Rim Jallouli, Mohamed Anis Bach Tobji, Deny Bélisle, Sehl Mellouli, Farid Abdallah, Ibrahim Osman

Digital Capital Massimo Ragnedda, Maria Laura Ruiu, 2020-01-29 This work represents the first attempt to position digital capital as cumulative and transferable, independent from, and intertwined with the other five forms of capitals. The book aims to propose a theoretical toolkit and empirical model that can be used by policy makers to tackle social inequalities created by the digital exclusion of citizens.

Digital Economy. Emerging Technologies and Business Innovation Mohamed Anis Bach Tobji, Rim Jallouli, Ahmed Samet, Mourad Touzani, Vasile Alecsandru Strat, Paul Pocatilu, 2020-12-02 This book constitutes the refereed proceedings of the 5th International Conference, ICDEc 2020, held in Bucharest, Romania, in June 2020. Due to the COVID-19 pandemic the conference took place virtually. The 13 full papers presented in this volume together with 3 abstracts of keynotes and 1 introductory paper by the steering committee were carefully reviewed and selected from a total of 41 submissions. The core theme of this year's conference was "Emerging Technologies & Business Innovation". The papers were organized in four topical sections named: digital transformation, data analytics, digital marketing, and digital business models.

Hidden and Devalued Feminized Labour in the Digital Humanities Julianne Nyhan, 2022-12-22 Hidden and Devalued Feminized Labour in the Digital Humanities examines the data-driven labour that underpinned the Index Thomisticus—a preeminent project of the incunabular digital humanities—and advanced the data-foundations of computing in the Humanities. Through oral history and archival research, Nyhan reveals a hidden history of the entanglements of gender in the intellectual and technical work of the early digital humanities. Setting feminized keypunching in its historical contexts—from the history of concordance making, to the feminization of the office and

humanities computing—this book delivers new insight into the categories of work deemed meritorious of acknowledgement and attribution and, thus, how knowledge and expertise was defined in and by this field. Focalizing the overlooked yet significant data-driven labour of lesser-known individuals, this book challenges exclusionary readings of the history of computing in the Humanities. Contributing to ongoing conversations about the need for alternative genealogies of computing, this book is also relevant to current debates about diversity and representation in the Academy and the wider computing sector. *Hidden and Devalued Feminized Labour in the Digital Humanities* will be of interest to researchers and students studying digital humanities, library and information science, the history of computing, oral history, the history of the humanities, and the sociology of knowledge and science.

Handbook of Research on Engaging Digital Natives in Higher Education Settings

Pinheiro, Margarida M., 2016-03-29 The integration of technology has become so deeply rooted into modern society that the upcoming generation of students has never known a world without such innovations. This defining trait calls for an examination of effective methods in which to support and motivate these learners. The *Handbook of Research on Engaging Digital Natives in Higher Education Settings* focuses on the importance of educational institutions implementing technology into the learning and teaching process in order to prepare for students born into a digital world. Highlighting relevant issues on teaching strategies and virtual education, this book is a pivotal reference source for academicians, upper-level students, practitioners, and researchers actively involved in higher education.

Aligning Technology with Business for Digital Transformation Ashish Pachory, 2019-11-27

This book focuses on developing alignment as the foundation for a successful digital enterprise. Over

the last decade, digital technology has made deep inroads into every walk of life, but perhaps nowhere more than in the world of business. Technology now plays an enhanced role in driving business success, creating an entirely new paradigm in which business and technology are inseparable. Enterprises must ride the digital wave without losing their grip on the business basics to stay afloat. In this environment, business outcome is heavily dependent on the close alignment between business and technology. *Aligning Technology with Business for Digital Transformation* is a guide to discovering the power of business-technology alignment. Gleaned from decades of experience with global corporations that have shaped the current business-technology landscape, it covers an indispensable organizational requirement in a simple and relatable way. The book focuses on developing alignment as the foundation for a successful digital enterprise. Interlaced with real-life examples and anecdotes, it should help not only organizations in unlocking their true potential but also individuals in building the skills and aptitude necessary for succeeding in the digital world.

Digital Transformation Management for Agile Organizations Stefano Bresciani, Alberto Ferraris, Marco Romano, Gabriele Santoro, 2021-06-10 *Digital Transformation Management for Agile Organizations* highlights and explores new dynamics regarding how current digital developments globally scale, by examining the threats, as well as the opportunities these innovations offer to organizations of all kinds.

Routledge International Handbook of Research Methods in Digital Humanities Kristen Schuster, Stuart Dunn, 2020-08-23 This book draws on both traditional and emerging fields of study to consider what a grounded definition of quantitative and qualitative research in the Digital Humanities (DH) might mean; which areas DH can fruitfully draw on in order to foster and develop that understanding; where we can see those methods applied; and what the future directions of research methods in Digital Humanities might look like. Schuster and Dunn map a wide-ranging DH research methodology by drawing on both 'traditional' fields of DH study such as text, historical sources, museums and manuscripts, and innovative areas in research production, such as knowledge and technology, digital culture and society and history of network technologies. Featuring global contributions from scholars in the United Kingdom, the United States, Europe and Australia, this book draws together a range of disciplinary perspectives to explore the exciting developments offered by this fast-evolving field. *Routledge International Handbook of Research Methods in Digital Humanities* is essential reading for anyone who teaches, researches or studies Digital Humanities or related subjects.

