Hamito-Semitic Etymological Dictionary Vladimir E. Orel, Olga V. Stolbova, 2015-11-02 The Hamito-Semitic Etymological Dictionary, a project in the making since 1986, is the first dictionary to reflect the vocabulary of the extinct Proto-Hamito-Semitic (Proto-Afro-Asiatic) language. Reconstructed on the basis of Semitic, Ancient Egyptian, Berber, Chadic and Cushitic linguistic groups, the Dictionary plays an indispensable role in further research into the field of historical linguistics. It surpasses by far the only comparable work to date, M. Cohen's *Essai comparatif sur le vocabulaire et la phonétique du chamito-semitique*, published in 1947, which contains much less material and is now outdated. The Dictionary comprises more than 2,500

lexical items and includes an introduction providing valuable information on the historical phonology of Hamito-Semitic as well as an index of meanings, which supplies linguistics, archaeologists and scholars of ancient history with added insight into the culture of the ancient speakers of Proto-Hamito-Semitic. An invaluable contribution to the field of Afro-Asiatic Studies, The Hamito-Semitic Etymological Dictionary will be used and discussed by scholars for years to come.

A Grammar of the Ugaritic Language Daniel Sivan, 2008-02 Ugaritic, discovered in 1929, is a Northwest Semitic language documented on clay tablets (about 1,250 texts) and dated from the period between the fourteenth and the twelfth centuries B.C.E. The documents are of various types: literary, administrative, lexicological. Numerous Ugaritic tablets contain portions of a poetic cycle pertaining to the Ugaritic pantheon. Another group of texts, the administrative documents, sheds light on the organization of Ugarit, thus contributing greatly to our understanding of the history and culture of the biblical and Northwest Semitic world. --BOOK JACKET.

Who's Who in Food Chemistry Reto Battaglia, Werner Pfannhauser, Michael Murkovic, 2013-06-29 This directory comprises data on more than 800 top European food scientists including their complete addresses, telephone and fax numbers, as well as such background information as fields of expertise, research topics and consulting activities. Additionally, private, governmental and official laboratories for food control have also

been included, while exhaustive indexes allow easy access to all entries. The increasing demand for internationally approved professionals in all fields of food science makes this volume an invaluable source of information for the food industry, R + D institutions, consultants, private laboratories and university departments seeking cooperation and service partners or consultancy.

Nanotechnology in Skin, Soft Tissue, and Bone

Infections Mahendra Rai, 2020-01-14 The main goal of the present book is to deal with the role of nanobiotechnology in skin, soft tissue and bone infections since it is difficult to treat the infections due to the development of resistance in them against existing antibiotics. The present interdisciplinary book is very useful for a diverse group of readers including nanotechnologists, medical microbiologists, dermatologists, osteologists, biotechnologists, bioengineers. Nanotechnology in Skin, Soft-Tissue, and Bone Infections is divided into four sections: Section I- includes role of nanotechnology in skin infections such as atopic dermatitis, and nanomaterials for combating infections caused by bacteria and fungi. Section II- incorporates how nanotechnology can be used for soft-tissue infections such as diabetic foot ulcer and other wound infections; Section III- discusses about the nanomaterials in artificial scaffolds bone engineering and bone infections caused by bacteria and fungi; and also about the toxicity issues generated by the nanomaterials in general and nanoparticles in particular. The readers will be immensely enriched by the knowledge of new and emerging nanobiotechnologies in a variety of platforms.

Transforming Japanese Business Anshuman Khare, Hiroki

Ishikura, William W. Baber, 2019-12-06 This book explores how the business transformation taking place in Japan is influenced by the digital revolution. Its chapters present approaches and examples from sectors commonly understood to be visible arenas of digital transformation—3D printing and mobility, for instance—as well as

some from not-so-obvious sectors, such as retail, services, and fintech. Business today is facing unprecedented change especially due to the adoption of new, digital technologies, with a noticeable transformation of manufacturing and services. The changes have been brought by advanced robotics, the emergence of artificial intelligence, and digital networks that are growing in size and capability as the number of connected devices explodes. In addition, there are advanced manufacturing and collaborative connected platforms, including machine-to-machine communications. Adoption of digital technology has caused process disruptions in both the manufacturing and services sectors and led to new business models and new products. While examining the preparedness of the Japanese economy to embrace these changes, the book explores the impact of digitally influenced changes on some selected sectors from a Japanese perspective. It paints a big picture in explaining how a previously manufacturing-centric, successful economy adopts change to retain and rebuild success in the global environment. Japan as a whole is embracing, yet also avoiding—innovating but also restricting—various forms of digitalization of life and work. The book, with its 17 chapters, is a collaborative effort of individuals contributing diverse points of view as technologists, academics, and managers.

