*Android Malware* Xuxian Jiang,Yajin Zhou,2013-06-13 Mobile devices, such as smart phones, have achieved computing and networking capabilities comparable to traditional personal computers. Their successful consumerization has also become a source of pain for adopting users and organizations. In particular, the widespread presence of information-stealing applications and other types of mobile malware raises substantial security and privacy concerns. Covering key topics like the Android malware history, malware behavior and classification, as well as, possible defense techniques.

*Oskar and the Things* Andrus Kivirahk,2022-09-15 One summer, when both his parents are away for work, Oskar is sent to the countryside to live with his grandma. A dreary prospect turns into disaster when Oskar realises he left his mobile phone back at home. What will he do all summer now? Lonely and bored, Oskar crafts a phone out of a block of wood he finds in the shed and uses it to pretend to call things. To his surprise, the things reply! He speaks to a tough-talking iron, a poetising bin, a bloodthirsty wardrobe, a red balloon that gets tangled in the crown of a birch tree, and many more. Oskar finds himself in high demand, helping the things solve their problems and achieve their dreams. Oskar and the Things is a charming book about the power of the imagination and friendship, by Estonia's leading children's writer, Andrus Kivirähk. With a lively translation by Adam Cullen, and the original illustrations by Anne Pikkov, it is the perfect gift for an introverted child with a rich inner life.

CISIS aims to offer a meeting opportunity for academic and industry-related researchers belonging to the various, vast communities of Computational Intelligence, Information Security, and Data Mining. The need for intelligent, flexible behaviour by large, complex systems, especially in mission-critical domains, is intended to be the catalyst and the aggregation stimulus for the overall event. After a through peer-review process, the CISIS 2012 International Program Committee selected 30 papers which are published in these conference proceedings achieving an acceptance rate of 40%. In the case of ICEUTE 2012, the International Program Committee selected 4 papers which are published in these conference proceedings. The selection of papers was extremely rigorous in order to maintain the high quality of the conference and we would like to thank the members of the Program Committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference and the CISIS and ICEUTE conferences would not exist without their help.
