in the first place, the historical answer to the crisis of metaphysics following Hegel, when the central metaphysical figures of thought began to totter under the pressure exerted by social developments and by developments within science. As a result, philosophy's epistemological privilege was shaken to its core, its basic concepts were de-transcendentalized, and the primacy of theory over practice was opened to question. For good reasons, philosophy 'lost its extraordinary status', but as a result it also courted new problems. In *Postmetaphysical Thinking II*, the sequel to the 1988 volume that bears the same title (English translation, Polity 1992), Habermas addresses some of these problems. The first section of the book deals with the shift in perspective from metaphysical worldviews to the lifeworld, the unarticulated meanings and assumptions that accompany everyday thought and action in the mode of 'background knowledge'. Habermas analyses the lifeworld as a 'space of reasons' – even where language is not (yet) involved, such as, for example, in gestural communication and rituals. In the second section, the uneasy relationship between religion and postmetaphysical thinking takes centre stage. Habermas picks up where he left off in 1988, when he made the far-sighted observation that 'philosophy, even in its postmetaphysical form, will be able neither to replace nor to repress religion', and explores philosophy's new-found interest in religion, among other topics. The final section includes essays on the role of religion in the political context of a post-secular, liberal society. This volume will be of great interest to students and scholars in philosophy, religion and the social sciences and humanities generally.

*The Lure of Technocracy* Jürgen Habermas, 2015-06-04 Over the past 25 years, Jürgen Habermas has presented what is arguably the most coherent and wide-ranging defence of the project of European unification and of parallel developments towards a politically integrated world society. In developing his key concepts of the transnationalisation of democracy and the constitutionalisation of international law, Habermas offers the main players in

the struggles over the fate of the European Union (the politicians, the political parties and the publics of the member states) a way out of the current economic and political crisis, should they choose to follow it. In the title essay Habermas addresses the challenges and threats posed by the current banking and public debt crisis in the Eurozone for European unification. He is harshly critical of the incrementalist, technocratic policies advocated by the German government in particular, which are being imposed at the expense of the populations of the economically weaker, crisis-stricken countries and are undermining solidarity between the member states. He argues that only if the technocratic approach is replaced by a deeper democratization of the European institutions can the European Union fulfil its promise as a model for how rampant market capitalism can once again be brought under political control at the supranational level. This volume reflects the impressive scope of Habermas's recent writings on European themes, including theoretical treatments of the complex legal and political issues at stake, interventions on current affairs, and reflections on the lives and works of major European philosophers and intellectuals. Together the essays provide eloquent testimony to the enduring relevance of the work of one of the most influential and far-sighted public intellectuals in the world today, and are essential reading for all philosophers, legal scholars and social scientists interested in European and global issues.
