Surfactants Europa Gordon L Hollis, 2007-10-31 Surfactants Europa 3rd Edition provides easy access to current product information on surface active agents (surfactants) manufactured and sold in Europe. It contains valuable data on approximately 9,000 trade names from more than 80 suppliers, including chemical description and composition, general property, application and manufacturer information. The directory contains company and trade name indexes with page references, and provides a very useful listing of companies, with full contact details, including European divisions and agents. The products listed in the directory find applications in a wide variety of branches of the chemical manufacturing industry including detergent and cleaning products, agrochemicals, construction, cosmetics, food, oil, paint, paper, pharmaceuticals, plastics and textiles. The directory is edited by Dr Gordon Hollis, an established consultant in the surfactants field and author of four respected surfactants directories. Surfactants Europa 3rd Edition will be an essential reference directory for research and development personnel and laboratory staff in general. It will also be useful for technical departments and purchasing/sales departments, not only in the detergent industry but in many industries where surfactants are used.

Surface Active Ethylene Oxide Adducts N. Schönfeldt,2013-09-17 *Surface Active Ethylene Oxide Adducts* covers the fundamental problems associated with the surface active ethylene oxide adduct. This book contains six chapters that consider the progress on modifications of ethylene oxide adducts. The opening chapters examine the preparation and industrial application of ethylene oxide adducts. These chapters provide a formulation based on the starting materials and divides the ethylene oxide adducts in different classes according to the bond between the hydrophobic and the hydrophilic part of the molecule. The next chapters describe the physical, chemical, and functional properties of these adducts. These chapters also look into the biodegradability and industrial uses of ethoxylated products, with an emphasis on their applications to the mineral oil industry. These topics are followed by discussions of the chemical modifications of ethylene oxide adducts, including etherification of the terminal hydroxyl group with aliphatic or cyclic, hydrophobic radicals and carboxymethylation of adducts. The final chapter focuses on the analytical methods used in the industrial control laboratory and in product analysis. This book is intended primarily for laboratory chemists, plant chemists, and chemical engineers.
