*Hamito-Semitic Etymological Dictionary* Vladimir E. Orel,Olga V. Stolbova,2015-11-02 The Hamito-Semitic Etymological Dictionary, a project in the making since 1986, is the first dictionary to reflect the vocabulary of the extinct Proto-Hamito-Semitic (Proto-Afro-Asiatic) language. Reconstructed on the basis of Semitic, Ancient Egyptian, Berber, Chadic and Cushitic linguistic groups, the Dictionary plays an indispensable role in further research into the field of historical linguistics. It surpasses by far the only comparable work to date, M. Cohen's *Essai comparatif sur le vocabulaire et la phonétique du chamito-semitique*, published in 1947, which contains much less material and is now outdated. The Dictionary comprises more than 2,500 lexical items and includes

an introduction providing valuable information on the historical phonology of Hamito-Semitic as well as an index of meanings, which supplies linguistics, archaeologists and scholars of ancient history with added insight into the culture of the ancient speakers of Proto-Hamito-Semitic. An invaluable contribution to the field of Afro-Asiatic Studies, The Hamito-Semitic Etymological Dictionary will be used and discussed by scholars for years to come.

**A Grammar of the Ugaritic Language** Daniel Sivan, 2008-02 Ugaritic, discovered in 1929, is a Northwest Semitic language documented on clay tablets (about 1,250 texts) and dated from the period between the fourteenth and the twelfth centuries B.C.E. The documents are of various types: literary, administrative, lexicological. Numerous Ugaritic tablets contain portions of a poetic cycle pertaining to the Ugaritic pantheon. Another group of texts, the administrative documents, sheds light on the organization of Ugarit, thus contributing greatly to our understanding of the history and culture of the biblical and Northwest Semitic world. --BOOK JACKET.

### **Nanotechnology in Skin, Soft Tissue, and Bone**

**Infections** Mahendra Rai,2020-01-14 The main goal of the present book is to deal with the role of nanobiotechnology in skin, soft tissue and bone infections since it is difficult to treat the infections due to the development of resistance in them against existing antibiotics. The present interdisciplinary book is very useful for a diverse group of readers including nanotechnologists, medical microbiologists, dermatologists, osteologists, biotechnologists, bioengineers. Nanotechnology in Skin, Soft-Tissue, and Bone Infections is divided into four sections: Section I- includes role of nanotechnology in skin infections such as atopic dermatitis, and nanomaterials for combating infections caused by bacteria and fungi. Section II- incorporates how nanotechnology can be used for soft-tissue infections such as diabetic foot ulcer and other wound infections; Section III- discusses about the nanomaterials in artificial scaffolds bone engineering and bone infections caused by bacteria and fungi; and also about the toxicity issues generated by the nanomaterials in general and nanoparticles in particular. The readers will be immensely enriched by the knowledge of new and emerging nanobiotechnologies in a variety of platforms.

Chaudhari,Marco Zennaro,2020-04-02 Low power wide area network (LPWAN) is a promising solution for long range and low power Internet of Things (IoT) and machine to machine (M2M) communication applications. The LPWANs are resource-constrained networks and have critical requirements for long battery life, extended coverage, high scalability, and low device and deployment costs. There are several design and deployment challenges such as media access control, spectrum management,

link optimization and adaptability, energy harvesting, duty cycle restrictions, coexistence and interference, interoperability and heterogeneity, security and privacy, and others. LPWAN Technologies for IoT and M2M Applications is intended to provide a one-stop solution for study of LPWAN technologies as it covers a broad range of topics and multidisciplinary aspects of LPWAN and IoT. Primarily, the book focuses on design requirements and constraints, channel access, spectrum management, coexistence and interference issues, energy efficiency, technology candidates, use cases of different applications in smart city, healthcare, and transportation systems, security issues, hardware/software platforms, challenges, and future directions. One stop guide to the technical details of various low power long range technologies such as LoRaWAN, Sigfox, NB-IoT, LTE-M and others Describes the design aspects, network architectures, security issues and challenges Discusses the performance, interference, coexistence issues and energy optimization techniques Includes LPWAN based intelligent applications in diverse areas such as smart city, traffic management, health and others Presents the different hardware and software platforms for LPWANs Provides guidance on selecting the right technology for an application

