**Dos primeiros tempos da saúde pública em Goiás à Faculdade de Medicina** Maria Augusta de Sant'Anna Moraes,2019-07-10 Em Dos primeiros tempos da saúde pública em Goiás à Faculdade de Medicina, Maria Augusta de Sant'Anna Moraes traça um panorama histórico mostrando a evolução das práticas e costumes, das instituições e dos profissionais de saúde em Goiás do século XVIII até hoje. Trazendo a exemplaridade das histórias de conquistas realizadas com esforço, destacando o papel fundamental exercido por profissionais destemidos e idealistas, recupera a trajetória das primeiras tentativas de construção de políticas públicas na área de saúde em nosso estado. Ao mostrar as dificuldades desses tempos pioneiros, discutidas de modo contextualizado e articulado aos esforços de implantação de políticas nacionais de saúde, constrói uma obra de fôlego, cujo interesse não se circunscreve à área médica, tampouco à historiografia regional ou ao público leitor goiano.

**Resistências** Mafalda Soares da Costa,2022-04-13  
RESISTÊNCIAS reúne 50 histórias de revolta ocorridas em territórios sob domínio português ao longo de três séculos e meio: de 1500 a 1850. Muitos deles desconhecidos do grande público, estes casos foram seleccionados, investigados e

escritos por MAIS DE 30 HISTORIADORES de diversas entidades e países. Passam-se em diferentes épocas e geografias, mas todos relatam o combate à opressão e às injustiças impostas pelos poderes de um mundo que se estendia do Brasil a Timor, passando por África, Índia, Malaca, Macau e, naturalmente, Portugal. Os protagonistas de RESISTÊNCIAS são pessoas discriminadas em função do género, religião, etnia, raça ou nível de riqueza, e os episódios são quase sempre narrados a partir do seu ponto de vista, revelando Portugal e o seu império como um espaço onde tanto circulavam leis e formas institucionais como ideias subversivas...

Grande Otelo Sérgio Cabral,2007 Com a descoberta do arquivo pessoal de Grande Otelo, o jornalista e crítico musical Sérgio Cabral pôde recompor passo a passo a trajetória pessoal e profissional deste grande artista. Descrição minuciosa de uma vida intensa, controvertida, esta biografia, ilustrada com dezenas de fotos, é o registro dos sonhos e das realizações do duende encantado e encantador (como o definiu o ator Paulo José) que viveu sempre na fronteira entre o profissionalismo e a boêmia.

**Handbook of Biopolymers** Sabu Thomas,Ajitha AR,Cintil Jose Chirayil,Bejoy Thomas,2023-04-29

This book on biopolymers offers a comprehensive source for biomaterial professionals. It covers all elementary topics related to the properties of biopolymers, the production, and processing of biopolymers, applications of biopolymers, examples of biopolymers, and the future of biopolymers. Edited by experts in the field, the book highlights international professionals' longstanding experiences and addresses the requirements of practitioners and newcomers in this field in finding a solution to their problems. The book brings together several natural polymers, their extraction/production, and physiochemical features. The topics covered in this book are biopolymers from renewable sources, marine prokaryotes, soy protein and humus oils, biopolymer recycling, chemical modifications, and specific properties. The book also focuses on the potential and diverse applications of biogenic and bio-derived polymers. The content includes industrial applications of natural polymeric molecules and applications in key areas such as material, biomedical, sensing, packaging, biomedicine, and biotechnology, and tissue engineering applications are discussed in detail. The objective of this book is to fill the gap between the researchers working in the laboratory to cutting-edge technological applications in related industries. This book will be a very valuable reference material for graduates and post-graduate students, academic researchers, professionals, research scholars, and scientists, and for anyone who has a flavor for doing biomaterial research. The books are designed to

serve as a bridge between undergraduate textbooks in biochemistry and professional literature. The book provides universal perspectives for an emerging field where classical polymer science blends with molecular biology with highlights on recent advances.

*Mushrooms* Youssef Najib Sassine, 2021-10-06 The white button mushroom, *Agaricus bisporus* is one of the most widely cultivated mushroom species in the world. It is favored for its high nutritional value and multiple health benefits, especially by consumers interested in vegan and clean eating. This book presents fundamental guidelines for mushroom production as well as major scientific findings in this field. It covers mushroom production and trade, substrates properties, compost quality, breeding, pests and diseases, harvesting, and post-harvest technologies. With practical information on methods used by both commercial and small-scale growers. This is a valuable resource for researchers and students in horticulture, as well as professionals and growers.

*Stories on a String* Candace Slater, 2023-11-10 This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1982.

