### **Rufinus: The Epigrams of Rufinus**

Rufinus, 2004-08-26 Nothing is known of the Greek poet Rufinus other than that he was the author of a collection of thirty-nine epigrams. In fact he is such an insubstantial figure that his date has been placed at various points within nearly half a millennium. Professor Page here presents a text of Rufinus' poems and a concise commentary on them. In his introduction he considers the criteria by which a date may be established and finds evidence in favour of the fourth century AD.

**Best iPad Apps** Peter Meyers, 2010-12-08 What really wows iPad fans is when their touchscreen does what's impossible on other gadgets: the finger-painting app that turns a cross-country flight into a moving art class, the mini music studio (two-dozen instruments strong, each with motion-induced warble effects), and the portable fireworks display that you sculpt by swiping. Problem is, with tens of thousands of apps available for your iPad, who knows what to download? You can try to sort through a gazillion customer reviews with a mix of 5- and 1-star ratings, but that's a head-hurting time-waster. The stakes are getting higher, too: instead of freebies and 99-cent trinkets, the price of iPad apps is steadily creeping up and beyond their iPhone predecessors. Best iPad Apps guides you to the hidden treasures in the App Store's crowded aisles. Author Peter Meyers stress-tested thousands of options to put together this irresistible, page-turner of a catalog. Inside these pages, you'll find apps as magical as the iPad itself. Flip through the book for app suggestions, or head directly to one of several categories we've loaded up with best of selections to help you: Get work done Manipulate photos Make movies Create comics Browse the Web better Take

notes Outline ideas Track your health Explore the world No matter how you use your iPad, Best iPad Apps will help you find the real gems among the rubble -- so you make the most of your glossy gadget.

*Facsimile of Pepys's Catalogue* David

McKitterick, 1991 The arrangement of Samuel Pepys's library was a matter of great concern to him, from the commissioning of the special glazed book presses in which it is still housed to the positioning of volumes by size, with blocks cut to make the volumes level. In the early 1690s he arranged for a catalogue to be compiled. This consists of the usual listing in order of shelf-mark to be found in earlier library catalogues, but in addition there is one of the first attempts at a comprehensive subject-index, an 'Alphabet' of the books, their authors and topics. This is of the greatest interest to historians of libraries and of intellectual attitudes in the late seventeenth century; it can be seen as an extension of the ideas for classification in the sciences discussed at the Royal Society (of which Pepys was President). Furthermore, additions and

emendations made up to Pepys's death in 1703 shed light on Pepys's collecting practices and on a major reshelving of the library carried out in that period.

With this startling new perception, you'll see that your world is not a confusing array of sights, sounds, and events and, instead, grasp that it's a simple and logical collection of systems, systems that can be quickly adjusted to deliver the life results you've always wanted.
