Shape your child's understanding of the world of finance. Add this book to your child's collection today!

Child Millionaire: Stock Market Investing for Beginners - How to Build Wealth the Smart Way for Your Child - The Basic Little Guide Alex Nkenchor Uwajeh, This is a Basic Guide to Investing in the Stock Market - For Beginners. The primary reason so many parents don't do anything about setting up their children's financial future is simply because they don't know where to start. Our schooling system doesn't focus on teaching students how to create wealth. Kids also aren't taught to save money or to work on a budget. Those lessons are left to parents to teach their kids as they grow up. Now imagine if you purchased one new stock for your child's portfolio each year and saw that same kind of growth over the years. Over time, the value of the entire portfolio should increase simply due to the rise in share values. The initial investment from you should be relatively small, but the value to your child's financial future could be enormous. By the time you finish this book, you'll also see there are other things you can do to increase your child's investment portfolio with very little extra effort from you. Sleeping Like a Baby John C. Hudelson,1998 Sleeping Like a Baby starts by taking a good look at the basics of stock market investing, and why the system works as it does. It then moves on to what makes up a balanced portfolio, and how to create the ideal portfolio depending on age, current financial situation, goals, and interests. From there, the reader discovers what mutual funds, bonds, and the myriad of trading strategies available are really good for. Perhaps the greatest strength of Sleeping Like a Baby is that it teaches readers how to hedge investments for risk elimination with 100% upside potential.

Investing in Your Child's Future Nicola Field,2016-05-12 Most parents dream of giving their children the best possible education. However an education - primary, secondary and tertiary - costs money. Parents of a child born in 2006 can pay approximately \$250K for a child's lifetime education according to the latest research from the Australian Scholarships Group. And costs are constantly on the rise. Investing in Your Child's Future is aimed at parents and future parents, grandparents and other family members, and covers children's education from pre-school to tertiary studies. It is designed to show readers how they can secure and contribute to their children's future and can benefit from a higher education at the institution of their choice, without sacrificing their lifestyle or financial security, and regardless of their income. Investing in Your Child's Future shows readers how they can finance all, or some, of their children's education by planning ahead, implementing simple strategies and saving money as early and as regularly as possible. When your children are young, it's easy to delay funding their education as it is not an immediate expense. However, education is a major expense, regardless of whether you choose a private or public education, and the sooner you start saving, the more money you will accumulate, and the sooner you can stop worrying about your child's future.

Babies Are Like Cankercworms Opeoluwa John Mesonrale,2019-10-14 I really did dislike spending all my productive energy and earnings on sustaining/raising 'my children'. Call me a bad parent, I don't care. Am facing my giants and calling them what they really are cankerworms.Who would like the screeching cry of a spoilt little baby, waking you by 2am or get your Friday night stolen, because of football practice and play rehearsals? They steal your time, life, hard earned money and the attention of your spouse. And what do you get in return; debt & bank loans, tired eyes, old age, ungrateful teenage snubs who run off leaving the house and your heart empty.Follow Ope's journey on how to save yourself from ruining your life, while trying to be a successful parent.

The Pig and the Python David Cork,Susan Lightstone,1998 An engaging look at how baby boomer demographics are redefining America's economic landscape and how people can use this knowledge to create personal wealth, this story reveals the formula for financial success: watch the baby-boom bulge as it works its way through the python of our economy--and capitalize on it.

An Investment Framework for Nutrition Meera Shekar,Jakub Kakietek,Julia Dayton Eberwein,Dylan Walters,2017-04-24 An Investment Framework for Nutrition: Reaching the Global Targets for Stunting, Anemia, Breastfeeding, and Wasting estimates the costs, impacts, and financing scenarios to achieve the World Health Assembly global nutrition targets for stunting, anemia in women, exclusive breastfeeding and the scaling up of the treatment of severe wasting among young children. To reach these four targets, the world needs US\$70 billion over 10 years to invest in high-impact nutrition-specific interventions. This investment would have enormous benefits: 65 million cases of stunting and 265 million cases of anemia in women would be prevented in 2025 as compared with the 2015 baseline. In addition, at least 91 million more children would be treated for severe wasting and 105 million additional babies would be exclusively breastfed during the first six months of life over 10 years. Altogether, achieving these targets would avert at least 3.7 million child deaths. Every dollar invested in this package of interventions would yield between US\$4 and US\$35 in economic returns, making investing in early nutrition one of the best value-for-money development actions. Although some of the targets—especially those for reducing stunting in children and anemia in women—are ambitious and will require concerted efforts in financing, scale-up, and sustained commitment, recent experience from several countries suggests that meeting these targets is feasible. These investments in the critical 1000-day window of early childhood are inalienable and portable and will pay lifelong dividends—not only for children directly affected but also for us all in the form of more robust societies—that will drive future economies.

From Cradle to Retirement Christopher Carosa,Christopher Carosa, MBA, CTFA,2018-03-12 The Child IRA is like combining the power of compounding of a 401k plan with the flexible contributions allowed by a 529 plan. While briefly exploring the historic attitudes of America regarding retirement policy, From Cradle to Retirement focuses on explaining the concept of The Child IRA. Through real-life case studies, it demonstrates how families are today establishing IRAs for their minor children. The book contains interviews with people within industries that regularly employ minor children – including newborn babies (hint: think –advertising–) to give parents some idea as to what their children might be able to do in order to establish a Child IRA. It even shows how to –catch-up– if you didn't start a Child IRA the first year your child was born (including what needs to be done if they start as late as college graduation). Finally, From Cradle to Retirement addresses what types of policy changes might make The Child IRA more accessible to a greater number of families – and how it might just save Social Security.
