Better Ventures Jennifer M. Walske, Laura D'Andrea Tyson, 2017 This case centers on BV as it seeks to raise \$20 million for its first standalone fund between 2014 and 2016. Wes Selke and Rick Moss, the two BV co-founders, had built their experience in impact investing when they founded and managed Hub Ventures (HV) (a smaller accelerator-type fund of \$500,000) immediately prior to founding BV. Encouraged by the economic return and social impact from those early-stage, mission-driven HV investments, both Selke and Moss decided in late 2014 to raise a separate and much larger fund called Better Ventures Fund II (BVFII). This new fund would allow BV to make larger initial investments in its early stage portfolio companies and provide the needed capital to make add-on investments in subsequent financing rounds. The case discusses the challenges of raising capital for this new fund as well as BV's investment and impact theses, deal sourcing, and post-investment approach. The case eventually explores the next steps for BV, after successfully raising this first-time fund.

The Political Economy of Distributism Alexander William Salter, 2023-05-19 In recent years, prominent scholars, public intellectuals, and politicians have advocated reforming America's economic model to embrace "common-good capitalism." Catholic social teaching is a major influence on this movement. Is common-good capitalism compatible with the historical American commitments to private property rights and ordered liberty? What resources from Catholic social teaching can help orient free enterprise towards the common good? This book is the first scholarly inquiry into these exciting new questions. We can better understand common-good capitalism by exploring the political economy of distributism. Formulated in the early 20th century by prominent Catholic intellectuals such as Hilaire Belloc and G.K. Chesterton, distributism emphasizes the importance of widely dispersed property ownership for human flourishing. Distributist thinkers, opposed both to capitalism and socialism, sought a humane approach to politics and economics that reflected the truths of Catholic social teaching. Some of the distributists' claims about markets and government must be revised in light of contemporary social science. Nevertheless, their political-economic vision contains profound truths about the human condition, which social scientists would be unwise to ignore. Distributism's insights about the nature of liberty and the social foundations of human dignity can improve ongoing conversations among economists, political scientists, and philosophers. The Political Economy of Distributism explores distributism both as a research program and a blueprint for political-economic reform. As many are reconsidering the relationship between markets and government, this timely book demonstrates the perennial relevance of the Catholic intellectual tradition to public affairs. Academics, public servants, policy experts, and concerned

citizens can all benefit from this timely study of common-good capitalism's prospects.

The scope of the book ranges from capital for entrepreneurs who have little more than an idea, to capital for top rated companies.