Digital Transformation Game Plan Gary O'Brien, Guo Xiao, Mike Mason, 2019-10-30 The Digital Age is having a broad and profound impact on companies and entire industries. Rather than

simply automate or embed digital technology into existing offerings, your business needs to rethink everything. In this practical book, three ThoughtWorks professionals provide a game plan to help your business through this transformation, along with technical concepts that you need to know to be an effective leader in a modern digital business. Chock-full of practical advice and case studies that show how businesses have transitioned, this book reveals lessons learned in guiding companies through digital transformation. While there's no silver bullet available, you'll discover effective ways to create lasting change at your organization. With this book, you'll discover how to: Realign the business and operating architecture to focus on customer value Build a more responsive and agile organization to deal with speed and ambiguity Build next generation technology capability as a core differentiator

Industrial Engineering in the Digital Disruption Era Fethi Calisir,Orhan Korhan,2020-03-16 This book gathers extended versions of the best papers presented at the Global Joint Conference on Industrial Engineering and Its Application Areas (GJCIE), held on September 2-3, 2019, in Gazimagusa, North Cyprus, Turkey. It covers a wide range of topics, including decision analysis, supply chain management, systems modelling and quality control. Further, special emphasis is placed on the state of the art and the challenges of digital disruption, as well as effective strategies that can be used to change organizational structures and eliminate the barriers that are keeping industries from taking full advantage of today's digital technologies.

Empowering India Through Digital Literacy (Vol. 2) Dr. S. Kalaivani & Dr. K. Saileela,

The Digital Challenge for Libraries Ralph Blanchard, 2005 Public and university libraries are

at a crossroads, hard-pressed by competition from Internet search engines, declining budgets and changes in popular culture. Libraries must respond aggressively. Otherwise they will be marginalized by the impact of digital technology on their traditional customer base. Author Ralph Blanchard, drawing on twenty years of experience as an information services entrepreneur, argues that it is irresponsible for librarians to simply turn academic tasks over to search engines, as many do. Instead, libraries should expand digital services and, using the tactics and strategies of successful for-profit information service businesses, reconnect with their customers by promoting themselves as 21st Century information experts. Topics in this wide-ranging study include: The library as a service business Change, risk and unintended consequences The Internet search engine business model Problems with students using search engines The evolution of ambient information Music and information technology Millennials as library customers Hiring and training library information workers Push and viral marketing strategies for libraries The Digital Challenge for Libraries calls for new initiatives by librarians and for a rekindling of interest in the vital role libraries play in an informed, prosperous and democratic society.

Data, Disruption & Digital Leadership Philipp Futterknecht, Tobias Hertfelder, 2023-07-28
Since the theory of relativity we know that massive objects attract things by their gravitation. The greater the mass, the greater the force of attraction. It is the same in strategy projects. Each project participant is a massive participant and has an impact on the interaction. What has changed dramatically is the influence of data on this process. Those who do not take this into account will suffer enormous losses in the future. As this change creates a new equilibrium, the chances of success of the methods and behaviors used also change. In this book, you will learn how to master this change and what you need to do so.

Digital Storytelling and Digital Gaming in the 21st Century EFL Classroom Annalisa Raffone, 2023-03-28 This book is for language researchers, teachers, and practitioners who wish to embark on an educational journey to explore and deepen the understanding and potential of the digital medium. It is the first comprehensive text on Digital Storytelling (DST) as an instructional approach in the EFL university classroom and Digital Game-based Learning (DGBL) in the EFL school setting based on original, ex-Novo gamified experiences. Through specific teaching choices and the creation of context-based multimedia tools and workshops, the book offers a resource - empowered by a detailed description, personalisation, and application of methods - through which teachers and educators can embed these two educational approaches into the curriculum. It also

provides productive and promising results on students' language improvement and enhancement of the so-called 21st Century Skills as required by today's European Regulations for Lifelong Learning.

Jeffersonian Economic Architecture in the Digital Age Robert S. Ellinger Ph.D., 2021-03-08
Jeffersonian Economic Architecture in the Digital Age By: Robert S. Ellinger Ph.D. Jeffersonian Economic Architecture in the Digital Age is a book focused on how to synergically adapt to the catastrophic change in culture that humanity is currently undergoing. This is due to seismic change in technology at the dawn of the Digital Age. The author Robert S. Ellinger Ph.D. has created an architectural model using concepts from a variety of academic disciplines including spatial economics, history, systems engineering, information technology, enterprise architecture, and political science. He uses this model to demonstrate how humanity adapted to technology change in the past. He then transforms this model for the future Digital Age. And he does this while keeping Jefferson's and other founding father's concept of equal opportunity for all as envisioned in the US Declaration of Independence and Preamble of the US Constitution.
