Messiaen's Musical Techniques: The Composer's View and Beyond Gareth Healey, 2016-04-22 Despite Messiaen's position as one of the greatest technical innovators of the twentieth century, his musical language has not been comprehensively defined and investigated. The composer's 1944 theoretical study, *The Technique of My Musical Language*, expounds only its initial stages, and while his posthumously published *Traité de rythme, de couleur, et d'ornithologie* contains detailed explanations of selected techniques, in most cases the reader is left to define these more precisely by observing them in the context of Messiaen's analyses of his own works. Technical processes are nevertheless in many cases the primary components of a work or movement. For instance, personages dominate 'Joie du sang des étoiles' from the *Turangalîla-symphonie*, and in certain cases, such as 'L'échange' from the *Vingt regards sur l'Enfant-Jésus*, the process (asymmetric augmentation) is the only structuring element present. Given this reliance on idiosyncratic techniques, clear comprehension of the music is impossible without a detailed knowledge of Messiaen's methods. Gareth Healey charts their development and interconnections, considers their relationship with formal structures, and applies them in refined and extended form to works for which Messiaen himself left no published analysis.

Composed Rosanne Cash, 2010-08-10 A candid and moving memoir from the critically acclaimed singer and songwriter For thirty years as a musician, Rosanne Cash has enjoyed both critical and commercial success, releasing a series of albums that are as notable for their lyrical intelligence as for their musical excellence. Now, in her memoir, Cash writes compellingly about her upbringing in Southern California as the child of country legend Johnny Cash, and of her relationships with her mother and her famous stepmother, June Carter Cash. In her account of her development as an artist she shares memories of a hilarious stint as a twenty-year-old working for Columbia Records in London, recording her own first album on a German label, working her way to success, her marriage to Rodney Crowell, a union that made them Nashville's premier couple, her relationship with the country music establishment, taking a new direction in her music and leaving Nashville to move to New York. As well as motherhood, dealing with the deaths of her parents, in part through music, the process of songwriting, and the fulfillment she has found with her current husband and musical collaborator, John Leventhal. Cash has written an unconventional and compelling memoir that, in the tradition of M. F. K. Fisher's *The Gastronomical Me* and Frank Conroy's *Stop-Time*, is a series of linked pieces that combine to form a luminous and brilliant whole.

Rachmaninoff: Composer, Pianist, Conductor Barrie Martyn, 2017-07-05 This study is the first to consider all three of Rachmaninoff's careers in detail. After surveying his place in Russian musical history and his creative activity, the author examines, with musical examples, each working chronological order against the background of the composer's life. Among the many subjects upon which new light is shed are the operas, the songs, and the religious music. Rachmaninoff's remarkable career as a pianist, his style of playing and repertoire are analysed along with his historically important contribution to the gramophone and his work for the reproducing piano. The book includes a survey of his activity as a conductor. There are extensive references to Russian sources and the first appearance of a complete Rachmaninoff discography is included. This book is the only comprehensive study in any language of the three aspects of Rachmaninoff's musical career and is a stimulating read for music lovers everywhere.

Duke Ellington, Jazz Composer Ken Rattenbury, 1990-01-01 American composer, pianist and orchestra leader Duke Ellington was the first genuine jazz composer of truly international status. In this book Ken Rattenbury offers a thorough musical analysis of Ellington's works, assessing the

extent to which Ellington drew on the black music traditions of blues and ragtime and the music of Tin Pan Alley, and examining how he integrated black folk music practices with elements of European art music. Rattenbury investigate's Ellington's methods of composition, focusing on works written, performed and recorded between 1939 and 1941, years that witnessed the full flowering of Ellington's genius. He also discusses the criteria Ellington used to select his musicians.

