Sadie Mae Baird ... Judge Not Carolyn Arkison, 2009-05-01 Sadie Mae Baird, canine avatar, returns in this her fourth book, *SADIE MAE BAIRD...Judge Not!* Together with her Gram, author Carolyn Arkison, Sadie encourages her readers to judge not appearances, judge not circumstances and judge not outcomes. Sadie uses everyday examples of both human and animal encounters which, while appearing to be extraordinary and challenging, may in fact be disguised opportunities for expanded life experience and personal growth. Within the pages of this book, you will laugh, you will cry and you will be amazed as Sadie finds priceless lessons hidden within the mundane dramas of day-to-day living. Sadie makes it all so very simple. All too often life can seem overwhelming and frenzied. Sadie finds humor in the outrageous and teaches us to laugh at ourselves. Her attitude is truly refreshing!

*Intelligent Systems Design and Applications* Ajith Abraham, Katrin Franke, Mario Köppen, 2013-12-20 The proceedings of the Third International Conference on Intelligent Systems Design and Applications (ISDA 2003) held in Tulsa, USA, August 10-13. Current research in all areas of computational intelligence is presented including design of artificial neural networks, fuzzy systems, evolutionary algorithms, hybrid computing systems, intelligent agents, and their applications in science, technology, business and commerce. Main themes addressed by the conference are the architectures of intelligent systems, image, speech and signal processing, internet modeling, data mining, business and management applications, control and automation, software agents and knowledge management.

E-business Brian Stanford-Smith, Paul T. Kidd, 2000 How can the Internet and world wide web improve my long-term competitive advantage? This book helps answer this question by providing a better understanding of the technologies, their potential applications and the ways they can be used to add value for customers, support new strategies, and improve existing operations. It is not just about e-commerce but the broader theme of e-business which affects products, business processes, strategies, and relationships with customers, suppliers, distributors and competitors. To cover future trends, the editors have collected papers from authors operating at the frontiers of the developments so the reader can more appreciate the directions in which these technologies are heading. The resulting 165 essays have been collated into ten sections, which have been grouped in three parts: key issues, applications areas and applications, tools and technologies. A business rarely makes radical changes but is constantly making adjustments to circumstances. Businesses must now adapt to the global implications of the Internet and world wide web. This book hopes to aid awareness of the implications so that the changes are managed wisely.

Character Assassination throughout the Ages M. Icks, E. Shiraev, 2014-07-17 Using a variety of cases from history and today's life, the book examines character attackers targeting the private lives, behavior, values, and identity of their victims. Numerous historical examples show that character assassination has always been a very effective weapon to win political battles or settle personal scores.

**The CERT Oracle Secure Coding Standard for Java** Fred Long, Dhruv Mohindra, Robert C. Seacord, Dean F. Sutherland, David Svoboda, 2011-09-06 "In the Java world, security is not viewed as an add-on a feature. It is a pervasive way of thinking. Those who forget to think in a secure mindset end up in trouble. But just because the facilities are there doesn't mean that security is assured automatically. A set of standard practices has evolved over the years. The Secure® Coding® Standard for Java™ is a compendium of these practices. These are not theoretical research papers or product marketing blurbs. This is all serious, mission-critical, battle-tested, enterprise-scale stuff." —James A. Gosling, Father of the Java Programming Language An essential element of secure coding in the Java programming language is a well-documented and enforceable coding standard. Coding standards encourage programmers to follow a uniform set of rules determined by the requirements of the project and organization, rather than by the programmer's familiarity or preference. Once established, these standards can be used as a metric to evaluate source code (using manual or automated processes). The CERT® Oracle® Secure Coding Standard for Java™ provides rules designed to eliminate insecure coding practices that can lead to exploitable vulnerabilities. Application of the standard's guidelines will lead to higher-quality systems-robust systems that are more resistant to attack. Such guidelines are required for the wide range of products coded in Java-for devices such as PCs, game players, mobile phones, home appliances, and automotive electronics. After a high-level introduction to Java application security, seventeen consistently organized chapters detail specific rules for key areas of Java development. For each area, the authors present noncompliant examples and corresponding compliant solutions, show how to assess risk, and offer references for further information. Each rule is prioritized based on the severity of consequences, likelihood of introducing exploitable vulnerabilities, and cost of remediation. The standard provides secure coding rules for the Java SE 6 Platform including the Java programming language and libraries, and also addresses new features of the Java SE 7 Platform. It describes language behaviors left to the discretion of JVM and compiler implementers, guides developers in the proper use of Java's APIs and security architecture, and considers security concerns pertaining to standard extension APIs (from the javax package hierarchy). The standard covers security issues applicable to these libraries: lang, util, Collections, Concurrency Utilities, Logging, Management, Reflection, Regular Expressions, Zip, I/O, JMX, JNI, Math, Serialization, and JAXP.

