**Localizing Apps** Johann Roturier,2015-05-08 The software industry has undergone rapid development since the beginning of the twenty-first century. These changes have had a profound impact on translators who, due to the evolving nature of digital content, are under increasing pressure to adapt their ways of working. *Localizing Apps* looks at these challenges by focusing on the localization of software applications, or apps. In each of the five core chapters, Johann Roturier examines: The role of translation and other linguistic activities in adapting software to the needs of different cultures (localization); The procedures required to prepare source content before it gets localized (internationalization); The measures taken by software companies to guarantee the quality and success of a localized app. With practical tasks, suggestions for further reading and concise chapter summaries, *Localizing Apps* takes a comprehensive look at the transformation processes and tools used by the software industry today. This text is essential reading for students, researchers and translators working in the area of translation and creative digital media.

*Developing Killer Web Apps with Dreamweaver MX and C#* Chuck White,2006-02-20 Dreamweaver MX 2004 is a great tool, and a great teacher. Its finely tuned support for ASP.NET makes it the fastest way to build serious data-driven web applications. And its transparent interface and the ultra-clean code it generates gives you ample opportunity to learn ASP.NET in its purest form. For those who aren't yet adept with ASP.NET, *Developing Killer Web Apps with Dreamweaver MX and C#* gives you the help you need interpreting what you see as Dreamweaver does its thing. This book provides a succinct and incisive tutorial on the C# syntax and classes that Dreamweaver uses to generate code for dynamic web applications. This is just the start, however. Once you've gotten your head around ASP.NET--or if it already is—you'll find this book to be a highly efficient guide to the business of saving time and solving difficult development problems with Dreamweaver as an integrated development environment. This includes help with some of Dreamweaver's most important, and yet most poorly documented, capabilities, such as working with stored procedures and

generating web services. Here's more of what you'll find covered inside: Building ASP.NET web controls Writing ASP.NET scripts Putting together web services using Dreamweaver Using SQL inside Dreamweaver Getting the most out of Dreamweaver's custom user control for .NET Working with DataGrids and other databound controls Validating pages Detailed examples address the real runtime problems that can adversely affect your applications, showing you how to avoid them, fix the ones that slip through, and make coding tweaks that measurably boost performance.

**Applications of Remote Sensing Data in Mapping of Forest Growing Stock and Biomass** José Aranha, 2021-09-01 This Special Issue (SI), entitled "Applications of Remote Sensing Data in Mapping of Forest Growing Stock and Biomass", resulted from 13 peer-reviewed papers dedicated to Forestry and Biomass mapping, characterization and accounting. The papers' authors presented improvements in Remote Sensing processing techniques on satellite images, drone-acquired images and LiDAR images, both aerial and terrestrial. Regarding the images' classification models, all authors presented supervised methods, such as Random Forest, complemented by GIS routines and biophysical variables measured on the field, which were properly georeferenced. The achieved results enable the statement that remote imagery could be successfully used as a data source for regression analysis and formulation and, in this way, used in forestry actions such as canopy structure analysis and mapping, or to estimate biomass. This collection of papers, presented in the form of a book, brings together 13 articles covering various forest issues and issues in forest biomass calculation, constituting an important work manual for those who use mixed GIS and RS techniques.

**Balancing Greenhouse Gas Budgets** Benjamin Poulter, Joseph Canadell, Daniel Hayes, Rona Thompson, 2022-05-09 Balancing Greenhouse Gas Budgets: Accounting for Natural and Anthropogenic Flows of CO<sub>2</sub> and other Trace Gases provides a synthesis of greenhouse gas budgeting activities across the world. Organized in four sections, including background, methods, case studies and opportunities, it is an interdisciplinary book covering both science and policy. All environments are covered, from terrestrial to ocean, along with atmospheric processes using models, inventories and observations to give a complete overview of greenhouse gas accounting. Perspectives presented give readers the tools necessary to understand budget activities, think critically, and use the framework to carry out initiatives. Written by a combination of experts across career stages, presenting an integrated perspective for graduate students and professionals alike Includes sections authored by those involved in both early and later IPCC assessments Provides an interdisciplinary resource that spans many topics and methodologies in oceanic, land and atmospheric processes

**E-Discovery Tools and Applications in Modern Libraries** de Smet, Egbert, Dhamdhere, Sangeeta, 2016-07-13 Technology has revolutionized the ways in which libraries store, share, and access information. As digital resources and tools continue to advance, so too do the opportunities for libraries to become more efficient and house more information. E-Discovery Tools and Applications in Modern Libraries presents critical research on the digitization of data and how this shift has impacted knowledge discovery, storage, and retrieval. This publication explores several emerging trends and concepts essential to electronic discovery, such as library portals, responsive websites, and federated search technology. The timely research presented within this publication is designed for use by librarians, graduate-level students, technology developers, and researchers in the field of library and information science.

