Realms of Royalty Christina Jordan, Imke Polland, 2020-03-31 Monarchies are facing public demands for modernization and adapting to changing societal, political, and media environments. This book proposes new directions in the research of contemporary European monarchies and offers innovative perspectives on trans/national royal public interactions and (semi-)fictional representations of monarchs. Its case studies address historic and recent developments, including newly invented royal traditions, media depictions, Meghan Markle's impact on the image of the British monarchy, and the royal family's role in Brexit negotiations. With its interdisciplinary analyses, the book reflects current academic, societal, and popular cultural interest in royalty.

Penne for Your Thoughts Simone C. Greene, 2022-11-03 *Penne for Your Thoughts* is a cookbook full of information to help one understand the difference between food allergy and food intolerance as well as provoke thoughts on nutrition. Many of the wide array of recipes are typical everyday dishes converted to be free from common allergens--such as wheat gluten, casein (dairy), soy, corn, egg, and nuts--by substituting various ingredients for more natural/organic allergy-safe ingredients. It is designed so one can draw from it what they need. The reality is that there are a lot of people that have food allergies/intolerances. Many have multiple sensitivities and do not realize it. The real challenge is trying to eliminate common allergens because they are everywhere. Based on a person's level of sensitivity, a reaction can be mild to severe, or even life-threatening. For many, it is not possible to buy french fries at the food court, snack on cheeseballs while on a playdate, or sit beside someone else eating peanut butter. This is not just another gluten-free cookbook. It is a map of a mom's journey, where through perseverance she stayed the course and found ways to make life better for her son. At first, the goal was just to make gluten-free pancakes and bread. However, throughout the process, she found grocery shopping frustrating since many gluten-free items were not corn-free. If it were dairy-free, it was not soy-free. If it were nut-free, it was still manufactured in a facility that processed gluten, dairy, soy, nuts, etc. Quickly she found gluten-free flour very different from regular flour and that eliminating dairy and eggs would also be challenging. As a result of her determination and willpower, *Penne for Your Thoughts* is hereby presented to you with Max's favorite shaped pasta, a whole array of information, and recipes to ponder.

Saving Life M. Lynn Lamoreux PhD, 2021-05-23 This book is about achieving a viable future

within the Biological system of the Living Earth for the generations of humans yet to come. If that is what we decide to do. LIFE itself is an emergent manifestation of a balanced, collaborative Biosystem, and climate change is real - as real as the pandemic — and both are aspects of the same human Problem. The sustainable solution for that Problem is to re-build our human social system so that it is embedded within a human world view that honors the survival needs of LIFE. To do that, we must understand what the Biosystem is and what it requires for its survival. Just as our physiology must maintain its balance in order to sustain its life, so the entire Biosystem must maintain its balance in order to sustain the whole of LIFE. Our current human social system (the corposystem) is operating under a faulty interpretation of the naive and inaccurate meme, "Survival of the Fittest." The corposystem is using its powerful technologies to fight against the Biosystem. It won't work. No matter how hard we try. Dr. Lynn Lamoreux is a pioneer in the biology and genetics of pigmentation and of minorities in research science; a retired teacher of large basic biology classes and of individual graduate students; and a "Chaplain" to the Biosystem.

Branding Television Catherine Johnson, 2012-03-12 Branding Television examines why and how the UK and US television industries have turned towards branding as a strategy in response to the rise of satellite, cable and digital television, and new media, such as the internet and mobile phone.

This is the first book to offer a sustained critical analysis of this new cultural development. Branding Television examines the industrial, regulatory and technological changes since the 1980s in the UK and the USA that have led to the adoption of branding as broadcasters have attempted to manage the behaviour of viewers and the values associated with their channels, services and programmes in a world of increased choice and interactivity. Wide-ranging case studies drawn from commercial, public service, network and cable/satellite television (from NBC and HBO to MTV, and from BBC and Channel 4 to UKTV and Sky) analyse the role of marketing and design in branding channels and corporations, and the development of programmes as brands. Exploring both successful and controversial uses of branding, this book asks what problems there are in creating television brands and whether branding supports or undermines commercial and public service broadcasting. Branding Television extends and complicates our understanding of the changes to television over the past 30 years and of the role of branding in contemporary Western culture. It will be of particular interest to students and researchers in television studies, but also in creative industries and media and cultural studies more generally.
