It Security Products for Corporate Users Peter Stelzhammer, Andreas Clementi, Thomas Arlt, Philippe Rödlach, 2010 Most organizations are aware of the risks threatening their IT environment. Viruses, trojans, worms, exploits and many other threats represent a serious danger for the IT department. A collapse of the IT system could mean grave financial losses right up to insolvency for a company. The IT departments of companies are conscious of this problem. Getting the best protection against these threats is the only issue. A simple file antivirus solution alone is totally inadequate, as there are too many threats from contaminated e-mails, exploits etc. What is required is a comprehensive suite that provides protection against all of these. Functional Diversity Because of the immense functional diversity of various antivirus suites and corporate products, it is becoming increasingly difficult for decision-makers in the IT sector to get a proper overview. Which product should one opt for and for which areas of protection? During these tests our main focus has not been on malware detection rates, but on the products' handling and user-friendliness, and the scope of functionality. We have compiled the functional scope of various products in a detailed table. For malware detection rates of individual products please refer to the tests of our website: <http://www.av-comparatives.org>

*The Kabbalistic Mirror of Genesis* David Chaim Smith, 2015-09-17 A bold line-by-line reexamination of the first 3 chapters of Genesis that reveals the essential nature of mind and creativity • Deconstructs each line of Genesis chapters 1-3 with esoteric methods derived from the oral teachings of the Kabbalah • Reveals the sefirot, the Tree of Life, as the Divine blueprint of the creative process • Explains how Genesis reveals the Divinity of mind and consciousness Hidden within the first three chapters of Genesis rests one of the greatest jewels of Western mystical literature. For millennia religious literalism has dominated our understanding of the Bible, imprisoning its subtle inner wisdom within the most coarse and superficial aspects of the narrative. Generations have been led to believe that Genesis 1-3 is only a primitive proto-cosmic history, a mythological explanation of the human moral disposition, a religious fairy tale. But by accepting the text as pure kabbalistic metaphor, the mystical content of Genesis springs forth, revealing the Divine nature of creativity as well as a new understanding of the human mind. Deconstructing each line of Genesis 1-3 with esoteric methods derived from the oral teachings of the Kabbalah, David Chaim Smith reveals how the ten sefirot, collectively known as the Tree of Life, are not simply a linear hierarchy. They are a unified interdependent whole with ten interactive functions, forming the template through which creative diversity manifests. Through acts of creation and creativity, the mind expresses its Divine nature. Through our Divine creative power, we are able to touch upon Ain Sof (the infinite), the lifeblood of all creative expression. Smith's line-by-line examination of Genesis 1-3 reveals a complete model not only of Divine creativity but also of the predicament of the human mind, of the Divine nature of consciousness as well as our inability to recognize the mind's Divinity. With this new interpretation, which removes the concept of a Creator God, we are able to transcend the contrasting notions of "being" and "non-being" at the heart of conventional habits of perception and awaken a new mystical understanding of Unity and the fathomless depth of Divinity.

**Mobile Security Products for Android** Philipp Kratzer,Christoph Gruber,Andreas Clementi,David Lahee,Philippe Rödlach,Peter Stelzhammer,2014-10-14 We have once again tested security products for smartphones running Google's Android operating system. Our report covers details of the products made by leading manufacturers. Smartphones represent the future of modern communications. In 2013, more than 1 billion smartphones were sold, a further milestone in the advance of these devices<sup>1</sup>. A study published by Facebook emphasises the importance of smartphones in our lives; about 80% of users make use of their smartphone within 15 minutes of waking up each day. At the same time, the traditional function of a telephone is becoming less and less important. The high quality of integrated cameras means that the smartphone is increasingly used for photography. As well as with photos, users trust their devices with their most personal communications, such as Facebook, WhatsApp and email. This brings some risks with it, as such usage makes the smartphone interesting for criminals, who attempt to infect the device with malware or steal personal data. There is also the danger brought by phishing attacks. These days, the use of security software on a PC or laptop is seen as essential. However, many smartphone users do not yet have the same sense of responsibility, even though their devices store personal data, private photos, Internet banking information or even company data. As modern smartphones are often expensive to buy, they are also an attractive target for thieves. Top-quality smartphones cost several hundred Euros. As it is not possible to physically prevent them from being stolen,

they must be made less attractive to thieves. Consequently, many of today's security products contain not only malware protection, but also highly developed theft-protection functions, which make the device less attractive to thieves (e.g. by locking the device), and help the owner to find it again.

*The Shaykh of Shaykhs* Yoav Alon, 2016-07-20 Shaykh Mithqal al-Fayiz's life spanned a period of dramatic transformation in the Middle East. Born in the 1880s during a time of rapid modernization across the Ottoman Empire, Mithqal led his tribe through World War I, the development and decline of colonial rule and founding of Jordan, the establishment of the state of Israel and the Arab-Israeli conflict that ensued, and the rise of pan-Arabism. As Mithqal navigated regional politics over the decades, he redefined the modern role of the shaykh. In following Mithqal's remarkable life, this book explores tribal leadership in the modern Middle East more generally. The support of Mithqal's tribe to the Jordanian Hashemite regime extends back to the creation of Jordan in 1921 and has characterized its political system ever since. The long-standing alliances between tribal elites and the royal family explain, to a large extent, the extraordinary resilience of Hashemite rule in Jordan and the country's relative stability. Mithqal al-Fayiz's life and work as a shaykh offer a notable individual story, as well as a unique window into the history, society, and politics of Jordan.

**Cloud Computing for Optimization: Foundations, Applications, and Challenges** Bhabani Shankar Prasad Mishra, Himansu Das, Satchidananda Dehuri, Alok Kumar Jagadev, 2018-02-26 This book discusses harnessing the real power of cloud computing in optimization

problems, presenting state-of-the-art computing paradigms, advances in applications, and challenges concerning both the theories and applications of cloud computing in optimization with a focus on diverse fields like the Internet of Things, fog-assisted cloud computing, and big data. In real life, many problems – ranging from social science to engineering sciences – can be identified as complex optimization problems. Very often these are intractable, and as a result researchers from industry as well as the academic community are concentrating their efforts on developing methods of addressing them. Further, the cloud computing paradigm plays a vital role in many areas of interest, like resource allocation, scheduling, energy management, virtualization, and security, and these areas are intertwined with many optimization problems. Using illustrations and figures, this book offers students and researchers a clear overview of the concepts and practices of cloud computing and its use in numerous complex optimization problems.

As a relatively new source within a broader security dispositif these security professionals have created relationships of mutual recognition and benefit with traditional political and security professionals.