Global Forest Carbon Runsheng Yin,2024-03-15 This book addresses the major policy, economic and financial issues encountered in global forest carbon. The global forest sector is expected to play a major role in achieving the Paris Agreement's temperature targets. Therefore, there is an urgent need to explore practical and promising solutions to the challenges facing carbon accounting and policy assessment as the global community undertakes forest sector actions—including the widely known REDD+ initiative. This book demonstrates how vital it is that we identify appropriate perspectives and formulate approaches to address these challenges in an integrated and effective manner. In doing so, it addresses many of the major issues, including the differential potentials for carbon sequestration within various forest ecosystems as well as for storage within a variety of harvested wood products, the joint production of timber and carbon, and the measurement and impact of forest carbon offsets and credits, results-based payments, and other nationally determined contributions centered differences as well. The book examines regional and country-level case studies from across the world and draws on the author's decades of experience working on forest policy and with the forest sector. Overall, this book highlights the technical and policy issues regarding forest sector carbon emission and removal to build useful perspectives, frameworks, and methods for addressing these issues successfully in the future. It advances the knowledge frontiers of global forest carbon policy, economics and finance as well as the ability to assess the effectiveness, efficiency, and equity of forest climate solutions. This book is essential reading for professionals and policymakers working at the intersection of forest policy, carbon storage and climate change, as well as students and researchers in the fields of forestry, natural resource management, climate change and nature-based solutions.

*Key technical issues of herbal medicines with reference to interaction with other medicines* ,2021-05-19 This document provides information on the critical technical issues related to interactions between herbal medicines and other medicines for health-care professionals, regulators, researchers, pharmacovigilance centres, manufacturers and consumers. The intention of this document is to provide as much concise information as possible, and to give direction and guidance on capitalizing resources to support informed decision-making and maximize the safe concurrent use of herbal medicines and other medicines. The concepts of beneficial and harmful herb-drug interaction (HDI)s are introduced, with documented examples from the published literature. Types of HDI and their mechanisms are outlined, and the relevance of in vitro, general screening and in vivo tests is included. Challenges faced in evaluating and monitoring HDIs, data collection, assessment and dissemination of information are briefly discussed. The education and training of health professionals and consumers are addressed, together with potential research strategies for further investigation of the mechanisms, incidence, monitoring and management of HDIs.

**Smart Resources in Ophthalmology** Parul Ichhpujani,Sahil Thakur,2018-06-06 This book provides information on how to extract the most from mobile applications and easily adapt and integrate them into daily practice. Today mobile applications that can optimize patient flow, help in examinations, perform anterior/posterior segment imaging, offer differential diagnosis and therapeutic options and even serve as patient drug reminders and councilors are easily available. Most of them have been developed by individuals and as a result lack marketing, even though they are free to download and use. Ophthalmology has always been at the

forefront of medicine when it comes to adopting the latest developments — be they lasers, off-label anti-VEGF drugs or biocompatible implants. Mobile phones and tablets have infiltrated our private and professional lives and they are here to stay. As such, this book explores the endless possibilities that mobile computing offers, and introduces the vista of opportunities for providing better care, one download at a time. As part of the series “Current Practices in Ophthalmology” this volume is intended for residents and fellows in-training, as well as general and specialist ophthalmologists.

Climate Change and Agroforestry Systems Abhishek Raj, Manoj Kumar Jhariya, Dhiraj Kumar Yadav, Arnab Banerjee, 2020-02-14 This new volume addresses the burning issues of the impact of climate change, the alteration of environmental quality, and subsequent mitigation and adaptation strategies through various agroecosystem practices, primarily in agroforestry. The book discusses in depth the impact of climate change on forests and other agroecosystems. It presents new research on mitigation strategies, looking at carbon sequestration in agricultural soils, environmental greening, natural resource management, and livelihood security. It provides a thorough analysis of the potential of various modern, improved, and scientific farming practices, such as climate-smart agriculture and agroforestry systems for climate change mitigation and adaptation. The book also examines the invasion of major fungal diseases in forests and agricultural crops due to climatic fluctuations and goes on to look at water and waste management practices.

**Teaching Electromagnetics** Krishnasamy T. Selvan, Karl F. Warnick, 2021-06-18 Teaching Electromagnetics: Innovative Approaches and Pedagogical Strategies is a guide for educators addressing course content and pedagogical methods primarily at the undergraduate level in electromagnetic theory and its applications. Topics include teaching methods, lab experiences and hands-on learning, and course structures that help teachers respond effectively to trends in learning styles and evolving engineering curricula. The book grapples with issues related to the recent worldwide shift to remote teaching. Each chapter begins with a high-level consideration of the topic, reviews previous work and publications, and gives the reader a broad picture of the topic before delving into details. Chapters include specific guidance for those who want to implement the methods and assessment results and evaluation of the effectiveness of the methods. Respecting the limited time available to the average teacher to try new methods, the chapters focus on why an instructor should adopt the methods proposed in it. Topics include virtual laboratories, computer-assisted learning, and MATLAB® tools. The authors also review flipped classrooms and online teaching methods that support remote teaching and learning. The end result should be an impact on the reader represented by improvements to his or her practical teaching methods and curricular approach to electromagnetics education. The book is intended for electrical engineering professors, students, lab instructors, and practicing engineers with an interest in teaching and learning. In summary, this book: Surveys methods and tools for teaching the foundations of wireless communications and electromagnetic theory Presents practical experience and best practices for topical coverage, course sequencing, and content Covers virtual laboratories, computer-assisted learning, and MATLAB tools Reviews flipped classroom and online teaching methods that support remote teaching and learning Helps instructors in RF systems, field theory, and wireless communications bring their teaching practice up to date Dr. Krishnasamy T. Selvan is Professor in the Department of Electronics & Communication Engineering, SSN College of Engineering, since June 2012. Dr. Karl F. Warnick is Professor in the Department of Electrical and Computer Engineering at BYU.
