Equality and Discrimination Law in Australia: An Introduction Beth Gaze,Belinda Smith,2016-11-24
Equality and Discrimination Law in Australia: An Introduction explores four decades of anti-discrimination laws in Australia. Beth Gaze and Belinda Smith argue that effective laws protecting against and deterring discrimination are vital for a fair future, and emphasise the theoretical and social

contexts that underpin this area of the law. The text is divided into three sections: the first addresses the social and conceptual context, history and framework of anti-discrimination laws; the second analyses the main elements of the law and the processes of enforcement; and the third explores broader avenues for pursuing equality beyond simply prohibiting discrimination. Written in a clear and concise style, *Equality and Discrimination Law in Australia: An Introduction* is a vital resource for students.

Financial Management: Principles and Applications J William Petty,Sheridan Titman,Arthur J Keown,Peter Martin,John D Martin,Michael Burrow,2015-05-20 The sixth edition of Financial Management provides students with an overview of financial management suited to the first course in finance. The focus of the text is on the big picture, providing an introduction to financial decision making grounded in current financial theory and the current state of world economic conditions. Attention is paid to both valuation and capital markets, as well as their influence on corporate financial decisions. The 10 basic principles of finance are introduced in the first chapter and woven throughout the text, to give students a solid foundation from which to build their knowledge of finance. The goal of this text is to go beyond teaching the tools of a discipline or a trade and help students gain a complete

understanding of the subject. This will give them the ability to apply what they have learnt to new and as yet unforeseen problems—in short, to educate students in finance.

Construction Law, Costs and Contemporary Developments: Drawing the Threads Together Julian Bailey, 2018-11-15 Lord Justice Jackson's retirement in March 2018 concluded a career of almost 20 years on the bench. His judicial career has seen a remarkable transformation of construction law, construction law litigation and the litigation landscape more generally. Drawing the Threads Together is a Festschrift which considers many of the important developments in these areas during the Jackson era. The Festschrift discusses most of the leading construction cases decided by Lord Justice Jackson, with subject matter including statutory adjudication, fitness for purpose obligations, consideration, delays and extensions of time, liquidated damages, time bar provisions, the prevention principle, neighbour rights, limitation clauses, negligence, good faith, bonds and guarantees and concurrent duties of care. It also includes a discussion of the background to the Jackson Review of

Civil Litigation Costs (2009–2010) and its impact on litigation, as well as considering the development of the Technology and Construction Court during and subsequent to Mr Justice Jackson's tenure as judge in charge of that court.

Commonwealth Caribbean Business Law Natalie Persadie,Rajendra Ramlogan,2010-04-20

Commonwealth Caribbean Business Law breaks away from the traditional English approach of treating business law primarily as the law of contract and agency. The book takes a panoramic view of the foundation of various legal systems with a subsequent examination of different areas of legal liability that may affect business activities. These areas include contract law, agency, tort law, criminal law, and internet law as significant challenges confronting the business sector. The book primarily targets the development of business law in several Caribbean Commonwealth jurisdictions but also, where appropriate, embraces the jurisprudence of other Commonwealth nations such as the United Kingdom, Canada and Australia. With respect to internet law, the proliferation of judicial pronouncements emerging from the United States provided the platform for the only non-Commonwealth treatment of a

topic. The approach of the book is to use excerpts from judgments so as to allow students, particularly the non-legal student, to understand legal principles as espoused by the judiciary without the filtering bias of authors.
