**Non-Linear Growth** Xiaobo Wu,Jian Du,Sihan Li,2023-12-15

This book offers a comprehensive exploration of the transformative trajectory undertaken by Chinese domestic enterprises, with a particular focus on Geely Automobile. Comprising five chapters and totaling 13 sections, the study delves into Geely's remarkable progression from a state of catch-up to surpassing established competitors. The initial chapter chronicles Geely's entry into the automotive industry amidst resource and technological scarcity, shedding light on the strategies employed to achieve breakthroughs during the nascent stages. The subsequent section elucidates Geely's transition from a late entrant to a prominent player in the global automotive market, facilitated by innovative practices across organizational,

technological, talent-driven, quality-oriented, and cultural dimensions. The third chapter examines Geely's successful foray into globalization, offering a comprehensive analysis of its non-linear growth trajectory, overseas mergers and acquisitions, and strategic expansion efforts. The fourth part explores Geely's approach to embracing uncertainty and navigating cyclical challenges in the automotive industry, seeking determinative opportunities for future growth. Finally, the concluding chapter draws insights from Geely's non-linear growth and advances the C theory, an enriched local innovation management framework grounded in China's unique developmental context.

**Chinese Maritime Cases** Martin Davies,Jiang Lin,2021-09-03

This book selects leading, innovative and influential Chinese maritime judgments and presents full translation of them, with brief summary, to the readers so that they can have insights of how the Chinese maritime judges interpret, apply and develop Chinese maritime law in practice. China trades with other states in trillions of USD every year, and about 95% of the cargoes are carried by ocean-going ships calling at hundreds of Chinese ports each single day. Due to the enormous and steadily growing trade volume and shipping activities, foreign ships, companies and persons are often caught by the Chinese maritime law and court. The parties involved and their lawyers are more than ever enthusiastic to study Chinese maritime cases in order to deal with their own cases properly or, if possible, predict the potential problems and avoid the disputes outright. The book is appealing to and benefits worldwide law students, academics, practitioners and industrial people in the shipping, trade, insurance and financial fields. The book remedies to certain extent the situation that there is lack of authoritative sources available to foreign personnel to look into how Chinese justice system functions.

*Casebook of Chinese Business Management* Mingyue

Fan,Limin Wang,Dragana Ostic,2022-05-03 This book selects Chinese excellent enterprise management cases, integrating into

the education system of business schools, sharing China's new story to readers, and boosting the process of national economic construction and enterprise transformation. Chinese enterprises face unprecedented opportunities and challenges under the circumstance of fast-changing technology, economy, and political environment. In the face of various uncertainties, they have risen to prominence and constantly summed up enterprise management concepts and practical experience suitable for their own development to reshape their competitive advantages and enhance their market value. Based on the investigation, this book covers the major theoretical aspects of management principles such as planning, organizing, leading, controlling, and innovation. The 17 selected cases from manufacturing, retailing, technology/big data service, agriculture, and other industries cover strategic management, entrepreneurial management, human-oriented management, information management, and organizational innovation management. We hope that readers can get some valuable practical experience and enlightenment from the practices in these fields. The book also includes two case study guides, which guide readers to form a case study's thinking. It also encourages readers to broaden their learning ideas on management.

#### Case Studies on Chinese Enterprises Donglin Xia, 2013-05-13

This book is a collection of teaching cases on two Chinese companies, UFIDA and Founder. The cases describe the management practices of typical Chinese companies. UFIDA is a well-known company providing management software while Founder is a long-established high-tech company. The book aims at providing readers with original, first-hand materials, based on a theoretical framework, and broadening readers' vision regarding China's business niche in terms of culture, strategy, corporate governance, business environment, organizational dynamics, marketing, human resource, finance and the potential business partnerships with Chinese enterprises and the Chinese people. The

cases are comprehensive and descriptive. This book appeals to top executives and leaders of multinational companies with ambitions to expand or already vested business interest in China. It is also of valuable use to companies specializing in international trade. The book provides insight into the great business opportunities in the development of China.

*Annual Report United States. Small Business Administration,1981*

Shanghai Pudong Y. Chen,2007-06-07 This publication concerns large-scale urban area development in general, and in particular with gaining an understanding of the role played by global-local interaction in shaping the area development strategies in one particularly explosive urban project, the development of Shanghai's Pudong New Area. The Pudong development provides an extreme example of a situation in which interaction between global and local forces took place in a location whose boundaries had been closed to the outside world for almost forty years and in a period when doors and windows were beginning to open. The research led to a concrete interpretation of the tensions developing at district level and provided an example capable of representing the complexity and dynamics of current area developments. The practical question addressed by the research was: What were the main factors responsible for the speed achieved by the Pudong development? The associated theoretical question was To what extent did the development of the Pudong New Area reflect the characteristics of a developmental state?
