*Climate Change and Aviation* Stefan Gossling,Paul Upham,2012-05-04 'This is a timely, challenging and fascinating book on a topic of central importance to the success or otherwise of our climate change policies. It sets down a clear marker for what has to be done in the aviation sector.' Professor John Whitelegg, Stockholm Environment Institute, University of York, UK 'Climate Change and Aviation presents a clear picture of the transport sector's greatest challenge: how to reconcile aviation's immense popularity with its

considerable environmental damage and its dependence on liquid hydrocarbon energy sources. This book avoids wishful thinking and takes the much harder, but more productive, path of considering difficult solutions that clash with short-term and short-sighted expectations about the unlimited growth potential for flying.' Professor Anthony Perl, Urban Studies Program, Simon Fraser University, Canada 'A convincing and timely collection that brings together an impressive range of expertise. The book integrates various perspectives into a powerful core argument - we must do something, and quickly, to tackle the impact of aviation on our environment. The authors recognise the political difficulties associated with promoting change but present constructive options for policy makers. Required reading, especially for transport ministers set on promoting the growth of air travel.' Professor Jon Shaw, Director of the Centre for Sustainable Transport, University of Plymouth, UK Trends such as the massive growth in availability of air travel and air freight are among those which have led to aviation becoming one of the fastest growing emitters of greenhouse gases. These trends have also caused a shift in expectations of how we do business, where we go on holiday, and what food and goods we can buy. For these reasons aviation is (and is set to stay) high up on global political, organizational and media agendas. This textbook is the first to attempt a comprehensive review of the topic, bringing together an international team of leading scientists. Starting with the science of the environmental issues, it moves on to cover drivers and

trends of growth, socio-economics and politics, as well as mitigation options, the result being a broad yet detailed examination of the field. This is essential reading for undergraduate and postgraduate courses in transport, tourism, the environment, geography and beyond, while also being a valuable resource for professionals and policymakers seeking a clear understanding of this complex yet urgently pressing issue.

Multinationals, Globalisation and Indigenous Firms in China Chunhang Liu,2012-07-26 This book considers the impact of multinational companies in China on the Chinese economy and on indigenous firms in China. It shows how the global business environment has undergone profound changes since the early 1990s, leading to an explosion of merger and acquisitions activity and consequent unprecedented degrees of concentration in many industries at a global level. It discusses the effects of these developments on the Chinese economy – both on multinationals and indigenous firms – analysing company strategies, activities and value chain structures. It shows that, as China's integration into the global economy increases, new, globalised value chain structures are becoming the established norm across the Chinese economy. In particular, it explores the effects of these developments for local Chinese firms, where the strategy of catch-up has recently been a primary goal,

demonstrating how difficult it is for Chinese firms to achieve catch-up when the competitors they are chasing are themselves moving forward and evolving so fast. The book includes detailed case studies of Boeing, Wal-Mart and Coco-Cola, considering their activities both at the global level and within China, and case studies of the sectors in which these forms operate in China. The book's profoundly important conclusions concerning the impact of multinationals on the local economy and on indigenous firms are applicable to other developing economies as well as to China.

**Transformation of Cities in Central and Eastern Europe** F. E. Ian Hamilton, Kaliopa Dimitrovska Andrews, Nataša Pichler-Milanović, 2005 Annotation This volume is one in a series initiated by the United Nations University Institute of Advanced Studies on the inter-relationship between globalisation and urban transformation. It identifies and describes the inter- and intra-urban transformations of Central and Eastern European cities and considers their pre-1945 historic legacies, the socialist period, and their contemporary transition towards market oriented and democratic systems. The dramatic changes since 1989 including the collapse of Communist ideology, the break-up of the Soviet Union, Czechoslovakia and Yugoslavia, the end of the Cold War and the impact of globalisation and European integration, have reconfigured this region and affected their re-integration into European and global networks. This book first examines the similarities and differences between significant Central and Eastern European cities, comparing the

differing patterns of historical context and socialist legacies before 1990, and the impacts of internal and external forces on re-shaping these cities and their paths of transformation since 1990. It also examines the role of contemporary planning within the overall development of Central and Eastern European cities. The conclusion demonstrates the similarities and differences between Central and Eastern European cities and their re-integration into global networks.

**The Airline Business** Rigas Doganis, 2006 The second edition of Rigas Doganis' book brings the airline industry story up to date, exploring airline mergers and alliances, price wars, the impact of disasters and the future prospects for the industry as a whole.

Air Quality in Airplane Cabins and Similar Enclosed Spaces Martin B. Hocking, Diana Hocking, 2005-09-16 The issue of aircraft air quality is attracting considerable attention of late, as access to public air travel has expanded exponentially. Aircrew and passengers are increasingly concerned about operating and service decisions that could affect their health, comfort, and safety. The editor of this volume invited a wide range of experts to provide an in-depth treatment of virtually all aspects of aircraft cabin air quality. The topics are covered at a level comprehensible to all who fly as well as being of sufficient depth to be informative to decision makers concerned with purchase, design, operation, and servicing of passenger aircraft. Topics are grouped under: Control of Aircraft Cabin Air Quality;

Possible Effects of Low Humidity, Decreased Outside Air Flows; and Effects of Some Aircraft Malfunctions on Cabin Air Quality. The volume concludes with Air Quality Systems for Related Enclosed Spaces, in which chapters cover air quality in buildings, ships, submarines, and spacecraft, which provide novel approaches potentially applicable to aircraft.

Reflexive Governance in EU Equality Law Emma Lantschner, 2021 The Covid-19 pandemic has revealed how far we as a European society still are from the proclaimed Union of Equality. The book explores how the promise of equal treatment can become a reality and compliance with the EU *acquis* relating to equality and non-discrimination can be improved. It studies enforcement and promotion aspects of the two watershed directives of 2000, the Racial Equality Directive 2000/43/EC and the Employment Equality Directive 2000/78/EC, through the lens of reflexive governance. This governance

approach is proposed as having great potential in enhancing the likelihood of sustainability (or continuation) of reforms in the current candidate countries and EU Member States through its emphasis on reflexive learning processes and the cooperation between EU institutions, national authorities, and civil society actors. In order to deploy this potential, there is, however, a need for more consistent and transparent monitoring, both with regard to candidate countries as well as old and new Member States, and a reconsideration of the understanding of monitoring as such. It should be seen as helping to deconstruct own preference-formations and as a possibility to learn from successes and failures in a cooperative and recursive process. To work on these lacunae and improve learning and monitoring processes, this book identifies indicators, that are deduced from the comparative review of the implementation practice of the member states. This book is thus a contribution to the existing literature in the fields of Europeanization, governance, and the right to equality and non-discrimination.
