Caffeinated Murray Carpenter, 2015-01-27 “You’ll never think the same way about your morning cup of coffee.”—Mark McClusky, editor in chief of Wired.com and author of *Faster, Higher, Stronger* Journalist Murray Carpenter has been under the influence of a drug for nearly three decades. And he’s in good company, because chances are you’re hooked, too. Humans have used caffeine for thousands of years. A bitter white powder in its most essential form, a tablespoon of it would kill even the most habituated user. This addictive, largely unregulated substance is everywhere—in places you’d expect (like coffee and chocolate) and places you wouldn’t (like chewing gum and

fruit juice), and Carpenter reveals its impact on soldiers, athletes, and even children. It can make you stronger, faster, and more alert, but it's not perfect, and its role in health concerns like obesity and anxiety will surprise you. Making stops at the coffee farms of central Guatemala, a synthetic caffeine factory in China, and an energy shot bottler in New Jersey, among numerous other locales around the globe, Caffeinated exposes the high-stakes but murky world of caffeine, drawing on cutting-edge science and larger-than-life characters to offer an unprecedented understanding of America's favorite drug.

Environmental Chemistry in the Lab Ruth Ann Murphy,2022-08-31 Environmental Chemistry in the Lab presents a comprehensive approach to modern environmental chemistry laboratory instruction, together with a complete experimental experience. The laboratory experiments have an introduction for the students to read, a pre-lab for them to complete before coming to the lab, a data sheet to complete during the lab, and a post-lab which would give them an opportunity to reinforce their understanding of the experiment completed. Instructor resources include a list of all equipment and supplies needed for 24 students, a lab preparation guide, an answer key to all pre-lab and post-lab questions, sample data for remote learners, and a suggested rubric for grading the labs. Additional features include: • Tested laboratory exercises with instructor resources for environmental science students • Environmental calculations, industrial regulation, and environmental stewardship • Classroom and remote exercises • An excellent, user-friendly, and thought-provoking presentation which will appeal to students with little or no science background • A qualitative approach to the chemistry behind many of our environmental issues today

It traces Starbucks's meteoric rise from a small Seattle-based company to an international powerhouse, chronicling how the changing executive leadership affected corporate strategy and direction. well as how the corporation has shaped and been shaped by important social causes. An unbiased look at the controversies that have surrounded Starbucks over the years will help readers better understand these contentious issues. Coffee Lab Saturdays Alexia Saleem, 2021-11-04 Five very different women form an unlikely friendship after a chance meeting at Coffee Lab, a Hampstead coffee shop. Over a period of eight weeks Astrid, Gillian, Stephanie, Helen and Tracy meet weekly and share insights into their innermost thoughts and feelings. As the story unfolds, it becomes apparent that often people's lives aren't what they seem on the outside. Every chapter is told from the perspective of one of the main characters and what she thinks of herself and her life, as compared to the lives of the other four women, and also what she thinks the other four women must think of her and her life. As is often the case, it becomes clear that what they think of themselves and what they think other people must think of them, is not always accurate.
