**Modular Synthesis** Ezra J. Teboul, Andreas Kitzmann, Einar Engström, 2024-04-24 Modular Synthesis: Patching Machines and People brings together scholars, artists, composers, and musical instrument designers in an exploration of modular synthesis, an unusually multifaceted musical instrument that opens up many avenues for exploration and insight, particularly with respect to technological use, practice, and resistance. Through historical, technical, social, aesthetic, and other perspectives, this volume offers a collective reflection on the powerful connections between technology, creativity, culture, and personal agency. Ultimately, this collection is about creativity in a technoscientific world and speaks to issues fundamental to our everyday lives and experiences, by providing insights into the complex relationships between content creators, the technologies they use, and the individuals and communities who design and engage with them. With chapters covering VCV Rack, modular synthesis, instrument design, and the histories of synthesizer technology, as well as interviews with Dave Rossum, Corry Banks, Meng Qi, and Dani Dobkin, among others, Modular Synthesis is recommended reading for advanced undergraduates, researchers, and practitioners of electronic music and music technology. Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

**Big Podcast – Grow Your Podcast Audience, Build Listener Loyalty, and Get Everybody Talking About Your Show** David Hooper, 2019-03-12 Is it worth doing a podcast if nobody listens? You started your podcast because you want to: - Spread an important message - Share your passion - Make money But your podcast hasn't quite taken off like you thought it would. What happened? This book is for podcasters who can't quite figure out what they're doing wrong (and are ready to do things right). You'll learn: - Why your "natural personality" may be repelling to people and how to make it attract listeners to your podcast like a magnet (See p198) - What to do when a company tries to "lowball" you on advertising fees (do nothing, except send them the email on p424) - It's easy to screw up an interview. To be sure you don't run into any problems, use my "guest contract" on p311. - A six-word "trick" (learned from a 20-year radio veteran) that will instantly make you a better host (it's on p210) - 9 reasons to kill an interview before it happens – ignore these "red flags" and you'll be sorry (p299) - What Victoria's Secret models know about podcasting (even though you never hear them talk) – this lesson starts on p208! - Nervous on the mic? You have lots of company – 75% of podcasters to be exact. I give you a 5-step way to cure your "stage fright" on p229. - If you're scared of getting bad reviews, don't worry – I have three simple ways to handle critics on p236 (two of which can turn critics into fans) - Why copying top podcasters may be killing your podcast (I share the story on p116) and how to develop a podcasting style that works for you (and will attract more listeners) - My 3-step "episode teaser" formula – it's boring, but it works (get it on p110) - Thinking of doing a "daily" podcast? You must read p103 before you start. - Want to impress a guest? See the chapter starting on p321 for my 3-step followup "ritual" that will make being on your podcast unforgettable (and encourage guests to promote your episodes) And that's just the start ... This book contains my complete system on how to attract listeners, deliver

your message effectively, and build a big podcast. You can't build a big podcast on hope. But you can build a big podcast. And if you're ready to do just that, read this book.
