Propaganda in the Helping Professions Eileen Gambrill,2012-02-20 This incisive look at how propaganda has infiltrated the helping professions is essential reading for social workers, psychologists, and other helping professionals, and is an excellent supplement to courses on critical thinking and introduction to practice.

Entering the Behavioral Health Field Diane Suffridge,2016-04-28 This text provides new clinicians with an overview of the tasks involved in behavioral health treatment as it is practiced in community-based training organizations. The text's specific focus is on the application of theoretical and academic knowledge to clinical work as a psychotherapist or case manager, with a case example that follows treatment from the first session through termination. It contains an overview of all aspects of treatment that are required in these organizations, which are the primary settings for practicum, internship, and post-graduate training.

International Perspectives on Workforce Education and Development Jay W. Rojewski,2004-12-01 Development of this text has been based on the notion that workforce education and development (WFED) systems—such as, secondary and postsecondary vocational and technical education (VTE), career education and guidance, human resource and organizational development (HROD), and adult training and retraining including literacy programs—have essential roles to play in supporting both individual and national efforts to successfully participate in and reap the benefits offered by globalization. While this assumption has intuitive appeal, not everyone believes that vocational preparation programs result in positive outcomes. Psacharopoulos (1997), an outspoken international critic of vocational education and training, argues that WFED programs often have a low rate of return on a country's investment when compared to that of the general academic curriculum. He contends that WFED initiatives often fail because too much emphasis is placed on these efforts to address myriad complex issues, and that decision makers do not utilize the available evidence about VTE to make prudent, informed choices. Instead, major players in the global economy like the World Bank tout basic academic education as an essential priority for developing countries wanting to enter into global markets and exchange.

Ending the Struggle Against Yourself Stan Taubman,1994-10-26 The mantra of self-esteem has by now reached us all: we hear that we should focus on our positive aspects and discover our hidden potential for greatness. Unfortunately, however, we live in the real world, and our imperfections do not go away just because we wish them to. Ending the Struggle Against Yourself takes us to the core of true self-esteem: deep confidence. This confidence can be seen in those fortunate few who have fully accepted the realities of their existence and have learned to integrate both their limitations and their potential into their entire being. With exercises, activities, and personal stories, this powerful workbook will show you how to face self-doubt squarely and, by learning its lessons, make it work for you instead of against you.
