Handbook on Data Centers Samee U. Khan, Albert Y. Zomaya, 2015-03-16 This handbook offers a comprehensive review of the state-of-the-art research achievements in the field of data centers. Contributions from international, leading researchers and scholars offer topics in cloud computing, virtualization in data centers, energy efficient data centers, and next generation data center architecture. It also comprises current research trends in emerging areas, such as data security, data protection management, and network resource management in data centers. Specific attention is devoted to industry needs associated with the challenges faced by data centers, such as various power, cooling, floor space, and associated environmental health and safety issues, while still working to support growth without disrupting quality of service. The contributions cut across various IT data technology domains as a single source to discuss the interdependencies that need to be supported to enable a virtualized, next-generation, energy efficient, economical, and environmentally friendly data center. This book appeals to a broad spectrum of readers, including server, storage, networking, database, and applications analysts, administrators, and architects. It is intended for those seeking to gain a stronger grasp on data center networks: the fundamental protocol used by the applications and the network, the typical network technologies, and their design aspects. The Handbook of Data Centers is a leading reference on design and implementation for planning, implementing, and operating data center networks.

A Garden for the Rusty-Patched Bumblebee Lorraine Johnson, Sheila Colla, 2022-05-21 Support biodiversity with this practical guide to creating habitat gardens for native pollinators in Southern Ontario. Saving the bees is an environmental cause that resonates deeply with Canadians. While much of the popular focus is on honeybees, an introduced species, many people are largely unaware of the importance of native bees. These pollinators are of crucial importance and are threatened by climate change, habitat loss and fragmentation, and disease and competition from non-native species and modern intensive agriculture. *A Garden for the Rusty-Patched Bumblebee* provides all the information needed for gardeners to take action to support and protect pollinators—by creating habitat in yards and communal spaces, and on balconies and rooftops. There are approximately 400 species of native bees in Ontario, including bumblebees, sweat bees, mining bees, cuckoo bees, leafcutter bees and cellophane bees. This book introduces and deepens the concept of pollinator gardening—creating gardens that help bees thrive—by exploring specialist relationships. For example, the native-to-Ontario sweat bee *Lasioglossum oenotherae* specializes in pollen from the native evening primrose plant. With plant recommendations specific to Southern Ontario, as well as useful garden designs and numerous tips for success, this compact, full-colour guide will enable gardeners to discover the crucial connections between native plants and native pollinators—and learn how to cultivate their own patch of pollinator paradise.

Horse Feeding and Management Markku Saastamoinen, 2020-04-30 Horses perform variety of roles in our society, serving people in several ways. Proper nutrition and feeding management are some of the main objectives to ensure the well-being and performance of horses. Thus, the link between equine health and good dietary treatment must be recognized to increase our understanding of the needs of the horse. It is important to ensure science-based knowledge is available to all stakeholders and people working in the horse industry. This book presents research papers published in the Special Issue of *Animals* entitled 'Horse Nutrition and Management'.

Empire's Ally Gregory Albo, Jerome Klassen, 2013-01-01 The war in Afghanistan has been a major policy commitment and central undertaking of the Canadian state since 2001: Canada has been a leading force in the war, and has spent hundreds of millions of dollars on aid and reconstruction. After a decade of conflict, however, there is considerable debate about the efficacy of the mission, as well as calls to reassess Canada's role in the conflict. An authoritative and strongly analytical work, *Empire's Ally* provides a much-needed critical investigation into one of the most polarizing events of our time. This collection draws on new primary evidence — including government documents, think tank and NGO reports, international media files, and interviews in Afghanistan — to provide context for Canadian foreign policy, to offer critical perspectives on the war itself, and to link the conflict to

broader issues of political economy, international relations, and Canada's role on the world stage. Spanning academic and public debates, *Empire's Ally* opens a new line of argument on why the mission has entered a stage of crisis.

It features 198 species of butterflies (and common moths) organized by color for ease of use. Detailed photographs present the species as you'll see them in nature, and a "compare" feature helps you to decide between look-alikes. Inside you'll find: 198 species: Butterflies and common moths Simple color guide: See a butterfly with prominent blue? Go to the blue section Jaret's Notes: Naturalist tidbits and facts Professional photos: Crisp, stunning images The information is applicable to Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. So grab the *Butterflies of the Midwest Field Guide* for your next hike, walk in the park, or visit to your garden—to help ensure that you positively identify the butterflies that you see.

Building Sanctuary Jessica Squires, 2013 Canada enjoys a reputation as a peaceable kingdom. Yet during the Vietnam War era, Canadians met American war resisters not with open arms but with political obstacles and public resistance, and the border remained closed to what were then called draft dodgers and deserters. Between 1965 and 1973, a small but active cadre of Canadian antiwar groups and peace activists launched campaigns to open the border. Jessica Squires tells their story, often in their own words, bringing to light how these men and women shaped Canadian immigration policy, Canadian identity, and the course of Canadian-American relations in their quest to transform Canada into a refuge from militarism.