Composer's Desk Reference for the Classic Guitar CHRISTOPHER KACHIAN, 2010-10-07 Traditionally the classic guitar has been either excluded or inadequately represented in orchestration textbooks, resulting in much misinformation about its technique, its practicality in various performance contexts, and its character. the guitar's unique tuning, broad timbral variety and intimate nature pose a formidable challenge to non-guitarist composers, for whom an extensive amount of time would be required to gain even a minimal hands-on acquaintance. for most composers this is an unrealistic expectation, leading to time-consuming consultations and extensive drafting or rewriting. The purpose of this book is to provide the non-guitarist composer with the fundamental tools needed to write idiomatically for the guitar. the first of its kind for the guitar, the reference was written in consultation with dozens of composers and conceived with three types of end users in mind:•

Reflections of an American Composer Arthur Berger, 2002-11-28 In this engrossing collection of essays, distinguished composer, theorist, journalist, and educator Arthur Berger invites us into the vibrant and ever-changing American music scene that has been his home for most of the twentieth century. Witty, urbane, and always entertaining, Berger describes the music scene in New York and Boston since the 1930s, discussing the heady days when he was a member of a tight-knit circle of avant-garde young composers mentored by Aaron Copland as well as his participation in a group at Harvard University dedicated to Stravinsky. As Virgil Thomson's associate on the New York Herald Tribune and founding editor of the prestigious Perspectives of New Music, Berger became one of the preeminent observers and critics of American music. His reflections on the role of music in contemporary life, his journalism career, and how changes in academia influence the composition and teaching of music offer a unique perspective informed by Berger's abundant intelligence and experience.

Features the music of: Timothy Broege, Michael Colgrass, Michael Daugherty, David Gillingham, John Harbison, Karel Husa, Alfred Reed and others.

Electrical and Optoelectronic Properties of the Nanodevices Composed of Two-Dimensional Materials Cheng-Hua Liu, 2018-08-22 This thesis focuses on the transport and magneto-transport properties of graphene p-n-p junctions, such as the pronounced quantum Hall effect, a well-defined plateau-plateau transition point, and scaling behavior. In addition, it demonstrates persistent photoconductivity (PPC) in the monolayer MoS₂ devices, an effect that can be attributed to random localized potential fluctuations in the devices. Further, it studies scaling behavior at zeroth Landau level and high performance of fractional values of quantum Hall plateaus in these graphene p-n-p devices. Moreover, it demonstrates a unique and efficient means of controlling the PPC effect in monolayer MoS₂. This PPC effect may offer novel functionalities for

MoS2-based optoelectronic applications in the future.

Barely Composed: Poems Alice Fulton,2015-02-02 Fulton is exactly the kind of poet Shelley had in mind when he said 'Poets are the unacknowledged legislators of the world.' —Verse In this eagerly awaited collection of new poems—her first in over a decade—Alice Fulton reimagines the great lyric subjects—time, death, love—and imbues them with fresh urgency and depth. Barely Composed unveils the emotional devastations that follow trauma or grief—extreme states that threaten psyche and language with disintegration. With rare originality, the poems illuminate the deepest suffering and its aftermath of hypervigilance and numbness, the formal feeling described by Emily Dickinson. Elegies contemplate temporal mysteries—the brief span of human/animal life, the nearly eternal existence of stars and nuclear fuel, the enduring presence of the arts—and offer unsparing glimpses of personal loss and cultural suppressions of truth. Under the duress of silencing, whether chosen or imposed, language warps into something uncanny, rich, and profoundly moving. Various forms of inscription—coloring book to redacted document—enact the combustible power of the unsaid. Though anguish is the universal language, there also is joy in the reciprocity of gifts and creativity, intellect and intimacy. Gorgeous vintage rhetorics merge with incandescent contemporary registers, and this recombinant linguistic mix gives rise to poems of disarming power. Visionaries—truth tellers, revelators, beholders—offer testimony as beautiful as it is unsettling. Shimmering with the good strangeness of poetry, Barely Composed bears witness to love's complexities and the fragility of existence. In the midst of cruelty, a world in which "the pound is by the petting zoo," Fulton's poems embrace the inextinguishable search for goodness, compassion, and the principles of tranquility.