**Oregon Running Legend Steve Prefontaine** Paul C. Clerici, 2022-08 In the Footsteps of Oregon's beloved U.S. Olympic Athlete, Activist, and Icon Born in the small town of Coos Bay, Oregon, Steve Prefontaine's meteoric rise to cross-country and track superstardom included national recognition in high school followed by state, national, and world records. From the University of Oregon track to a fourth-place finish in the 1972 Munich Olympic Games, he never stopped striving to make his mark on the world. Even today, his name conjures up images of athleticism, activism, and charisma. While his life tragically ended in a car accident at the youthful age of 24 - at which time he owned every American record from 2,000 to 10,000 meters and two to six miles - his legacy lives on. Join author and runner Paul C. Clerici as he brings you this legendary Oregon athlete.

*Product-Country Images* Nicolas Papadopoulos,Louise A Heslop,2014-05-01 This is the first-ever book about product and country images. It goes considerably beyond what was known until now about these images on buyer behavior and international market strategy. Thousands of companies use country identifiers as part of their international marketing strategy and hundreds of researchers have studied the ways in which these identifiers influence behavior. As markets become more international, the more prominently the origin of products will figure in sellers’and buyers’decisions. The time is ripe for practitioners and academicians to delve into the insights offered in this seminal volume so as to better prepare for meeting the competitive challenges of the global marketplace. National stereotyping and consumer biases in favor or against countries, based on image, have been known for some time to influence their marketplace decisions. Businesspeople who want to learn how to use country identifiers effectively, when to use them and when to avoid them, and how country images affect the behavior of consumers in their target markets will want to read this book cover to cover. Product-Country Images discusses the nature and role and influence of product-country images in international marketing strategy and consumer behavior. It is a wide-ranging and state-of-the-art book offering specific information and case studies to further understanding of the various aspects of this complex topic. Written by the world’s preeminent researchers in the field from both academic and business sectors--a total of twenty-nine researchers from eleven countries--Product-Country Images presents the work of some of the best minds in the area-Johansson, Morello, Nebenzahl and Jaffe, Crawford and Lumpkin, Yaprak, Liefeld, and Wall, and the editors, Papadopoulos and Heslop, who have also authored some of its chapters. The chapters cover areas related to the main theme from both theoretical and practical perspectives and address questions of international marketing strategy, public policy, and research methodology. The subject is treated at a level suitable for business executives, public policymakers, academic researchers, and university students. Generally, the influence of product country images is so pervasive that this will be an indispensable reference and guidebook to anyone interested in understanding better, and/or enhancing the effectiveness of, international consumer behavior, international marketing, and international marketing strategy. Academic researchers specializing in country-product images, international marketing, and other fields, such as decisionmaking, cultural anthropology, international behavior, and perhaps most importantly, social psychology for international relations, will find readily applicable information and new directions for further research. International business marketing practitioners and public policymakers will find the practical information on the role and importance of country image in attracting foreign investment, promoting a nation’s exports, protecting domestic markets from imports, and capitalizing on major international events for promoting national image immediately useful in formulating strategies and policies. International marketing/business students will be better prepared for a competitive world from being exposed to this field of knowledge and its implications which are relevant to many subdisciplines. The made-in notion is a matter of tremendous importance in international marketing strategy, public policymaking, and research. With this in mind, editors Papadopoulos and Heslop take special care to achieve a blend of practice and theory and of the strategic, policy, and research perspectives. As such, Product-Country Images is divided into five main sections so that readers will be able to find the information they need: In the first section, the chapters that introduce the subject, provide an overview of the field,
