My Neighbor is CEO Xiang Xiang,2019-11-28 Was this a mutual enmity? The brother next door who always liked to bully her was actually the CEO of a new company! **Badass: Making Users Awesome** Kathy Sierra,2015-01-29 Note for ebook customers: The design and layout of this book play a key role in conveying the author's message. When creating the ebooks, we've tried to keep the look and feel of the print edition, but this means that not all e-reading devices will support the files. The EPUB format is optimized for iPad. The Mobi files are optimized for Kindle Fire tablets and phones and for Kindle reading apps. Imagine you're in a game with one objective: a bestselling product or service. The rules? No marketing budget, no PR stunts, and it must be sustainably successful. No short-term fads. This is not a game of chance. It is a game of skill and strategy. And it begins with a single question: given competing products of equal pricing, promotion, and perceived quality, why does one outsell the others? The answer doesn't live in the sustainably successful products or services. The answer lives in those who use them. Our goal is to craft a strategy for creating successful users. And that strategy is full of surprising, counter-intuitive, and astonishingly simple techniques that don't depend on a massive marketing or development budget. Techniques typically overlooked by even the most well-funded, well-staffed product teams. Every role is a key player in this game. Product development, engineering, marketing, user experience, support—everyone on the team. Even if that team is a start-up of one. Armed with a surprisingly overlooked science and a unique POV, we can reduce the role of luck. We can build sustainably successful products and

services that rely not on unethical persuasive marketing tricks but on helping our users have deeper, richer experiences. Not just in the moments while they're using our product but, more importantly, in the moments when they aren't.

A New Practical Primer of Literary Chinese Paul Rouzer,2020-03-23 Forty lessons designed to introduce beginning students to the basic patterns and structures of Classical Chinese are taken from a number of pre-Han and Han texts selected to give students a grounding in exemplary Classical Chinese style. Two additional lessons use texts from later periods to help students appreciate the changes in written Chinese over the centuries.Each lesson consists of a text, a vocabulary list featuring discussions of meaning and usage, explanations of grammar, and explications of difficult passages. The standard modern Chinese, Japanese, and Korean pronunciations are indicated for each character, making this a learning tool for native speakers of those languages as well.Appendices give suggestions for further readings, review common and significant words, explain the radical system, and provide Japanese kanbun readings for all the selections. Glossaries of all vocabulary items and pronunciation indexes for modern Chinese and Korean are also included.
