Routes, Roads and Landscapes Brita Brenna,Janike Kampevold Larsen,2016-12-05 Routes and roads make their way into and across the landscape, defining it as landscape and making it accessible for many kinds of uses and perceptions. Bringing together outstanding scholars from cultural history, geography, philosophy, and a host of other disciplines, this collection examines the complex entanglement between routes and landscapes. It traces the changing conceptions of the landscape from the Enlightenment to the present day, looking at how movement has been facilitated, imagined and represented and how such movement, in turn, has conditioned understandings of the landscape. A particular focus is on the modern transportation landscape as it came into being with the canal, the railway, and the automobile. These modes of transport have had a profound impact on the perception and conceptualization of the modern landscape, a relationship investigated in detail by authors such as Gernot Böhme, Sarah Bonnemaïson, Tim Cresswell, Finola O'Kane, Charlotte Klonk, Peter Merriman, Christine Macy, David Nye, Vittoria Di Palma, Charles Withers, and Thomas Zeller.

Models for Multispecies Management Tor

Rodseth,2012-12-06 The present book summarizes parts of the research made in the Norwegian Multispecies program. This program was initiated by the then Norwegian Council of Fisheries Research, which was later integrated in The Research Council of Norway. Modelling has been a key element in the program. In the first place, modelling, be it singlespecies or multispecies modelling, is an efficient way of summing up existing knowledge, and performing analyses of different types on the basis of it. Further more, models may serve as a meeting ground between fishery researchers from different academic fields. This has been an important aspect of the Multispecies program, bringing together oceanographers, biologists, economists, mathematicians and statisticians in fruitful cooperation. That this has proved possible may be taken as an important result of the program. The multispecies aspect has perhaps underscored the need for inter-disciplinary cooperation. The different authors are, of course, responsible for their respective contributions. Technical assistance in preparing the manuscript has been given by Knut Arrestad and Ian Knutsen, both at the University of Bergen. Bergen, October 1997.

Picturing Tolkien Janice M. Bogstad, Philip E.

Kaveny,2011-09-07 This group of new critical essays offers multidisciplinary analysis of director Peter Jackson's spectacularly successful adaptations of J.R.R. Tolkien's

Lord of the Rings trilogy: The Fellowship of the Ring (2001), The Two Towers (2002) and The Return of the King (2003). Part One of the collection, Techniques of Structure and Story, compares and contrasts the organizational principles of the books and films. Part Two, Techniques of Character and Culture, focuses on the methods used to transform the characters and settings of Tolkien's narrative into the personalities and places visualized on screen. Each of the sixteen essays includes extensive notes and a separate bibliography. Instructors considering this book for use in a course may request an examination copy here.

Lesbian Potentiality and Feminist Media in the 1970s Rox Samer, 2022-02-04 In Lesbian Potentiality and Feminist Media in the 1970s, Rox Samer explores how 1970s feminists took up the figure of the lesbian in broad attempts to reimagine gender and sexuality. Samer turns to feminist film, video, and science fiction literature, offering a historiographical concept called “lesbian potentiality”—a way of thinking beyond what the lesbian was, in favor of how the lesbian signified what could have come to be. Samer shows how the labor of feminist media workers and fans put lesbian potentiality into movement. They see lesbian potentiality in feminist prison documentaries that theorize the prison industrial complex’s racialized and gendered violence and give image to Black feminist love politics and freedom dreaming. Lesbian potentiality also circulates through the alternative spaces created by feminist science fiction and fantasy fanzines like The Witch and the Chameleon and Janus. It was here that author James Tiptree, Jr./Alice B. Sheldon felt free to do gender differently and inspired many others

to do so in turn. Throughout, Samer embraces the perpetual reimagination of “lesbian” and the lesbian’s former futures for the sake of continued, radical world-building.

Atlantic Cod George A. Rose, 2019-02-26 A comprehensive handbook, covering all aspects of the Atlantic cod including the biology, ecology, life histories, behaviour, commercial exploitation and conservation. Not only is Atlantic cod one of the most valuable food fish in the world’s oceans, it is an important component of North Atlantic ecosystems and has been subject to much research into its biology, ecology and exploitation. After hundreds of years of exploitation, overfishing in the last half of the 20th Century caused many stocks to collapse, most famously the Northern cod stock off Newfoundland and Labrador, Canada. Since then, most cod stocks have been better researched and managed, but remain in a variety of states, from fully recovered to continued decline. This book, written by world experts, describes that research and management, and the importance of cod and its fisheries on North Atlantic cultures and economies, with impacts well beyond the range of the species. *Atlantic Cod: Bio-Ecology of the Fish* offers insightful chapter coverage of cod nomenclature, taxonomy, phylogeny and morphology; physiology and ecophysiology; reproduction and spawning behavior; early life history and pre-recruitment processes; migrations, movements and stock identity; feeding, growth and energetics; the place of cod in the ecosystem; the exploitation of cod through history and present day commercial fisheries and precautionary management for sustainable fisheries; impacts of climate change on cod biology and ecology; and the future of the species and its fisheries. Discusses the major commercial importance of Atlantic cod through history. Provides a comprehensive

treatment of the bio-ecology of the most researched and highly exploited fully marine species Examines how the decline (and recovery) of cod stocks is of great political and scientific interest An essential purchase for marine fisheries scientists Atlantic Cod: Bio-Ecology of the Fish is a vital book for all fisheries scientists, managers and fish biologists.

Global fisheries catches can be increased after rebuilding of fish populations: Henrik Sparholt,Bjarte Bogstad,Villy Christensen,Jeremy Collie,Rob van Gemert,Ray Hilborn,Jan Horbowy,Daniel Howell,Michael C. Melnychuk,Søren Anker Pedersen,Claus Reedtz Sparrevohn,Gunnar Stefansson,Petur Steingrund,2019-05-20 Global fisheries catches can be increased in a sustainable way after rebuilding of fish populations, if ecosystem functioning is considered. A central biological reference point for fisheries management, Fmsy, the fishing pressure that gives the maximum sustainable yield, has been re-evaluated taking into account ecosystem functioning. This has been done for the main commercial fish stocks of the Northeast Atlantic. The new Fmsy values can replace the current values right away in fisheries management. Report of the working group meeting in 2017.
