Application of Social Media in Crisis Management Babak Akhgar, Andrew Staniforth, David Waddington, 2017-03-27 This book explores how social media and its advances enables citizens to empower themselves during a crisis. The book addresses the key issues related to crises management and social media as the new platform to assist citizens and first responders dealing with multiple forms of crisis, from major terrorist attacks, larger scale public disorder, large-scale movement of people across borders, and natural disasters. The book is based on the results and knowledge gained during the European Commission ATHENA project which has been addressing critical issues in contemporary crisis management and social media and smart mobile communications. This book is authored by a mix of global contributors from across the landscape of academia, emergency response and experts in government policy and private industry. This title explores and explains that during a modern crisis, the public self-organizes into voluntary groups, adapt quickly to changing circumstances, emerge as leaders and experts and perform life-saving actions; and that they are increasingly reliant upon the use of new communications media to do it.

Organizational Compliance and Ethics Babak Boghraty, 2023 Casebook designed to impart a foundational understanding of the compliance and ethics field, and the tools to manage legal risk in various commercial contexts and industries--

The Nativist Prophets of Early Islamic Iran Patricia Crone, 2012-06-28 Patricia Crone's latest book is about the Iranian response to the Muslim penetration of the Iranian countryside, the revolts subsequently triggered there, and the religious communities that these revolts revealed. The book also describes a complex of religious ideas that, however varied in space and unstable over time, has demonstrated a remarkable persistence in Iran across a period of two millennia. The central thesis is

that this complex of ideas has been endemic to the mountain population of Iran and occasionally become epidemic with major consequences for the country, most strikingly in the revolts examined here, and in the rise of the Safavids who imposed Shi'ism on Iran. This learned and engaging book by one of the most influential scholars of early Islamic history casts entirely new light on the nature of religion in pre-Islamic Iran, and on the persistence of Iranian religious beliefs both outside and inside Islam after the Arab conquest.

Untrapped Value: 1.01 Software Reuse Powering Future Prosperity Dave R. Erickson, 2023-03-25
Mankind has invested vast resources (time, manhours, computer machinery sunk costs, maintenance, building space, heating, venting, cooling, and so on) into software for all kinds of digital and analog hardware for over sixty years. Far longer if you consider punched cards, and so on. In the end, most of the source code ends in the waste heap of history. Old code gets forgotten, rub-bished, and a new wave of developers is forced to recreate new versions of old ideas. People get promoted, graduate from college, and leave to get married; before they do they don't have time, don't believe in the priority, and don't place the code where others can find it to make an important curation of their software; and by this donate it to future generations, worldwide, the society at large. If organizations, at the other end of the spectrum, would realign software for a legacy of centuries instead of product runs, mankind can preserve the sunk costs, speed up advancement, and make software impact far wider when it's made in a reusable form. People move to a new job, and remake linked lists, factory classes, or ring buffers in the new language of the day, or within the design paradigm of the latest fad management. It's kind of insane when you think about it, people spend many years getting a consumer product working, finely tuned and profitable. Then two companies merge, product lines are unified or obsoleted, and some or all of the intellectual property

gets forgotten in a corner as one team is merged and the others retire to golf, or the pool. While filling in cardboard boxes of stuff as they leave, does anyone drag out the old tapes and floppies to make sure the new guys aren't starting by reinventing the wheel?

e-Services Alfredo M. Ronchi, 2019-04-17 This book explores various e-Services related to health, learning, culture, media and the news, and the influences the Web and related technologies have had and continue to have in each of these areas, both on service providers and service users. It provides insights into the main technological and human issues regarding healthcare, aging

population, recent challenges in the educational environment, the impact of digital technologies on culture and heritage, cultural diversity, freedom of expression, intellectual property, fake news and, last but not least, public opinion manipulation and ethical issues. Its main aim is to bridge the gap between technological solutions, their successful implementation, and the fruitful utilization of the main set of e-Services mostly delivered by private or public companies. Today, various parameters actively influence e-Services' success or failure: cultural aspects, organisational and privacy issues, bureaucracy and workflows, infrastructure and technology in general, user habits, literacy, capacity or merely interaction design. This includes having a significant population of citizens who are willing and able to adopt and use online services; as well as developing the managerial and technical capability to implement applications that meet citizens' needs. This book helps readers understand the mutual dependencies involved; further, a selection of success stories and failures, duly commented on, enables readers to identify the right approach to innovation in areas that offer the opportunity to reach a wide audience with minimal effort. With its balanced humanistic and technological approach, the book mainly targets public authorities, decision-makers, stakeholders, solution developers, and graduate students.
