Conventional business wisdom views innovation as the biggest advantage startups have over large, established organizations, often referred to as legacy organizations. This book helps leaders to: Incorporate proven strategies and research-based information into your organization's overall innovation initiatives Use new technologies to improve processes and increase innovation Learn to capitalize on your organization's existing resources to beat startups at their own game Transform innovative concepts into specific products, services, and business models Reinvent your organization to overcome disruptions in the market and challenges from new competitors *Transforming Legacy Organizations: Turn your Established Business into an Innovation Champion to Win the Future* is a valuable resource for leaders of established companies such as C-Suite executives, senior managers, and heads of business development, innovation, and digital teams.

The Four Tendencies Gretchen Rubin, 2017-09-12 NEW YORK TIMES BESTSELLER • Are you an Upholder, a Questioner, an Obliger, or a Rebel? From the author of *Better Than Before* and *The Happiness Project* comes a groundbreaking analysis of personality type that “will immediately improve every area of your life” (Melissa Urban, co-founder of the Whole30). During her multibook investigation into human nature, Gretchen Rubin realized that by asking the seemingly dry question “How do I respond to expectations?” we gain explosive self-knowledge. She discovered that based on their answer, people fit into Four Tendencies: • Upholders meet outer and inner expectations readily. “Discipline is my freedom.” • Questioners meet inner expectations, but meet outer expectations only if they make sense. “If you convince me why, I’ll comply.” • Obligers (the largest Tendency) meet outer expectations, but struggle to meet inner expectations—therefore, they need outer accountability to meet inner expectations. “You can count on me, and I’m counting on you to count on me.” • Rebels (the smallest group) resist all expectations, outer and inner alike. They do what they choose to do, when they choose to do it, and typically they don’t tell themselves what to do. “You can’t make me, and neither can I.” Our Tendency shapes every aspect of our behavior, so using this framework allows us to make better decisions, meet deadlines, suffer less stress, and engage more effectively. It’s far easier to succeed when you know what works for you. With sharp insight, compelling research, and hilarious examples, *The Four Tendencies* will help you get happier, healthier, more productive, and more creative.

Patients and Caregivers as Developers of Medical Devices Moritz Göldner, 2021-02-23 Moritz Göldner analyzes the unexplored phenomenon of patients and caregivers as innovators with respect to their own unmet medical needs in two complementary studies. In study 1 he uses a mixed-method approach to analyze quantitative data from two datasets on more than 1,100 medical smartphone apps each and qualitative data from 16 interviews with developers of medical apps. He finds substantial evidence that patients and caregivers develop medical apps and shows that those apps receive significantly better ratings than company-developed apps. In study 2 he further explores the commercialization activities of patients and caregivers by analyzing 14 case studies of patients and caregivers who successfully brought their tangible medical device on the market. He finds that those innovators did not maximize their profits, but rather sought to market their devices at reasonable prices to offer access to many other patients. The author discusses these insights and draws conclusions for scholars and managers that are valid beyond this extreme case of user innovation. About the author Moritz Göldner is an innovation consultant for user-centered innovation in (digital) healthcare. Prior to this position, he was a project manager and research associate at the Institute for Technology and Innovation Management at Hamburg University of Technology. His research interests cover user innovation in healthcare, social innovation, the emergence of new medical technologies, as well as entrepreneurship.

The Triumvirate Approach to Systems Engineering, Technology Management and Engineering Management Thomas J. Day,2022-01-31 This text is meant for introductory and midlevel program and project managers, Systems Engineering (SE), Technology Management (TM) and Engineering Management (EM) professionals. This includes support personnel who underpin and resource programs and projects. Anyone who wishes to understand what SE, TM and EM are, how they work together, what their differences are, when they should be used and what benefits should be expected, will find this text an invaluable resource. It will also help students to understand the career paths in innovation and entrepreneurship to choose from. There is considerable confusion today on when and where to use each discipline, and how they should be applied to individual circumstances. This text provides practitioners with the guidelines necessary to know when to use a specific discipline, how to use them and what results to expect. The text clearly shows how the disciplines retain focus of goals and targets, using cost, scope, schedule and risk to their advantage, while complying with and informing investors, oversight and those related personnel who eventually

govern corporate or government decisions. It is more of an entry and midlevel general overview instructing the reader how to use the disciplines and when to use them. To use them all properly, more in-depth study is always necessary. However, the reader will know when to start, where to go and what disciplines to employ depending on the product, service, market, infrastructure, system or service under consideration. To date, none of this is available in existing literature. All texts on the subject stretch to try and cover all things, which is simply not possible, even with the definitions assigned by the three disciplines.
