**Introduction to Audio Processing** Mads G. Christensen, 2019-03-30 This textbook presents an introduction to signal processing for audio applications. The author's approach posits that math is at the heart of audio processing and that it should not be simplified. He thus retains math as the core of signal processing and includes concepts of difference equations, convolution, and the Fourier Transform. Each of these is presented in a context where they make sense to the student and can readily be applied to build artifacts. Each chapter in the book builds on the previous ones, building a linear, coherent story. The book starts with a definition of sound and goes on to discuss digital audio signals, filters, The Fourier Transform, audio effects, spatial effects, audio equalizers, dynamic range control, and pitch estimation. The exercises in each chapter cover the application of the concepts to audio signals. The exercises are made specifically for Pure Data (Pd) although traditional software, such as MATLAB, can be used. The book is intended for students in media technology bachelor programs. The book is based on material the author developed teaching on the topic over a number of years.

**The Ten Best Days of My Life** Adena Halpern, 2012-06-01 Alex Dorenfield is a 29-year-old personal shopper. She lives in LA and is worried that what she is doing with her life is slightly pointless. Or at least she did - until she was killed by a Mini Cooper while walking her dog, Peaches, at four in the morning. When Alex gets to heaven she finds herself on the seventh plane, a place with no cellulite, walk-in closets, calorie-free ice-cream sundaes and a straight, single, hunky next-door neighbour. Sure, she misses her parents and is sad that she died so young, but things aren't too bad. In fact, she gets to see her grandparents again and catch up with the other people she loves who have died. Just when Alex thinks things are going to be fine, she finds out she has to earn her right to stay in this heaven - which means finding ways to right some wrongs she left behind.
