Bayesian Statistics from Methods to Models and Applications Sylvia Frühwirth-Schnatter, Angela Bitto, Gregor Kastner, Alexandra Posekany, 2015-05-19 The Second Bayesian Young Statisticians Meeting (BAYSM 2014) and the research presented here facilitate connections among researchers using Bayesian Statistics by providing a forum for the development and exchange of ideas. WU Vienna University of Business and Economics hosted BAYSM 2014 from September 18th to the 19th. The guidance of renowned plenary lecturers and senior discussants is a critical part of the meeting and this volume, which follows publication of contributions from BAYSM 2013. The meeting's scientific program reflected the variety of fields in which Bayesian methods are currently employed or could be introduced in the future. Three brilliant keynote lectures by Chris Holmes (University of Oxford), Christian Robert (Université Paris-Dauphine), and Mike West (Duke University), were complemented by 24 plenary talks covering the major topics Dynamic Models, Applications, Bayesian Nonparametrics, Biostatistics, Bayesian Methods in Economics, and Models and Methods, as well as a lively poster session with 30 contributions. Selected contributions have been drawn from the conference for this book. All contributions in this volume are peer-reviewed and share original research in Bayesian computation, application, and theory.

The Analytic Hierarchy Process Bruce L. Golden, Edward A. Wasil, Patrick T. Harker, 2012-12-06 Management science is a discipline dedicated to the development of techniques that enable decision makers to cope with the increasing complexity of our world. The early burst of excitement which was spawned by the development and successful applications of linear programming to problems in both the public and private sectors has challenged researchers to develop even more sophisticated methods to deal with the complex nature of decision making. Sophistication, however, does not always translate into more complex mathematics. Professor Thomas L. Saaty was working for the U. S. Defense Department and for the U. S. Department of State in the late 1960s and early 1970s. In these positions, Professor Saaty was exposed to some of the most complex decisions facing the world: arms control, the Middle East problem, and the development of a transport system for a Third World country. While having made major contributions to numerous areas of mathematics and the theory of operations research, he soon realized that one did not need complex mathematics to come to grips with these decision problems, just the right mathematics! Thus, Professor Saaty set out to develop a mathematically-based technique for analyzing complex situations which was sophisticated in its simplicity. This technique became known as the Analytic Hierarchy Process (AHP) and has become very successful in helping decision makers to structure and analyze a wide range of problems.

Nanofiber Composites for Biomedical Applications Murugan Ramalingam, Seeram Ramakrishna, 2017-01-10 Nanofiber Composite Materials for Biomedical Applications presents new developments and recent advances in nanofiber-reinforced composite materials and their use in biomedical applications, including biomaterial developments, drug delivery, tissue engineering, and regenerative medicine. From Jerusalem to the Lion of Judah and Beyond Steven Carol, 2012 From Jerusalem to the Lion of Judah and Beyond provides the most thorough analysis of Israel's foreign policy towards East Africa. Since its modern reestablishment, Israel has sought political allies in the international community. To achieve that goal, Israel offers technological, economic and military assistance to developing nations. Historically, four East African countries Ethiopia, Kenya, Uganda, and Tanzania were prime beneficiaries of that effort. Later, these efforts were extended to Eritrea and South Sudan. Israel has been demonstrating its willingness to offer a far greater share of its limited resources to international assistance, than practically any other nation, large or small. Since 1948, Israel's foreign policy towards East Africa exemplifies these immortal words: I will also give thee [Israel] for a light to the nations, that My salvation may be unto the end of the earth. Isaiah 49:6. The chronicles of these laudable activities are little known, even to post World War II historians. No other book to date covers this subject in as much depth. Anyone seeking a more profound understanding of Israel's foreign policy, as well as its historic relationship with East Africa, will find From Jerusalem to the Lion of Judah and Beyond of interest.

Engineering Optimization A. Ravindran, Gintaras V. Reklaitis, Ken M. Ragsdell, 2006-05-19 The classic introduction to engineering optimization theory and practice--now expanded and updated Engineering optimization helps engineers zero in on the most effective, efficient solutions to problems.
