Brutus: Vindiciae, Contra Tyrannos Hubert Languet,1994 A complete translation and detailed edition of an influential treatise.

1100 Architect 1100 Architect (Firm),1997 For more than twenty years, David Piscuskas and Juergen Riehm, principals of 1100 Architect, have worked toward a refined architecture that captures the spirit of early modernism and translates traditional sensibilities of harmony, composition, and precision into a contemporary context. The firm's designs do not adhere to any specific stylistic codes but do have a recognizable, yet understated architectural signature: an elegance of proportion, a subtle mix of colors, meticulous details and craftsmanship. Each project shown in this volume, the first monograph on the work of 1100, exemplifies that signature. Presented with exquisite color photographs, working drawings, models, and sketches, the designs range from apartments and houses (many for clients in the worlds of art, fashion, and theater) to retail and art-related spaces, including the Robert Mapplethorpe Foundation, TSE, J.Crew, and Metro Pictures, all in New York. Paralleling the diverse visual material, the rich and layered text epitomizes the nature of Piscuskas and Riehm's partnership, simultaneously exploring the relationship between the architects and their architecture, the literal and the abstract, the tactile and the visual.

Trading for a Living Alexander Elder,1993-03-22 Trading for a Living Successful trading is based on three M's: Mind, Method, and Money. Trading for a Living helps you master all of those three areas: * How to become a cool, calm, and collected trader * How to profit from reading the behavior of the market crowd * How to use a computer to find good trades * How to develop a powerful trading system * How to find the trades with the best odds of success * How to find entry and exit points, set stops, and take profits Trading for a Living helps you discipline your Mind, shows you the Methods for trading the markets, and shows you how to manage Money in your trading accounts so that no string of losses can kick you out of the game. To help you profit even more from the ideas in Trading for a Living, look for the companion volume--Study Guide for Trading for a Living. It asks over 200 multiple-choice questions, with answers and 11 rating scales for sharpening your trading skills. For example: Question Markets rise when * there are more buyers than sellers * buyers are more aggressive than sellers * sellers are afraid and demand a premium * more shares or contracts are bought than sold * I and II * II and III * II and IV * III and IV Answer B. II and III. Every change in price reflects what happens in the battle between bulls and bears. Markets rise when bulls feel more strongly than bears. They rally when buyers are confident and sellers demand a premium for participating in the game that is going against them. There is a buyer and a seller behind every transaction. The number of stocks or futures bought and sold is equal by definition.

Rethinking Mycenaean Palaces II Michael L. Galaty,William A. Parkinson,2007-12-31 This revised and expanded edition of the classic 1999 edited book includes all the chapters from the original volume plus a new, updated, introduction and several new chapters. The current book is an up-to-date review of research into Mycenaean palatial systems with chapters by

archaeologists and Linear B specialists that will be useful to scholars, instructors, and advanced students. This book aims to define more accurately the term palace in light of both recent archaeological research in the Aegean and current anthropological thinking on the structure and origin of early states. Regional centers do not exist as independent entities. They articulate with more extensive sociopolitical systems. The concept of palace needs to be incorporated into enhanced models of Mycenaean state organization, ones that more completely integrate primary centers with networks of regional settlement and economy.

Growing with Hong Kong, 2002-01-01 The book witnesses and chronicles the 90 years wherein the University of Hong Kong and its graduates were intimately engaged in the development of Hong Kong.

Service Leadership A. Reza Hoshmand, Po Chung, 2021-08-15 Service Leadership offers students, researchers, and leaders a leadership model originating in the service economy – but which is gaining ground in all sectors and industries – explained by experts that were key actors in that origination at DHL International. Designed for undergraduates and graduates but also useful for professionals in leadership positions, Hoshmand and Chung structure the book around the 3Cs of leadership in the service economy: Competence, Character, and Care. It shows how the integration of the 3Cs when applied in combination with each other creates an environment of trust within and outside the organization. Most importantly, it allows the reader to understand how a move from the manufacturing mindset (hierarchical decision making) to a service mindset (collective, qualitative, culturally sensitive) creates an ethical habitat and ecosystem that contributes to a firm's competitiveness and adds value to its brand image. Incorporating elements of leadership literature, philosophy, psychology, sociology, economics, and political science, including cases, and supported by a teaching manual and a full set of slides, this book is ideal core reading for students of service leadership and leadership in the service economy, and valuable to those learning about leadership more broadly.

Applied Advanced Analytics Arnab Kumar Laha, 2021-06-08 This book covers several new areas in the growing field of analytics with some innovative applications in different business contexts, and consists of selected presentations at the 6th IIMA International Conference on Advanced Data Analysis, Business Analytics and Intelligence. The book is conceptually divided in seven parts. The first part gives expository briefs on some topics of current academic and practitioner interests, such as data streams, binary prediction and reliability shock models. In the second part, the contributions look at artificial intelligence applications with chapters related to explainable AI, personalized search and recommendation, and customer retention management. The third part deals with credit risk analytics, with chapters on optimization of credit limits and mitigation of agricultural lending risks. In its fourth part, the book explores analytics and data mining in the retail context. In the fifth part, the book presents some applications of analytics to operations management. This part has chapters related to improvement of furnace operations, forecasting food indices and analytics for improving student learning outcomes. The sixth part has contributions related to adaptive designs in clinical trials, stochastic comparisons of systems with heterogeneous components and stacking of models. The seventh and final part contains chapters related to finance and economics

topics, such as role of infrastructure and taxation on economic growth of countries and connectedness of markets with heterogenous agents, The different themes ensure that the book would be of great value to practitioners, post-graduate students, research scholars and faculty teaching advanced business analytics courses.