*The Sun: A Laboratory for Astrophysics* J.T.

Schmelz, Richard Brown, 2012-12-06 As in the days following Skylab, solar physics came to the end of an era when the Solar Maximum Mission re-entered the earth's atmosphere in December 1989. The 1980s had been a pioneering decade not only in space- and ground-based studies of the solar atmosphere (Solar Maximum Mission, Hinotori, VLA, Big Bear, Nancay, etc.) but also in solar-terrestrial relations (ISEE, AMPTE), and solar interior neutrino and helioseismology studies. The pace of development in related areas of theory (nuclear, atomic, MHD, beam-plasma) has been equally impressive. All of these raised tantalizing further questions about the structure and dynamics of the Sun as the prototypical and best observed star. This Advanced Study Institute was timed at a pivotal point between that decade and the realisation of Yohkoh, Ulysses, SOHO, GRANAT, Coronas, and new ground-based optical facilities such as LEST and GONG, so as to teach and inspire the up and coming young solar researchers of the 1990s. The topics, lecturers, and students were all chosen with this goal in mind, and the result seems to have been highly successful by all reports.

**Cardiovascular Complications of COVID-19** Maciej Banach, 2022-12-28 This book is the first comprehensive approach on COVID-19 cardiac complications, both during the acute phase as well

as in the long-COVID period. It provides an up-to-date and highly illustrated summary of the biology of SARS-CoV-2, the course of COVID-19, risk factors that worsen the disease in COVID-19 patients, clinical features of COVID-19 patients, COVID-19 cardiological complications, treatment, and prevention methods, and long-term cardiological aspects of COVID-19. Chapters provide the reader with a contemporary perspective on the emerging links between COVID-19 and cardiovascular disease. In addition, this volume discusses the clinical implications and therapeutic goals in patients with COVID-19 and cardiac complications, as well as possible therapeutic options. It also offers clear recommendations on how to manage (both non- and pharmacologically) to avoid the increased number of COVID-19 related deaths due to CVD and its risk factors. *Cardiovascular Complications of COVID-19* will be the primary resource for physicians, residents, fellows, and nurses and medical students in the fields of cardiology and COVID-19/infectious diseases as well as healthcare providers that initiate preventive activities and dedicated programs.

*The Bosnian Muslims in the Second World War*  
Marko Attila Hoare, 2014-02-01 The story of the Bosnian Muslims in World War II is an epic frequently alluded to in discussions of the 1990s Balkan conflicts, but almost as frequently misunderstood or falsified. This first comprehensive study of the topic in any language sets the record straight. Based on extensive research in the archives of Bosnia- Herzegovina,

Serbia and Croatia, it traces the history of Bosnia and its Muslims from the Nazi German and Fascist Italian occupation of Yugoslavia in 1941, through the years of the Yugoslav civil war, and up to the seizure of power by the Communists and their establishment of a new Yugoslav state. The book explores the reasons for Muslim opposition to the new order established by the Nazis and Fascists in Bosnia in 1941 and the different forms this opposition took. It describes how the Yugoslav Communists were able to harness part of this Muslim opposition to support their own resistance movement and revolutionary bid for power. This Muslim element in the Communists' revolution shaped its form and outcome, but ultimately had itself to be curbed as the victorious Communists consolidated their dictatorship. In doing so, they set the scene for future struggles over Yugoslavia's Muslim question.

**Geotechnical Engineering for Transportation Infrastructure** F.B.J. Barends, 2017-11-22 This volume provides an overview of the proceedings of the XIIth ECSME Conference 1999. It covers a wide variety of topics, from summaries of workshops and sessions, to the emergence of information technology and information retrieval and communication.

**Heritage Tourism Destinations** Maria D Alvarez, Atila Yuksel, Frank Go, 2016-05-27 Heritage tourism is tied to myth making and stories; creative content that can be shared, stored, combined and manipulated, but that depends on a unique cultural or natural history. A significant

section of the wider phenomenon that is cultural tourism, heritage tourism is a demand-driven industry that continues to be a subject of heated debate in academic circles. Beginning with an overview of the subject, this book considers the conservation and revitalization of heritage destinations, as well as the role local communities have in supporting an attraction. It then discusses product development and communication around the world, using new techniques such as social media and examples from food tourism and sporting events, before a final section reviews the planning and institutionalisation of heritage spaces. A timely conclusion subsequently considers the implications of developments such as globalisation, technological improvement and climate change upon these unique destinations. A valuable addition to the literature, this book is the first to bridge the gap between theory and practice, including the latest research and international case studies for researchers and practitioners in tourism and destination management.
