Weather Radar Polarimetry Guifu Zhang, 2016-08-19 This book presents the fundamentals of polarimetric radar remote sensing through understanding wave scattering and propagation in geophysical media filled with hydrometers and other objects. The text characterizes the physical, statistical, and electromagnetic properties of hydrometers and establishes the relations between radar observables and physical state parameters. It introduces advanced remote sensing techniques (such as polarimetric phased array radar) and retrieval methods for physical parameters. The book also illustrates applications of polarimetric radar measurements in hydrometer classification, particle size distribution retrievals, microphysical parameterization, and weather quantification and forecast.

Remote Sensing of Clouds and Precipitation Constantin Andronache, 2018-02-21 This book presents current applications of remote sensing techniques for clouds and precipitation for the benefit of students, educators, and scientists. It covers ground-based systems such as weather radars and spaceborne instruments on satellites. Measurements and modeling of precipitation are at the core of weather forecasting, and long-term observations of the cloud system are vital to improving atmospheric models and climate projections. The first section of the book focuses on the use of ground-based weather radars to observe and measure precipitation and to detect and forecast storms, thunderstorms, and tornadoes. It also discusses

the observation of clouds using ground-based millimeter radar. The second part of the book concentrates on spaceborne remote sensing of clouds and precipitation. It includes cases from the Tropical Rainfall Measuring Mission (TRMM) and the Global Precipitation Measurement (GPM) mission, using satellite radars to observe precipitation systems. Then, the focus is on global cloud observations from the CloudSat, Cloud-Aerosol Lidar and Infrared Pathfinder Satellite Observation (CALIPSO), including a perspective on the Earth Clouds, Aerosols, and Radiation Explorer (EarthCARE) satellite. It also addresses global atmospheric water vapor profiling for clear and cloudy conditions using microwave observations. The final part of this volume provides a perspective into advances in cloud modeling using remote sensing observations.

Remote Sensing of Water-Related Hazards Ke Zhang, Yang Hong, Amir AghaKouchak, 2022-04-19 Applications of remote sensing technology for monitoring and predicting water-related hazards Water-related hazards such as floods and droughts have serious impacts on society. Their incidence has increased in recent decades, a trend set to continue with ongoing climate change. Adaptation and mitigation measures require accurate detection, monitoring, and forecasting, much of which comes from remote sensing technologies. Remote Sensing of Water-Related Hazards takes an interdisciplinary approach, presenting recent advances in the available data, sensors, models, and indicators developed for monitoring and prediction.

Volume highlights include: Progress in remote sensing of precipitation, storms, and tornados Different techniques for flood mapping, forecasting, and early warning Integrated approach for predicting flood and landslide cascading hazards Satellite monitoring of water cycle variation, water scarcity, and drought conditions Multi-indicator and multi-sensor approaches for quantifying drought impacts The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity. Its publications disseminate scientific knowledge and provide resources for researchers, students, and professionals.

Encyclopedia of Atmospheric Sciences Gerald R. North,John A. Pyle,Fuqing Zhang,2014-09-14 *Encyclopedia of Atmospheric Sciences*, Second Edition, Six Volume Set is an authoritative resource covering all aspects of atmospheric sciences, including both theory and applications. With more than 320 articles and 1,600 figures and photographs, this revised version of the award-winning first edition offers comprehensive coverage of this important field. The six volumes in this set contain broad-ranging articles on topics such as atmospheric chemistry, biogeochemical cycles, boundary layers, clouds, general circulation, global change, mesoscale meteorology, ozone, radar, satellite remote sensing, and weather prediction. The Encyclopedia is an

ideal resource for academia, government, and industry in the fields of atmospheric, ocean, and environmental sciences. It is written at a level that allows undergraduate students to understand the material, while providing active researchers with the latest information in the field. One Hundred Years' History Of The Chinese In Singapore: The Annotated Edition Ong Siang Song,2020-03-12 Since its publication in 1923, Sir Song Ong Siang's One Hundred Years' History of the Chinese in Singapore has become the standard biographical reference of prominent Chinese in early Singapore, at least in the English language. This fact would have surprised Song who saw himself primarily as a compiler of historical and biographical snippets. The original was not referenced in academic fashion and contained a number of errors. This annotation by the Singapore Heritage Society takes Song's classic text and updates it with detailed annotations of sources that Song

himself might have consulted, and includes more recent scholarship on the lives and times of various personalities who are mentioned in the original book. This annotated edition is commissioned by the National Library Board, Singapore and co-published with World Scientific Publishing.

Top Crime Mysteries (2012 Edition - EPUB) Asiapac Editorial,2018-12-20 Ever wondered how the police solve crimes? When money goes missing, weapons disappear, suspected criminals have foolproof alibis, what does the police do? How can they find the stolen gold and arrest the bad guys? Collected in this book are many baffling crimes, some of which took place in modern times, others which occurred many centuries ago. But they all have one thing in common: they were solved through the knowledge and reasoning skills of the detectives and experts handling each case. In this collection, the behaviour of insects, the characteristics of mussels, the times when flowers bloom... all these (and more!) are key to cracking the intriguing cases. As we learn about how the police get to the bottom of mysteries and bring criminals to justice, we can gain new knowledge and improve our own problem-solving abilities. So, let's put on our thinking caps and find out more about how crimes are solved!

Singapore Malay/Muslim Community, 1819-2015 Hussin Mutalib, Rokiah Mentol, Sundusia Rosdi, 2016-06-29 Singapore's Malay (Muslim) community, constituting about 15 per cent of the total population and constitutionally enshrined as the indigenous people of Singapore, have had its fair share of progress and problems in the history of this country. While different aspects of the vicissitudes of life of the community have been written over the years, there has not been a singularly substantive published compendium specifically about the community – in the form of a Bibliography – available. This academic initiative fills this obvious literature gap. The scope and coverage of this Bibliography is manifestly comprehensive, encompassing the different sources of information (print or non-print) about the many facets of life of the Republic's Malays/Muslims – such as education, economy, politics, culture, history, health, language, religion, arts, and more. The result is a Bibliography that is arguably the most expansive, if not exhaustive treasury collection about the community, ever available anywhere. Scholars and researchers in particular and the public in general should find this Bibliography a highly valuable, indispensable source of information about the rich and varied life of Singapore's Malay/Muslim community, stretching a period of two centuries – from the time of Stamford Raffles in 1819 until today. The Editors – Hussin Mutalib, Ph.D. (a senior academic with the National University of Singapore), Rokiah Mentol, and Sundusia Rosdi

(former senior librarians with Singapore's National Library Board) – are assisted by professional and experienced librarians.
