Literacy and Bilingualism Maria Estela Brisk, Margaret M. Harrington, 2010-11 This handbook applies proven techniques, derived from bilingual/bicultural classrooms, to teaching literacy in the twenty-first century. Its goal is to help teachers increase their understanding of bilingual learners in order to maximize instruction. Teachers can use this handbook to expand their understanding of literacy and bilingualism; implement literacy approaches and assess students' development; and learn through reflection. Practical, flexible format and content. Complete and straightforward instructions, illustrated by case studies, allow teachers to use the strategies in this handbook on their own or in teacher-led study groups. They can select from the variety of approaches the ones which best match their students' needs and their own teaching style. Student-centered focus. All of the approaches share characteristics that help motivate students of varying language abilities to develop literacy. Field-tested approaches. The approaches have been modified and tested with bilingual students of different ages and language backgrounds in bilingual, ESL, mainstream, special education, and deaf education classes ranging from preschool through high school. New in the Second Edition: *five new approaches with their corresponding classroom implementation; *additional information in each introduction addressing its theme; *new material on issues of language, culture, and literacy development of students completely new to the English language; and *annotated bibliographies with sample books to support literacy within language and content area classes. Literacy and Bilingualism is intended for a broad audience of teachers in any type of classroom where bilingualism plays a role, and is an excellent text for preservice and inservice courses that prepare teachers to work with English language learners.

Bilingual Education María Estela Brisk, 2006-04-21 Bilingual Education: From Compensatory to Quality Schooling, Second Edition maintains its original purpose of synthesizing the research on successful bilingual education in order to demonstrate that quality bilingual education is possible and desirable. Findings from a wide range of studies are integrated to provide a clear picture of bilingual education in today's schools, and a professional understanding of the foundations and issues surrounding bilingual education programs. The recommendations offered provide a comprehensive basis for planning, developing, improving, and evaluating bilingual programs. For clarity, these recommendations are discussed with respect to the whole school, the curriculum, and the classroom, but it is stressed that they need to be applied in a holistic way because they depend on each other. All educators who work or will work with bilingual students--classroom teachers, administrators, and curricula developers--will find the information in this text essential and will appreciate the straightforward approach and easy reading style. New in the Second Edition: *A new Chapter 1, Pursuing Successful Schooling, includes the definition of success that frames the content of the book, and a review of how the research on bilingual education has changed. *Chapter 2, Bilingual Education Debate, is substantially revised to address major changes in demographics and legislation. *Chapter 3, Contextual and Individual Factors: Supports and Challenges, is updated to include important new research on the external and internal factors affecting learners and a new section on peers. *Chapter 4, Creating a Good School, is reorganized and updated. *Chapter 5, Creating Quality Curriculum, is updated throughout, particularly the sections on teaching content areas and assessment. *Chapter 6, Creating Quality Instruction, includes extensive new material in the sections on Teaching English and In English and Teaching Students with Limited Schooling. *Chapter 7, Beyond the Debate, has an extensive new section describing and analyzing how the framework for quality education can be used as a guide to help create a new program.