Time and Globalization Paul Huebener, Susie O'Brien, Tony Porter, Liam Stockdale, Yanqiu Rachel Zhou, 2018-11-09 Both academic and popular representations of globalization, critical or celebratory, have tended to conceptualize it primarily in spatial terms, rather than simultaneously temporal ones. However, time, in both its ideational and material dimensions, has played an important role in mediating and shaping the directions, courses, and outcomes of globalization. Focusing on the intersection of time and globalization, this book aims to create an interdisciplinary dialogue between the (largely separated) respective literatures on each of these themes. This dialogue will be of both theoretical and empirical significance, since many urgent issues of contemporary human affairs—from large epochal problems such as climate change, to everyday struggles with the dynamics of social acceleration—involve a complex interplay between temporality and globalization. A critical understanding of the relationship between time and globalization will not only facilitate innovative thinking about globalization; it will also foster our imagination of alternatives that may lead to more socially just and sustainable futures. This innovative collection illustrates the theoretical benefits of bridging time with globalization and also exemplifies the methodological strengths of engaging in cutting-edge, interdisciplinary scholarship to better understand the changing economic, social, political, cultural and ecological dynamics in this globalizing world. This book was originally published as a special issue of the journal *Globalizations*.

Quiet No More Joel D. Harden, 2013-09-18 Spontaneous and creative protest movements have burst onto the political stage in Canada and around the world. Joel D. Harden, an activist, writer, and educator, offers a ground-level account of the most important of these recent expressions of large-scale political engagement, mostly by young people. Based on first-hand accounts from many of the participants and organizers, Harden describes key events and turning-points -- in Canada and beyond -- from the viewpoint of a committed insider. Harden believes that these new bottom-up movements are the most challenging and effective agent of political change on the scene today,

galvanizing people to express their views actively in the streets and parks or in their workplaces. The political and corporate power structure has been shaken by these challenges, sometimes enough to generate real political change. Political analysts, journalists and academics have not yet come to terms with this new activism. Harden briefly reviews theories that fail to capture its essence and those that come close to getting it. In a concluding chapter addressed to students and participants in these social movements he offers his own take on a movement-relevant theory informed by his own considerable experience as a widely respected Canadian activist. This book offers new thinking about how ordinary citizens -- particularly young people -- have started to take back power in our democracy and change the world.

Who is Responsible? Canada. Commission of Inquiry into the Sponsorship Program and Advertising Activities, John Howard Gomery, 2005 This is the report of the commission of inquiry (known as the Gomery Commission) into federal sponsorship & advertising programs that began in 1994-95 in the advertising section of Public Works & Government Services Canada. The introduction provides background on the inquiry process and the programs. Part 2 summarizes the 2003 report of the Auditor General that revealed problems in the government's handling of the sponsorship program, where the government financially assisted cultural & community events in exchange for the sponsored organization's providing visibility for the federal government. Part 3 reviews the structure, organization, & operation of the federal government, including discussion of ministerial responsibility. Part 4 reviews the origins of the sponsorship program. Parts 5 to 8 contain findings regarding the selection of advertising & communication agencies, the administration of the sponsorship program, the audits carried out of the organizations handling the government's advertising activities & sponsorships, and the involvement of the Royal Canadian Mounted Police and Crown corporations in the sponsorship program. Parts 9 to 14 focus on the activities of various persons involved in the sponsorship & advertising contracts entered into with the federal government. Part 15 examines the activities of the director of the Public Works advertising section after his retirement. The final part draws conclusions about assigning responsibility for identified irregularities & misconduct. Appendices include an index of names, a chronology of events, a copy of the Auditor General's 2003 report, a schedule of witnesses, and commission rulings.

The 70 revised full papers presented were carefully reviewed and selected from 261 submissions. The papers are organized in 16 topical sections: support tools and environments; performance prediction and evaluation; scheduling and load balancing; high-performance architectures and compilers; parallel and distributed data management; grid, cluster and cloud computing; peer-to-peer computing; distributed systems and algorithms; parallel and distributed programming; parallel numerical algorithms; multicore and manycore programming; theory and algorithms for parallel computation; high performance networks and communication; high performance and scientific applications; GPU and accelerator computing; and extreme-scale computing.

Cartesian CFD Methods for Complex Applications Ralf Deiterding, Margarete Oliveira Domingues, Kai Schneider, 2021-04-03 This volume collects the most important contributions from four minisymposia from ICIAM 2019. The papers highlight cutting-edge applications of Cartesian

CFD methods and describe the employed algorithms and numerical schemes. An emphasis is laid on complex multi-physics applications like magnetohydrodynamics, combustion, aerodynamics with fluid-structure interaction, solved with various discretizations, e.g. finite difference, finite volume, multiresolution or lattice Boltzmann CFD schemes. Software design aspects and parallelization challenges are also considered. The book is addressed to graduate students and scientists in the fields of applied mathematics and computational engineering.
