Malware Recovery the Easy Way Backups are great for more than just hardware problems. And then, hoping that: the instructions work the process doesn't do even more damage the results don't leave your machine just as infected as before You'll remove malware the easy way instead: restore your machine to the state it was in before it was infected and you're done! The malware is gone. Backing Up - The Closest Thing to a Silver Bullet Having a proper and recent backup can save you from just about anything. Need that file you deleted last week? Restore it from a backup. I could go on singing the praises of backups ... but hopefully by now you get the idea. You should backup. So why aren't you? Think about your data. Think about your most important data. Now, imagine that data gone - *poof* - in the blink of an eye due to a hard disk crash or other catastrophic failure. Is that simply an inconvenience, or does it send chills down your spine? If the later, then you know you should be backing up. If you're not sure, then you probably should be backing up. And Saved! Backing Up With EaseUS Todo will help you get started.