The Composer-pianists Robert Rimm,2002 The recordings made by Marc-Andre Hamelin in recent years have cast new light on an extraordinary group of composers - Alkan, Busoni, Feinberg, Godowsky, Medtner, Rachmaninov, Scriabin, and Sorabji - whose works heralded a Golden Age of virtuosic writing for the piano. The Eight, as author Robert Rimm has termed these composer-pianists, have much in common, traits shared in our own age with Marc-Andre Hamelin, their foremost interpreter. For all their evident differences of age, nationality, and philosophy, they each created music of unprecedented ingenuity - often complex and of immense scale - that stretched the limits of the piano's capabilities. And all were genuine virtuosos with the technical resources to play these demanding works in public. The volume includes rare photographs and concludes with an extensive bibliography, listings of the complete solo piano works of The Eight, and discographies of their solo piano recordings. In exploring the art of those who knew their instrument both as composers and as pianists, this book serves, in the words of pianist Stephen Hough, both as a fascinating, exhaustive study of the riches of the past and as a stimulating inspiration for the future.-BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Bach's Musical Universe: The Composer and His Work Christoph Wolff,2020-03-24 A concentrated study of Johann Sebastian Bach's creative output and greatest pieces, capturing the essence of his art. Throughout his life, renowned and prolific composer Johann Sebastian Bach articulated his views as a composer in purely musical terms; he was notoriously reluctant to write about his life and work. Instead, he methodically organized certain pieces into carefully designed collections. These benchmark works, all of them without parallel or equivalent, produced a steady stream of transformative ideas that stand as paradigms of Bach's musical art. In this companion volume to his Pulitzer Prize-finalist biography, Johann Sebastian Bach: The Learned Musician, leading Bach scholar Christoph Wolff takes his cue from his famous subject. Wolff delves deeply into the composer's own rich selection of collected music, cutting across conventional boundaries of era, genre, and instrument. Emerging from a complex and massive oeuvre, Bach's Musical Universe is a focused discussion of a meaningful selection of compositions—from the famous Well-Tempered Clavier, violin and cello solos, and Brandenburg Concertos to the St. Matthew Passion, Art of Fugue, and B-minor Mass. Unlike any study undertaken before, this book details Bach's creative process across the various instrumental and vocal genres. This array of compositions illustrates the depth

and variety at the essence of the composer's musical art, as well as his unique approach to composition as a process of imaginative research into the innate potential of his chosen material. Tracing Bach's evolution as a composer, Wolff compellingly illuminates the ideals and legacy of this giant of classical music in a new, refreshing light for everyone, from the amateur to the virtuoso.

The Rubato Composer Music Software Gérard Milmeister, 2009-04-05 Both modern mathematical music theory and computer science are strongly influenced by the theory of categories and functors. One outcome of this research is the data format of denotators, which is based on set-valued presheaves over the category of modules and diaffine homomorphisms. The functorial approach of denotators deals with generalized points in the form of arrows and allows the construction of a universal concept architecture. This architecture is ideal for handling all aspects of music, especially for the analysis and composition of highly abstract musical works. This book presents an introduction to the theory of module categories and the theory of denotators, as well as the design of a software system, called Rubato Composer, which is an implementation of the category-theoretic concept framework. The application is written in portable Java and relies on plug-in components, so-called rubettes, which may be combined in data flow networks for the generation and manipulation of denotators. The Rubato Composer system is open to arbitrary extension and is freely available under the GPL license. It allows the developer to build specialized rubettes for tasks that are of interest to composers, who in turn combine them to create music. It equally serves music theorists, who use them to extract information from and manipulate musical structures. They may even develop new theories by experimenting with the many parameters that are at their disposal thanks to the increased flexibility of the functorial concept architecture. Two contributed chapters by Guerino Mazzola and Florian Thalmann illustrate the application of the theory as well as the software in the development of compositional tools and the creation of a musical work with the help of the Rubato framework.
