**Arduino VI** Steven F. Barrett,2023-12-15 This book is about the Arduino microcontroller and the Arduino concept. The visionary Arduino team represented a new innovation in microcontroller hardware in 2005, the concept of open source hardware, making a broad range of computing accessible for all. This book, “Arduino VI: Bioinstrumentation,” is an accessible primer on bioinstrumentation for those without a deep instrumentation background. An understanding of basic circuit theory is an appropriate prerequisite for the book. The three main goals for the book are: explore accessible Arduino microcontroller programming and interfacing concepts; investigate the source and measurement of biomedical signals; and develop skills to design and implement biomedical instrumentation.

**Living "Illegal"** Marie Marquardt,Timothy Steigenga,Philip Williams,Manuel Vasquez,2013-04-09 In June 2012, President Obama's executive order enforcing parts of the Dream Act and the Supreme Court's decision to block components of Arizona's draconian immigration law propelled the immigration debate back into the headlines once again. Based on oral histories, individual testimonies, and years of research into the lives of ordinary migrants, Living "Illegal" offers richly textured "stories that often get lost in the rhetoric" (Gainesville Sun)—of real people working, building families, and enriching their communities even as the political climate has grown increasingly hostile. Moving far beyond stock images and conventional explanations, Living "Illegal" challenges our assumptions about why immigrants come to the United States, where they settle, and how they have adapted to the often confusing patchwork of local immigration ordinances. This revealing narrative takes us into Southern churches, onto the streets of major American cities, into the fields of Florida, and back and forth across different national boundaries—from Brazil to Mexico and Guatemala. A new preface by the authors frames these stories in light of recent policy developments, as well as the 2012 elections and possible shifts ahead. An unmistakably relevant, deeply humane book, Living "Illegal" will continue to stand as an authoritative guide as we address one of the most pressing issues of our time.

Federal Funding of Astronomical Research National Research Council,Commission on Physical Sciences, Mathematics, and Applications,Space Studies Board,Board on Physics and Astronomy,Committee on Astronomy and Astrophysics,2000-01-01 The Committee on Astronomy and Astrophysics (CAA), at its meeting on September 8, 1997, was briefed on the legislative report accompanying the bill to authorize appropriations for fiscal years 1998 and 1999 for the National Science Foundation (NSF). The report raised a number of questions about trends in support for research in astronomy and the overall robustness of the programs providing that support. At its meeting, the CAA heard the views of NSF and the National Aeronautics and Space

Administration (NASA) on these issues. In consultation with the Board on Physics and Astronomy, the Space Studies Board, and representatives of NASA and NSF, the committee accepted the task of studying three of the questions raised by the House Science Committee (HSC). It was intended that the results of the study would help guide federal support of basic research for the next decade and serve as analytical input to the new 2000 decadal survey of the Astronomy and Astrophysics Survey Committee (AASC). The study would not offer specific funding recommendations, but rather would provide a background analysis of the alignment between available resources, agency priorities, and the vitality of the basic research program.