*Pesharim* Maurya P. Horgan, 2023-12-11 Among the Hebrew documents recovered from the Qumran caves are eighteen texts distinguished by the fact that each is a continuous commentary on or an interpretation of a single biblical book. These texts are called *pesharim* because each section of interpretation following a biblical citation is introduced by one of several formulas using the word *pēser*, interpretation (plural: *pēsārim*). The documents that are extant preserve portions of commentaries on the book of Psalms and on the prophetic books of Isaiah, Hosea, Micah, Nahum, Habakkuk, Zephaniah. The monograph presents the Hebrew texts of the *pesharim*, an English translation, and notes on the texts that cover features of the Hebrew language in these scrolls, suggested restorations of lacunae, and possible

connections of the content of the commentary sections to historical events. Following the presentation of the texts is a discussion of the literary genre of peshar, treating the structure of the documents, the formulas employed, the modes of interpretation, and the relation of the pesharim to some other writings.

**Twelve Years a Slave** Solomon Northup,2024-01-04 Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a

travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Studies on Islam and Society in Southeast Asia William R. Roff, 2009 William R. Roff has spent more than forty years studying and writing about the modern history of Islam and Muslims, with special reference to Southeast Asia. With interests primarily in social and intellectual history he has contributed essays during this period to a wide range of learned journals and other publications. The present collection reprints a selection of the most notable of these, from historiographical and methodological studies to the development of Islamic educational and other institutions, the nature of the Arab presence in Southeast Asia, and the social significance of the hajj or pilgrimage to Mecca. The author has been a formative influence on two generations of students and other scholars, and this reissue in accessible form of seminal but scattered essays will be widely welcomed.

**Cyclic Polymers** E.R. Semlyen, 2012-12-06 Synthetic polymers based on long chain molecules have been investigated intensively for over 50 years. They have found important applications as plastics, fibres, rubbers and other materials. The chain molecules may be simple linear structures or they may be branched or cross-linked. During the past decade, sharp fractions of the first synthetic cyclic polymer have been prepared. These fractions of cyclic poly(dimethyl siloxane) consist of ring molecules containing hundreds of skeletal bonds. Some of their properties have been found to be quite different from those of the corresponding linear polymers. Synthetic cyclic polymers, including cyclic polystyrene, have joined the naturally occurring circular DNAs as examples of substantially large ring molecules. This book aims to review current knowledge of cyclic polymers and biological ring macromolecules. In addition, it discusses theories of cyclic macromolecules and describes cyclization processes involving long chain molecules. Since 1865, when Kekule proposed a simple ring structure for benzene, larger and larger ring molecules have been synthesized in the laboratory and discovered in nature. Many more examples are to be expected in the future. In time, large ring molecules should take their proper place alongside long chain molecules as one of the two possible constituent structural units of polymers.

**Ten Years of Discovery in the Wilderness of Judaea** J. T. Milik, 2009-10-01 J. T. MILIK was a Polish priest who, after brilliant studies in Rome, worked in Jerusalem from 1952, first at the École Biblique et Archéologique Française, and later in connection with the Centre National de la Recherche Scientifique. He took part in the exploration of the Qumrân. From the beginning, he collaborated in the work of publication. With Father D. Barthélemy he published the fragments from Cave I, Qumrân Cave I (Discoveries in the Judaean Desert), Oxford 1955; he was the most active member of the international team, which prepared for publication the considerable collection from Cave IV. The

fragments from Cave V and the copper rolls from Cave III were entrusted to him. He would eventually publish the Hebrew and Aramaic documents from Murabba'at; he published some fragments from Hirbet Mird and from unidentified caves in the south. He had been given direct access to all the documents still unpublished, which were kept together in the Palestine Archaeological Museum in Jerusalem. In short, this work was written by a specialist who knew better than anyone the places and documents of which he spoke.
