*Software Update for Your Mind* Daisy Papp, 2018-06-25 This book is all about clicking Yes to give your mind a Software Update! It's full of amazing ideas and tips to help you discard old habits and optimize your mind. It happens to all of us. We're typing on our computer or scrolling on our phone when suddenly we're interrupted by a little box that pops up reminding us it's time for a Software Update. Sometimes we choose Yes and let our machine clean itself out, discard files that are no longer useful, fix any bugs and update code to unleash new potential. Other times, we choose Ignore and our system struggles on for a little longer, waiting for that much-needed renewal. It's the same for our minds. However, most humans have an even stronger tendency to select Ignore when it comes to refreshing our own operating systems. The consequence of this is a mind filled with outdated ideas, beliefs, and coping mechanisms, all of which take up valuable space that could be used for new, updated, and more effective software. With this book, you will learn how to train your mind to adopt new thought processes and rid yourself of outdated concepts that prevent you from operating at your best. As a result, you will feel better, communicate better, and think better. It's time for a Software Update for Your Mind - Click Yes now!

**Concussion in Professional Team Sports: Time for a Harmonised Approach?** Alexandra Veuthey, 2021-03-20 The risk of athletes sustaining concussion while participating in professional team sports raises two serious concerns both nationally and internationally. First, concussion in sport carries a public health risk, given that injured athletes may have to deal with significant long-term medical complications, with some of the worst cases resulting in Chronic Traumatic Encephalopathy (CTE). Secondly, sports governing bodies are now exposed to the risk of financial and reputational damage as a consequence of legal proceedings being filed against them. A good example of this, among many other recent examples, is the case of the United States of America's National Football League (NFL), the governing body for American football, which, in 2015, committed to pay US\$ 1 billion to settle the class action filed by its former professional players. This book examines how to most efficiently reduce these public health and legal risks, and proposes a harmonised solution across sports and legal systems.
