Time-Dependent Reliability Theory and Its Applications Chun-Qing Li, Wei Yang, 2022-10-28 Time-Dependent Reliability Theory and Its Applications introduces the theory of time-dependent reliability and presents methods to determine the reliability of structures over the lifespan of their services. The book contains state-of-the-art solutions to first passage probability derived from the theory of stochastic processes with different types of probability distribution functions, including Gaussian and non-Gaussian distributions and stationary and non-stationary processes. In addition, it provides various methods to determine the probability of failure over time, considering different failure modes and a methodology to predict the service life of structures. Sections also cover the applications of time-dependent reliability to prediction of service life and development of risk cost-optimized maintenance strategy for existing structures. This new book is for those who want to know how to predict the service life of a structure (buildings, bridges, aircraft structures, etc.) and how to develop a risk-cost, optimized maintenance strategy for these structures. Presents the basic knowledge required to predict service life and develop a maintenance strategy for infrastructure Explains how to predict the remaining safe life of the infrastructure during its lifespan of operation Describes how to carry out maintenance for an infrastructure to ensure its safe and serviceable operation during the designed service life

Chinese Combatives: An Anthology Michael DeMarco, 2020-09-15 According to traditional Chinese martial arts custom, instruction in the lethal arts were transmitted under strict secrecy. At the turn of the twentieth century, the martial arts had started to be taught publically with a focus on health. However, many fighting techniques were not shown or taught. As a result, today some systems are more well-known than others. This anthology brings together some of the lesser-known arts in one volume and some aspects of their theory, application, and place in society. The first two chapters by Shannon Phelps give a wonderful presentation of the Fu family Wudang arts—including the unique sixiangquan, a blending of liangyiquan, baguazhang, xingyiquan, and taijiquan under the genius of Fu Zhensong (1872-1953) and family. Dr. Daniel Amos authored the next two chapters reflecting his studies of Southern Praying Mantis. His first-hand experience and scholarly background offered him a special view as an insider into the social aspects involving the practitioners. These include association with criminal associations, spirit possession for fighting application and protection, and the changing relationships within the “gongfu family.” Chapters 5, 6 and 7 cover important concepts and practices of baijiquan and piguzhang as transmitted by Li Suwen (1864-1934) and brought to Taiwan by Liu Yunqiao (1909-1990). The authors stress the importance of fundamental training methods, starting from the static horse stance, to dynamic changing stances while incorporating various techniques performed with explosive issuing energy (fajing). Of particular interest for many will be the sections dealing with big spear (daqiang) training. The final chapter provides a comprehensive overview of tongbei boxing history, styles, and principles, including special highlights of the White Ape system. The authors emphasize the traditional mindset, inner feelings, and overall fighting spirit needed to train the real high-level skills. Training methods and sample applications bring life to tongbei theory. By providing great detail on the styles presented—along with associations with other noted styles and masters—this special anthology is an important reference for any interested in Chinese martial arts. I personally thank the authors for sharing their exceptional work.
