System Dynamics Martin Kunc,2017-11-23 This book presents some of the most important papers published in Palgrave's Journal of Operational Research relating to the use of System Dynamics (SD) in the context of Operational Research (OR). Giving the reader an in-depth understanding of significant features of the research area which have grown over the last 20 years: applications in the management field; methodologies; policies at industry level; and healthcare, this book is an invaluable read for those who do not have any prior expertise in the field. Split into four parts, the collection covers the broad use of SD in the field of management, focuses on the use of modelling in supply chains and at industry level, and presents an analysis of the use of SD in its most promising area, healthcare. Not only does this work provide a detailed overview of the field of SD, but it will also offer vital insights into potential research avenues for the future considering the use of SD as a soft OR and hard OR method.

Pseudepigrapha of the Old Testament as Part of Christian Literature Marinus de Jonge,2021-08-04 The primary witnesses of the writings called Pseudepigrapha of the Old Testament are, in great majority, of Christian provenance. It has been customary for scholars to look for an originally Jewish form of the documents, reflecting Jewish life and thought in the period between 200 BCE and 100 CE. In this volume, M. de Jonge argues that these writings should, first of all, be studied as documents relevant for Christians. This volume incorporates essays written earlier by the author as well as a number of new chapters. The first part deals with general questions concerning the transmission of the pseudepigrapha of the Old Testament whereas the second part has a particular focus on the Testaments of the Twelve Patriarchs and the Greek Life of Adam and Eve.

Pseudepigraphic Perspectives: The Apocrypha and Pseudepigrapha in Light of the Dead Sea Scrolls Esther G. Chazon,Michael Stone,Avital Pinnick,2018-12-24 This volume of symposium papers examines the attribution of books to great figures in antiquity: Enoch, Noah, Abraham, Levi, Moses, Ezekiel, Daniel and others. The authors offer fine literary studies of these pseudepigraphical writings, assess the uses of pseudonymity and anonymity in the Dead Sea Scrolls and rabbinic literature, and explore the theological, social and historical implications of the different attributions and approaches. The consequences of assigning the origins of evil to humans (Adam and Eve) or to demons (the generations of Enoch and Noah) and the significance of each author's choice of pseudepigraphical pseudonym for identifying his social context are among the important issues addressed.

Lions and Tigers and AIDS! Oh, My! Craig D. McLaughlin,2013-09 Craig McLaughlin is an amazing storyteller with amazing stories to tell--stories about childhood illness, family dysfunction, exotic animals, HIV, cancer, and parenting. And he tells them all with incredible courage and honesty. The essays in this collection, each one designed to be told in ten to fifteen minutes, serve as templates for his live performances, but by assembling them in one place, he has created a memoir full of wit, wisdom and compassion. Story subjects include: Being trapped in a pickup cab with an out-of-control chimpanzee. Waking to find a jaguar slobbering over his ankle. Dreaming of a demon that forced him to confront his own death. Raising a daughter when both he and his wife were expected to die. Gearing up for a gun battle with the Hells Angels. Comforting the man his mother and stepfather kidnapped. The book also contains a discussion of the wildly popular form of personal storytelling and includes an essay on Ten Tips for Storytellers.
