Beauty-protecting Conceited Monk Wu KewanHui,2020-06-17 Buddha says: Red powder like a skeleton, the human world is hell. Buddha said: I do not go to hell, who goes to hell? As a good monk who respected buddha and loved buddhas, Lin Kong ran down the mountain without any hesitation. With the hot-bloodedness of a virgin who had been holding back for twenty-two years, he threw himself into the good deeds of the rose-pink skeletons. Master Lin said: The ten thousand flowers, the Buddha sat in the mind. Good, good!

Conformance Checking and Simulation-based Evolutionary Optimization for Deployment and Reconfiguration of Software in the Cloud Sören Frey,2014-01-30 Many SaaS providers nowadays want to leverage the cloud's capabilities also for their existing applications, for example, to enable sound scalability and cost-effectiveness. This thesis provides the approach CloudMIG that supports SaaS providers to migrate those applications to IaaS and PaaS-based cloud environments. CloudMIG consists of a step-by-step process and focuses on two core components. (1) Restrictions imposed by specific cloud environments (so-called cloud environment constraints (CECs)), such as a limited file system access or forbidden method calls, can be validated by an automatic conformance checking approach. (2) A cloud deployment option (CDO) determines which cloud environment, cloud resource types, deployment architecture, and runtime reconfiguration rules for exploiting a cloud's elasticity should be used. The implied performance and costs can differ in orders of magnitude. CDOs can be automatically optimized with the help of our simulation-based genetic algorithm CDOXplorer. Extensive lab experiments and an experiment in an industrial context show CloudMIG's applicability and the excellent performance of its two core components.

Hide and Seek Benson P. Fraser,2020-07-21 As bearers of the divine image, all of us are storytellers and artists. However, few people today believe in truth that is not empirically knowable or verifiable, the sort of truth often trafficked through direct forms of communication. Drawing on the works of Soren Kierkegaard, Benson P. Fraser challenges this penchant for direct forms of knowledge by introducing the indirect approach, which he argues conveys more than mere knowledge, but the capability to live out what one takes to be true. Dr. Fraser suggests that stories aimed at the heart are powerful instruments for personal and social change because they are not focused directly on the individual listener; rather, they give the individual room or distance to reconsider old meanings or ways of understanding. Indirect communication fosters human transformation by awaking an individual to attend to images or words that carry deep symbolic force and that modify or replace one's present ways of knowing, and ultimately make one capable of embodying what he or she believes. Through an examination of the indirect approach in Kierkegaard, Jesus, C. S. Lewis, and Flannery O'Connor, Fraser makes a strong case for the recovery of indirect strategies for communicating truth in our time.

Everyday Genius Gary Alan Fine,2006-08-01 From Henry Darger's elaborate paintings of young girls caught in a vicious war to the sacred art of the Reverend Howard Finster, the work of outsider artists has achieved unique

status in the art world. Celebrated for their lack of traditional training and their position on the fringes of society, outsider artists nonetheless participate in a traditional network of value, status, and money. After spending years immersed in the world of self-taught artists, Gary Alan Fine presents *Everyday Genius*, one of the most insightful and comprehensive examinations of this network and how it confers artistic value. Fine considers the differences among folk art, outsider art, and self-taught art, explaining the economics of this distinctive art market and exploring the dimensions of its artistic production and distribution. Interviewing dealers, collectors, curators, and critics and venturing into the backwoods and inner-city homes of numerous self-taught artists, Fine describes how authenticity is central to the system in which artists—often poor, elderly, members of a minority group, or mentally ill—are seen as having an unfettered form of expression highly valued in the art world. Respected dealers, he shows, have a hand in burnishing biographies of the artists, and both dealers and collectors trade in identities as much as objects. Revealing the inner workings of an elaborate and prestigious world in which money, personalities, and values affect one another, Fine speaks eloquently to both experts and general readers, and provides rare access to a world of creative invention—both by self-taught artists and by those who profit from their work. “Indispensable for an understanding of this world and its workings. . . . Fine’s book is not an attack on the Outsider Art phenomenon. But it is masterful in its anatomization of some of its contradictions, conflicts, pressures, and absurdities.”—Eric Gibson, *Washington Times*
