Pliny the Elder on Science and Technology John F. Healy, 1999 The Elder Pliny's Natural History provides a wide-ranging account of human achievement in the arts and sciences in the first century AD. This book re-examines Pliny's work for the first time since the 1920s. Modern experiments, simulating the techniques described by Pliny, and an in-depth study of his development of a technical language, confirm his unique contribution to our knowledge of science in early imperial Rome.

The Oxford Handbook of the Archaeology of the Levant Margreet L. Steiner, Ann E. Killebrew, 2014-01-16 This Handbook aims to serve as a research guide to the archaeology of the Levant, an area situated at the crossroads of the ancient world that linked the eastern Mediterranean, Anatolia, Mesopotamia, and Egypt. The Levant as used here is a historical geographical term referring to a large area which today comprises the modern states of Israel, Jordan, Lebanon, western Syria, and Cyprus, as well as the West Bank, Gaza Strip, and the Sinai Peninsula. Unique in its treatment of the entire region, it offers a comprehensive overview and analysis of the current state of the archaeology of the Levant within its larger cultural, historical, and socio-economic contexts. The Handbook also attempts to bridge the modern scholarly and political divide between archaeologists working in this highly contested region. Written by leading international scholars in the field, it focuses chronologically on the Neolithic through Persian periods - a time span during which the Levant was often in close contact with the imperial powers of Egypt, Anatolia, Assyria, Babylon, and Persia. This volume will serve as an invaluable reference work for those interested in a contextualised archaeological account of this region, beginning with the 'agricultural revolution' until the conquest of Alexander the Great that marked the end of the Persian period.

Level 26 Anthony E. Zuiker, Duane Swierczynski, 2009-09-08 Law enforcement personnel categorize murderers on a scale of twenty-five levels of evil—from the naïve opportunists starting out at Level 1 to the organized, premeditated torture murderers who inhabit Level 25. But to an elite unnamed investigations group assigned to hunt down the world's most dangerous killers, headed by Steve Dark, a new category of killer is being defined....

The Lost Constellations John C. Barentine, 2015-10-23 Casual stargazers are familiar with many classical figures and asterisms composed of bright stars (e.g., Orion and the Plough), but this book reveals not just the constellations of today but those of yesteryear. The history of the human identification of constellations among the stars is explored through the stories of some influential celestial cartographers whose works determined whether new inventions survived. The history of how the modern set of 88 constellations was defined by the professional astronomy community is recounted, explaining how the constellations described in the book became permanently "extinct." Dr. Barentine addresses why some figures were tried and discarded, and also directs observers to how those figures can still be picked out on a clear night if one knows where to look. These lost constellations are described in great detail using historical references, enabling observers to rediscover them on their own surveys of the sky. Treatment of the obsolete constellations as extant features of the night sky adds a new dimension to stargazing that merges history with the accessibility and immediacy of the night sky.

Early Greek Alchemy, Patronage and Innovation in Late Antiquity Olivier Dufault, 2019 Early Greek Alchemy, Patronage and Innovation in Late Antiquity provides an example of the innovative power of ancient scholarly patronage by looking at a key moment in the creation of the Greek alchemical tradition. New evidence on scholarly patronage under the Roman empire can be garnered by analyzing the descriptions of learned magoi in several texts from the second to the fourth century CE. Since a common use of the term

magos connoted flatterer-like figures (kolakes), it is likely that the figures of learned sorcerers found in texts such as Lucian's *Philopseudes* and the apocryphal Acts of Peter captured the notion that some client scholars exerted undue influence over patrons. The first known author of alchemical commentaries, Zosimus of Panopolis (c. 300 CE), presented himself neither as a magos nor as an alchemist. In his treatises, he rather appears as a Christian scholar and the client of a rich woman named Theosebeia. In three polemical letters to his patroness, Zosimus attempted to discredit rival specialists of alchemy by describing them as magoi and demon-worshippers and by equating their techniques with Egyptian temple practice. In a subtler attempt to edge out his competitors, Zosimus pointed to their limited education and suggested that true alchemy could only be acquired by a meticulous interpretation of Greek alchemical texts. Extant evidence thus suggests that alchemical texts were first introduced among other Greek scholarly traditions when Zosimus annexed Egyptian temple rituals into the ambit of paideia thanks to the support and venue provided by his patroness.

Incunabula Scientifica Et Medica Arnold C. Klebs,

Astral Magic in Babylonia Erica Reiner, 1995 Erica Reiner offers a connection between Near Eastern material and their echoes in the West. a foundation for comparisons between the oriental cultures and gtheir echoes in the West. To provide a foundation for comparisons the Near Eastern material needs to be resented in reliable form. Reiner's sources are culled from such scientific texts as medicine, divination, and rituals, which are not usually included in anthologies of Mesopotamian texts and rarely available in translation..

