**Housing as Intervention** Karen Kubey, 2018-07-30 Across the world, the housing crisis is escalating. Mass migration to cities has led to rapid urbanisation on an unprecedented scale, while the withdrawal of public funding from social housing provision in Western countries, and widening income inequality, have further compounded the situation. In prosperous US and European cities, middle- and low-income residents are being pushed out of housing markets increasingly dominated by luxury investors. The average London tenant, for example, now pays an unaffordable 49 per cent of his or her pre-tax income in rent. Parts of the developing world and areas of forced migration are experiencing insufficient affordable housing stock coupled with rapidly shifting ways of life. In response to this context, forward-thinking architects are taking the lead with a collaborative approach. By partnering with allied fields, working with residents, developing new forms of housing, and leveraging new funding systems and policies, they are providing strategic leadership for what many consider to be our cities' most pressing crisis. Amidst growing economic and health disparities, this issue of AD asks how housing projects, and the design processes behind them, might be interventions towards greater social equity, and how collaborative work in housing might reposition the architectural profession at large. **The American Influence on International Commercial Arbitration** Pedro J. Martinez-Fraga,2020-07-02 As in its first edition, this book traces the contours of select US common law doctrinal developments concerning international commercial arbitration. This new edition supplements the foundational work contained in the first edition in order to produce a broader and deeper work. The author explores how the US common law may help bridge cross-cultural legal

differences by focusing on the need to address these contrasting approaches through the nomenclature and goal of securing equality between party-autonomy and arbitrator discretion in international commercial arbitration. This book thus focuses on the common law development of arbitrator immunity, as well as the precepts of party-initiative and -autonomy forming part of the US common law discovery rubric that may contribute to promoting expediency, efficiency and transparency in international commercial arbitration proceedings. It does so by carefully analyzing, among other things, the International Bar Association (IBA) Rules on Evidence Gathering, the Prague Rules, and the role of 28 USC. §1782 in international arbitration.

**Dracula's Vault - A Collection of Vampiric Tales from the Pen of Bram Stoker** Bram Stoker, 2019-02-15 A chilling collection of classic gothic short stories written by Bram Stoker, all connected through the theme of vampires. "Gothic fiction" is a subgenre of Gothic horror that is defined by a combination of fiction writing with horror, death, and sometimes romance. It arguably originated from the 1764 novel "The Castle of Otranto" by English author Horace Walpole, which was subtitled "A Gothic Story" after the second edition. Abraham Bram Stoker (1847 - 1912) was an Irish author. He is best remembered for his 1897 Gothic novel "Dracula", which introduced the world-famous character of Count Dracula and is responsible for various conventions of vampire fantasy that persist to this day. The tales include: 'Dracula', 'The Judge's House', 'The Burial of the Rats' and 'The Squaw'. Other notable works by this author include: "The Primrose Path" (1875), "The Snake's Pass" (1890), and "Seven Golden Buttons" (1891). This volume will appeal to lovers of Gothic literature and classic vampire literature. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author.

*Recognition and Enforcement of Judgments in Civil and Commercial Matters* Anselmo Reyes, 2019-09-19 This collection offers a study of the regimes for the recognition and enforcement of foreign commercial judgments in 15 Asian jurisdictions: mainland China, Hong Kong, Taiwan, Japan, Korea, Malaysia, Singapore, Thailand, Vietnam, Cambodia, Myanmar, the Philippines, Indonesia, Sri Lanka and India. For practising lawyers, the book is intended as a practical guide to current law and procedures for enforcing judgments in the selected jurisdictions. However, it does not stop at describing current law and practice. Of interest to academics and students, it also analyses the common principles of the enforcement regimes across the jurisdictions, and identifies what should be regarded as the norm for enforcement in Asian countries for the purpose of attracting foreign direct investment and catalysing rapid economic development. In light of the common principles identified, the book explores how laws in Asia may generally be improved to enable judgments to be more readily enforced, while ensuring that legitimate concerns over indirect jurisdiction, due process and

domestic public policy are respected and addressed. With this in mind, the book discusses the potential impact that the adoption of the 2005 Hague Convention on Choice of Court Agreements might have on Asian jurisdictions; it also considers the potential impact of the convention for the enforcement of judgments in civil and commercial matters presently being drafted by the Hague Conference on Private International Law. This timely book argues that it is imperative to adopt a uniform system for the recognition and enforcement of judgments throughout Asia if there is to be traction for the enhanced cross-border commerce that is expected to result from endeavours such as the ASEAN Economic Community (AEC), the Belt and Road Initiative (BRI), CPTPP (also known as TPP-11), and RCEP.

**OpenGL ES 2 for Android** Kevin Brothaler,2013-06-26 Printed in full color. Android is booming like never before, with millions of devices shipping every day. It's never been a better time to learn how to create your own 3D games and live wallpaper for Android. You'll find out all about shaders and the OpenGL pipeline, and discover the power of OpenGL ES 2.0, which is much more feature-rich than its predecessor. If you can program in Java and you have a creative vision that you'd like to share with the world, then this is the book for you. This book will teach you everything you need to know to create compelling graphics on Android. You'll learn the basics of OpenGL by building a simple game of air hockey, and along the way, you'll see how to initialize OpenGL and program the graphics pipeline using shaders. Each lesson builds upon the one before it, as you add colors, shading, 3D projections, touch interaction, and more. Then, you'll find out how to turn your idea into a live wallpaper that can run on the home screen. You'll learn about more advanced effects involving particles, lighting models,

and the depth buffer. You'll understand what to look for when debugging your program, and what to watch out for when deploying to the market. OpenGL can be somewhat of a dark art to the uninitiated. As you read this book, you'll learn each new concept from first principles. You won't just learn about a feature; you'll also understand how it works, and why it works the way it does. Everything you learn is forward-compatible with the just-released OpenGL ES 3, and you can even apply these techniques to other platforms, such as iOS or HTML5 WebGL.
