Everyday Woodworking Rex Krueger, 2021-06-15 Get started with simple, useful, handcrafted woodworking projects for everyday people—with only 12 basic tools! Lots of people want to try woodwork, but they get intimidated by dangerous power tools and difficult techniques. Good news: there are lots of ways to work with wood and anyone can get a few tools and start making projects. *Everyday Woodworking* starts at the very beginning—with wood. How can this common material make everything from furniture to houses? What makes it so strong? Why does it break? More importantly, what can you do to a piece of wood? Sometimes we cut it with a saw. Other times, we split it with an ax or shave it with a knife. This book explains why we choose each tool and how to pick the right cut

for any project. As Rex likes to say: Trust me, it's not hard. Once you get a few tools and learn some simple techniques, you'll start making things right away. You'll begin with a simple mallet and some wooden wedges and then advance to splitting green logs into usable lumber. Next you'll pick up a knife and a drill and after just a little practice, you'll be making things you can give to your friends; things they'll actually use: A wooden butter knife A desk organizer A few pieces of sturdy furniture Sawhorses A small workbench Each project is shown step-by-step with the beginner in mind. The projects are simple but not primitive. Everyday Woodworking will give you skills that you can build on as you grow as a craftsman.

Hybrid Woodworking Marc Spagnuolo, 2013-12-11 A faster route to handcrafted results! In the last few years, there's been a push to return to the roots of woodworking when every step was done with hand tools--from resawing lumber and planing it flat, to cutting joints and creating profiles. Working this way can produce beautiful results, but is it the best method for woodworking in the 21st century? In Hybrid Woodworking, author and Internet woodworking star Marc Spagnuolo offers a more efficient approach that combines the strength of power-tool and hand-tool techniques. The end result: You save time and effort while producing furniture that still has that stunning handmade look. The Hybrid System Hybrid Woodworking will show you which machines and power tools are best for the grunt work of furniture making. It will explain which hand tools are essential for fine-tuning. And best of all, it will demonstrate techniques for working flawlessly and efficiently with every machine and tool in your shop. Making beautiful furniture can be immensely gratifying. By adopting the hybrid woodworking system you can get to that satisfying end result with less effort while enjoying every step along the way.
