Sherrie S. McLeRoy,Roy Edward Renfro

Lawyers in Practice Leslie C. Levin,Lynn Mather,2012-03-30 How do lawyers resolve ethical dilemmas in the everyday context of their practice? What are the issues that commonly arise, and how do lawyers determine the best ways to resolve them? Until recently, efforts to answer these questions have focused primarily on rules and legal doctrine rather than the real-life situations lawyers face in legal practice. The first book to present empirical research on ethical decision making in a variety of practice contexts, including corporate litigation, securities, immigration, and divorce law, Lawyers in Practice fills a substantial gap in the existing literature. Following an introduction emphasizing the increasing importance of understanding context in the legal profession, contributions focus on ethical dilemmas ranging from relatively narrow ethical issues to broader problems of professionalism, including the prosecutor’s obligation to disclose evidence, the management of conflicts of interest, and loyalty to clients and the court. Each chapter details the resolution of a dilemma from the practitioner’s point of view that is, in turn, set within a particular community of practice. Timely and practical, this book should be required reading for law students as well as students and scholars of law and society.

The Law of Lawyering Geoffrey C. Hazard, Jr.,W. William Hodes,1990
Grape Man of Texas Sherrie S. McLeRoy,Roy Edward Renfro,2004 Grape Man of Texas is the first biography of Thomas Volney Munson (1843-1913), the internationally known horticulturist who developed over 300 varieties of new grapes specifically for the American South and Southwest. He is perhaps best known for his work in fighting the phylloxera epidemic of the late nineteenth century, which nearly wiped out the world's vineyards. His solution-grafting vinifera onto certain resistant native rootstocks from Texas-earned him the Chevalier du Merite Agricole in the French Legion of Honor and numerous accolades. Munson belonged to and was honored by a number of viticultural and scientific associations and was considered a leader in the new scientific movement of the time for his cutting-edge work in breeding plant varieties, some of which are still important in modern viticulture and research.

Grape Man of Texas Roy Renfro,2008-10-01 Grape Man of Texas is the first biography of Thomas Volney Munson (1843-1913), the internationally recognized horticulturist who developed over 300 new varieties of grapes, some of which are still grown today on almost every continent. He is perhaps best known for his work in fighting the phylloxera epidemic of the late nineteenth century, which nearly destroyed the world's vineyards. His solution—grafting vinifera onto certain resistant native rootstocks from Texas—earned him the Chevalier du Merite Agricole in the French Legion of Honor and numerous accolades. This second edition introduces new insights into the phylloxera period, Munson's many papers and publications, and his far-sighted grasp of the needs of twentieth century agriculture and transportation. It details the continuing influence of both his research and his hybrid grapes on modern viticulture and new varieties of vitis that have been bred from them around the world.
