Ancient Byblos Reconsidered Alessandra Nibbi, 1985 This study aims to debunk much of what has been written about links between Byblos and Ancient Egypt, finding no real evidence for the large scale trade in cedar wood which is often postulated.

Byblos Charles River Charles River Editors, 2016-12-07 *Includes pictures *Includes ancient accounts of Byblos *Includes a bibliography for further reading Of all the peoples of the ancient Near East, the Phoenicians are among the most recognizable but also perhaps the least understood. The Phoenicians never built an empire like the Egyptians and Assyrians; in fact, the Phoenicians never created a unified Phoenician state but instead existed as independent city-state kingdoms scattered throughout the Mediterranean region. However, despite the fact there was never a Phoenician Empire, the Phoenicians proved to be more prolific in their exploration and colonization than any other peoples in world history until the Spanish during the Age of Discovery. Byblos, known today as Jubayl, has been known by many names over the ages: the Phoenicians called it Gebal; for the Egyptians it was Kepon or Kupna; the Assyrians and Akkadians referred to it as Gubla (this name was repeated throughout the Old Testament); the Arabs called it Jbeil, and eventually the European Crusaders gave it the name of Gibelet. This lengthy etymology reflects the city's unique heritage significance, because Byblos is one of the oldest continuously inhabited cities ever to have existed in the world. The city was frequently mentioned in the great archives of antiquity, but its origins lie in the depths of prehistory. Its strategic location, with plenty of shipbuilding wood coming from the nearby mountains, made many powerful states eager to control the territory. Over time, Byblos and its surrounding area were occupied by the Amorites, Canaanites, Phoenicians, Assyrians, Persians, Macedonians, Romans, Arabs, Crusaders, Mamelukes, and Ottomans. From the earliest of times, Byblos was an active commercial center, trading extensively with Egypt, where it exported cedar wood from the Phoenician homelands in exchange for papyrus. As a result, Egypt would have a significant influence on the art and culture of Byblos, and the city quickly assumed a position of supremacy in the Mediterranean, thanks in part to its early use of writing. Archaeological evidence uncovered at the city show the existence of a Phoenician alphabet being used from as early as 1200 BCE, and the remains of Phoenician cities along the coast of Lebanon bear witness to the important role they played as a meeting place between the east and west, making it a focal point for the fusion of cultures in the ancient world. The Phoenicians did not generally seek political advantages or territorial expansion in their homeland-their interest was primarily in international trade. Much of the coastline of the area is heavily urbanized, which likely obscures many further interesting structures that might completely change the narrative of the site if they were uncovered. Moreover, many of the archaeological remains are openly exposed to the elements. The construction of a modern jetty has modified the coastal configuration, which has exacerbated the problem of wave energy from the strong storms that regularly batter the coast. Some attempts at coastal engineering have been made to prevent environmental change, and the site's environmental heritage significance has been recognized (being the first archaeological coastline in Lebanon to also become a protected natural landscape), but further steps will need to be taken preserve the unique heritage of Byblos. *Byblos: The History and Legacy of the Oldest Ancient Phoenician City* chronicles the tumultuous history of one of the most important cities of antiquity. Along with pictures depicting important people, places, and events, you will learn about Byblos like never before.

Sulamyth Alexander Kuprin, 2024-03-19 Come away to Ancient Jerusalem in the time of King Solomon - a city of great splendor and great squalor, of many gods and goddesses, of paupers and kings. Behold the beating heart of the Middle East, whose economic and political affairs reach far and wide and impact lands hundreds of miles away. Barbarism and wisdom. Lust and love. The most senseless violence and the most exquisite wisdom. Joined together in Alexander Kuprin's brilliant Sulamyth translated by Maria K. The Song of Songs retold in a way you have never seen before.

Byblos Symbolic Architecture Diego Kurilo, 2022-12-21 The first chapter of this book deals with the life of Vitruvius, the great architect of antiquity and his codex De Architectura, a source of analysis on architectural syntax and mythologies related to the art of construction, being his codex on the Greco- Latin construction and its symbols, the oldest preserved to date. In the following chapters, the symbols associated with ancestral gods and sacred places are shared with the reader and how they represented numbers and geometries for peoples such as the Egyptian or the Greek, in an ideology loaded with architectural symbols. For the bronze age man, the earth as the continent of the world, was perceived as the Great House. Natural events such as the overflow of the Nile River or the observation of the North Star, the only star that appears to be motionless from the perspective of the earth, created in the imagination of antiquity the need to internalize certain events as architectural objects. In chapter six and seven the symbology of one of the most important temples for the human collective is studied, the temple of King Solomon, its columns and its relationship with the letter Yod. In its genesis this logo was related to a desert deity who was worshiped as a fundamental pillar and fire for all consumers, an ancestral idea common to local people. In the following chapters there will be a tour of architectural forms and how these were linked to Indo-European concepts such as that of the fundamental hill of creation, mythology that saw the world as a Great ship-shaped construction. From them and from the search of the ancient world for architectural beauty and organicity, the concept of the golden number emerged, present throughout the natural world. Modulor used in all the great works of the past as a means of organizing spaces in a harmonious way, acting as nature does in a clear and efficient way. Chapter ten deals with poems from the Al-Andalus world and its relationship with architecture, in addition to studying cultural objects such as the bronze sea of the temple of King Solomon that, related to the celestial, hold the key to the decoding of said architecture.

The History and Archaeology of Phoenicia Hélène Sader, 2019-11-23 An insightful historical account of Phoenicia that illustrates its cities, culture, and daily life Hélène Sader presents the history and archaeology of Phoenicia based on the available contemporary written sources and the results of

archaeological excavations in Phoenicia proper. Sader explores the origin of the term Phoenicia; the political and geographical history of the city-states Arwad, Byblos, Sidon, and Tyre; and topography, climate, and natural resources of the Phoenician homeland. Her limited focus on Phoenicia proper, in contrast to previous studies that included information from Phoenician colonies, presents the bare realities of the opportunities and difficulties shaping Phoenician life. Sader's evaluation and synthesis of the evidence offers a corrective to the common assumption of a unified Phoenician kingdom. Features Historical as well as modern maps with the locations of all relevant archaeological sites Faunal and floral analyses that shed light on the Phoenician diet Petrographic analysis of pottery that sheds light on trading patterns and developments

Business Politics in the Middle East Steffen Hertog, Giacomo Luciani, Marc Valeri, 2013-04-25

Although most Arab countries remain authoritarian, many have undergone a restructuring of state-society relations in which lower- and middle-class interest groups have lost ground while big business has benefited in terms of its integration into policy-making and the opening of economic sectors that used to be state-dominated. Arab businesses have also started taking on aspects of public service provision in health, media and education that used to be the domain of the state; they have also become increasingly active in philanthropy. The 'Arab Spring,' which is likely to lead to a more pluralistic political order, makes it all the more important to understand business interests in the Middle East, a segment of society that on the one hand has often been close to the ancien regime, but on the other will play a pivotal role in a future social contract. Among the topics addressed by the authors are the role of business in recent regime change; the political outlook of businessmen; the consequences of economic liberalisation on the composition of business elites in the Middle East; the role of the private sector in orienting government policies; lobbying of government by business interests and the mechanisms by which governments seek to keep businesses dependent on them.
