Bridging Music Informatics with Music Cognition Naresh N. Vempala, Frank A. Russo, Geraint A. Wiggins, 2018-09-14 Music informatics is an interdisciplinary research area that encompasses data driven approaches to the analysis, generation, and retrieval of music. In the era of big data, two goals weigh heavily on many research agendas in this area: (a) the identification of better features and (b) the acquisition of better training data. To this end, researchers have started to incorporate findings and methods from music cognition, a related but historically distinct research area that is concerned with elucidating the underlying mental processes involved in music-related behavior.

Readings in Multimedia Computing and Networking Kevin Jeffay, Hong Jiang Zhang, 2001-08-10 *Readings in Multimedia Computing and Networking* captures the broad areas of research and developments in this burgeoning field, distills the key findings, and makes them accessible to professionals, researchers, and students alike. For the first time, the most influential and innovative papers on these topics are presented in a cohesive form, giving shape to the diverse area of multimedia computing. The seminal moments are recorded by a dozen visionaries in the field and each contributing editor provides a context for their area of research by way of a thoughtful, focused chapter introduction. The volume editors, Kevin Jeffay and Hong Jiang Zhang, offer further incisive interpretations of past and present developments in this area, including those within media and content processing, operating systems, and networking support for multimedia. This book will provide you with a sound understanding of the theoretical and practical issues at work in the field's continuing evolution. * Offers an in-depth look at the technical challenges in multimedia and provides real and potential solutions that promise to expand the role of multimedia in business, entertainment, and education. * Examines in Part One issues at the heart of multimedia processes: the means by which multimedia data are coded, compressed, indexed, retrieved, and otherwise manipulated. * Examines in Part Two the accommodation of these processes by storage systems, operating systems, network protocols, and applications. * Written by leading researchers, the introductions give shape to a field that is continually defining itself and place the key research findings in context to those who need to understand the state-of-the-art developments.

The Automatic Writing Experience (AWE) Michael Sandler, 2021-02-16 An AWE-Inspiring Adventure Automatic writing can do more than merely help you tap into inner guidance. The practice can boost creativity, ignite intuition, and even trigger mystical experiences. - January/February 2022 issue of Unity Magazine. Ever grabbed the steering wheel, and yanked it to the side, just in the nick of time? Or ever picked up the phone to call someone, only to find they're already there! Inside of each one of us, is an inner wisdom just waiting to come out. It's the voice that had you turn the wheel or pick up the phone. And this inner knowing has the answers to your most pressing questions. Where do I go? What do I do? Why am I even here? Or even how do I get out of this mess? The answers are closer than you think and with The Automatic Writing Experience (AWE), a revolutionary process to enter a meditative state, put pen to paper, and watch the words flow, you'll have access to this incredible wisdom anytime you want. And the greatest thing is, you don't need any particular belief, spirituality, or even gift. This ability to tap in is available to everyone--especially you. In AWE, you'll quickly and easily learn how to tune into this wisdom, get answers, find direction, and point your ship almost anywhere you desire. You'll learn more about your life than you ever imagined! And using AWE, you'll tap into the most powerful manifestation tool, putting the law of attraction into action, helping attract your dreams, and much more.