The Troubled Island Jan Driessen, Colin F. Macdonald, 1997 Our thesis is that the archaeological evidence suggests a severe economic dislocation during the Late Minoan IB ceramic period in Crete. This appears to have been triggered, first by a tectonic earthquake and shortly afterwards by the eruption of Thera early in the Late Bronze Age (Late Minoan IA) after which the situation gradually worsened, accompanied by a general feeling of uncertainty caused by the eruption and its effects. The tectonic earthquake led to abandonments at some sites or an effort to rebuild in attempt to re-establish normal economic and social life. The result of these two natural disasters gave local centers greater independence from the traditional Palaces. This fragmentation of Minoan Crete brought about the end of the most highly developed economic system in the Aegean although it was somewhat resurrected in the following Mycenaean period. The natural events which proved to be the catalysts for change, presaged the end of the traditional ruling elites which appeared to have lost their assumed divine support. They tried in vain to maintain their special status, but with major problems in food production and distribution, the existing system disintegrated resulting in a process of decentralisation with an increase in the regional exploitation of land chiefly for local consumption; numerous lesser elites may well have prospered in this environment. However, as in the Hellenistic period, the fragmentation of Crete into many small centres may have led to internal Cretan conflict and a massive wave of fire destructions in Late Minoan IB, indicating a state of anarchy by the end of the period. That Mycenaeans from Mainland Greece arrived on the island at some stage during the Late Bronze Age is clear, although precisely when they arrived is a matter of fierce debate. The crisis years of LM IB-II, in the fifteenth century B.C., appear the most likely and opportune. During the succeeding Mycenaean period, only the Palace at Knossos seems to have functioned as a major centre. During LM II-III, there was a gradual but general decrease in the sophistication of architecture and arts. The LM II period may perhaps be regarded as the final phase of decline which began in LM IB, with some major centres suffering destructions once again. By Late

Minoan II, a new Knossian elite or dynasty appears to have taken control and installed a modified socio-political and economic system. The dynasty relied heavily on administration and bureaucracy to maintain its position. The Santorini eruption is here given the role of a precipitant or catalyst, which began an entire series of changes which eventually resulted in the absorption of Minoan Crete into the Mycenaean, and ultimately, the Greek world.

Metallurgy in Antiquity Robert James Forbes,1950

Mixanthrōpoi Emma Aston,2017-10-25 Many of the beings in this book - Cheiron, Pan, Acheloos, the Sirens and others - will be familiar from the narratives of Greek mythology, in which fabulous anatomies abound. However, they have never previously been studied together from a religious perspective, as recipients of cult and as members of the ancient pantheon. This book is the first major treatment of the use of part-animal - mixanthropic - form in the representation and visual imagination of Greek gods and goddesses, and of its significance with regard to divine character and function. What did it mean to depict deities in a form so strongly associated in the ancient imagination with monstrous adversaries? How did iconography, myth and ritual interact in particular sites of worship? Drawing together literary and visual material, this study establishes the themes dominant in the worship of divine mixanthropes, and argues that, so far from being insignificant curiosities, they make possible a greater understanding of the fabric of ancient religious practice, in particular the tense and challenging relationship between divinity and visual representation.

Athens and the Cyclades Brian Rutishauser,2012-10-04 This volume examines the history and economy of the Cyclades during the late sixth to late fourth centuries BC. While certain aspects of geography in the Cyclades remained constant, the islands were able to adapt to changing conditions and hegemony, imposed from outside the region, in order to increase their levels of economic prosperity.

Avicenna Soheil M. Afnan,2015-10-14 This book, first published in 1958, examines the life and works of Avicenna, one of the most provocative figures in the history of thought in the East. It shows him in the right historical perspective, as the product of the impact of Greek thought on Islamic teachings against the background of the Persian Renaissance in the tenth century. His attitude can be of guidance to those in the East who are meeting the challenge of Western civilization; and to those in the West who have yet to find a basis on which to harmonize scientific with spiritual values.

Exploring Ancient Skies David H. Kelley,Eugene F. Milone,2005-12-06 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope. The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean, the Far East, and the New World (particularly Mesoamerica), putting the ancient astronomical materials into their archaeological and cultural contexts. The authors begin with an overview of the field and proceed to essential aspects of naked-eye astronomy, followed by an examination of specific cultures. The book concludes by taking into account the purposes of ancient astronomy: astrology, navigation, calendar regulation, and (not least) the understanding of our place and role in the universe. Skies are recreated to display critical events as they would have appeared to ancient observers - events such as the supernova of 1054, the 'lion horoscope' or the 'Star of Bethlehem.' Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation. It will be useful as a reference for scholars and students in both astronomy and archaeology, and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history.