Proceedings of International Conference on Data Science and Applications Mukesh Saraswat, Sarbani Roy, Chandreyee Chowdhury, Amir H. Gandomi, 2021-11-22 This book gathers outstanding papers presented at the International Conference on Data Science and Applications (ICDSA 2021), organized by Soft Computing Research Society (SCRS) and Jadavpur University, Kolkata, India, from April 10 to 11, 2021. It covers theoretical and empirical developments in various areas of big data analytics, big data technologies, decision tree learning, wireless communication, wireless sensor networking, bioinformatics and systems, artificial neural networks, deep

learning, genetic algorithms, data mining, fuzzy logic, optimization algorithms, image processing, computational intelligence in civil engineering, and creative computing.

Dictionary of Medical Acronyms and Abbreviations

Stanley Jablonski, 2004-09 This dictionary lists acronyms and abbreviations occurring with a reasonable frequency in the literature of medicine and the health care professions.

Abbreviations and acronyms are given in capital letters, with no punctuation, and with concise definitions. The beginning sections also include symbols, genetic symbols, and the Greek alphabet and symbols.

LPWAN Technologies for IoT and M2M Applications

Bharat S. Chaudhari, Marco Zennaro, 2020-04-02 Low power wide area network (LPWAN) is a promising solution for long range and low power Internet of Things (IoT) and machine to machine (M2M) communication applications. The LPWANs are resource-constrained networks and have critical requirements for long battery life, extended coverage, high scalability, and low device and deployment costs. There are several design and deployment challenges such as media access control, spectrum management, link optimization and adaptability, energy harvesting, duty cycle restrictions, coexistence and interference, interoperability and heterogeneity, security and privacy, and others. LPWAN

Technologies for IoT and M2M Applications is intended to provide a one-stop solution for study of LPWAN technologies as it covers a broad range of topics and multidisciplinary aspects of LPWAN and IoT. Primarily, the book focuses on design requirements and constraints, channel access, spectrum management, coexistence and interference issues, energy efficiency, technology candidates, use cases of different applications in smart city, healthcare, and transportation systems, security issues, hardware/software platforms, challenges, and future directions. One stop guide to the technical details of various low power long range technologies such as LoRaWAN, Sigfox, NB-IoT, LTE-M and others Describes

the design aspects, network architectures, security issues and challenges Discusses the performance, interference, coexistence issues and energy optimization techniques Includes LPWAN based intelligent applications in diverse areas such as smart city, traffic management, health and others Presents the different hardware and software platforms for LPWANs Provides guidance on selecting the right technology for an application

Ten Years of Discovery in the Wilderness of Judaea J. T. Milik, 2009-10-01 J. T. MILIK was a Polish priest who, after brilliant studies in Rome, worked in Jerusalem from 1952, first at the École Biblique et Archéologique Française, and later in connection with the Centre National de la Recherche Scientifique. He took part in the exploration of the Qumran. From the beginning, he collaborated in the work of publication. With Father D. Barthélemy he published the fragments from Cave I, Qumran Cave I (Discoveries in the Judaean Desert), Oxford 1955; he was the most active member of the international team, which prepared for publication the considerable collection from Cave IV. The fragments from Cave V and the copper rolls from Cave III were entrusted to him. He would eventually publish the Hebrew and Aramaic documents from Murabba'at; he published some fragments from Hirbet Mird and from unidentified caves in the south. He had been given direct access to all the documents still unpublished, which were kept together in the Palestine Archaeological Museum in Jerusalem. In short, this work was written by a specialist who knew better than anyone the places and documents of which he spoke.

Twelve Years a Slave Solomon Northup, 2024-01-04
Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a

planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Studies on Islam and Society in Southeast Asia William R. Roff, 2009 William R. Roff has spent more than forty years studying and writing about the modern history of Islam and Muslims, with special reference to Southeast Asia. With interests primarily in social and intellectual history he has contributed essays during this period to a wide range of learned journals and other publications. The present collection reprints a selection of the most notable of these, from historiographical and methodological studies to the development of Islamic educational and other institutions, the nature of the Arab presence in Southeast Asia, and the social significance of the hajj or pilgrimage to Mecca. The author has been a formative influence on two generations of students and other scholars, and this reissue in accessible form of seminal but scattered essays will be widely welcomed.

Cyclic Polymers E.R. Semlyen, 2012-12-06 Synthetic polymers based on long chain molecules have been investigated intensively for over 50 years. They have found important applications as plastics, fibres, rubbers and other materials. The chain molecules may be simple linear structures or they may be branched or cross-linked. During the past decade, sharp fractions of the first synthetic cyclic polymer have been prepared. These fractions of cyclic poly(dimethyl siloxane) consist of ring molecules containing hundreds of skeletal bonds. Some of their properties have been found to be quite different from those of the corresponding linear polymers. Synthetic cyclic polymers, including cyclic polystyrene, have joined the naturally occurring circular DNAs as examples of substantially large ring molecules. This book aims to review current knowledge of cyclic polymers and biological ring macromolecules. In addition, it discusses theories of cyclic macromolecules and describes cyclization processes involving long chain molecules. Since 1865, when Kekule proposed a simple ring structure for benzene, larger and larger ring molecules have been synthesized in the laboratory and discovered in nature. Many more examples are to be expected in the future. In time, large ring molecules should take their proper place alongside long chain molecules as one of the two possible constituent structural units of polymers.
