Arnold Richard Massengill

We Were Here Patricia Seibert, 2001-12-01 Explains what time capsules are, what they contain, and what their creators hope to convey to future generations.

Capsule Mel Torrefranca, 2021-07-10 When a menacing app by the name of Capsule downloads itself onto sixteen-year-old Jackie's phone, she enters a game interlaced with reality. A game threatening to erase two strangers from her high school forever.

The Present is the Form of All Life Liz Flyntz, David Everitt Howe, 2016 Perhaps best known for the iconic desert monolith Cadillac Ranch and stunts like Media Burn, the radical architecture and media art group Ant Farm created an abundance of works across disciplines--including video, publications, built environments and performances. Throughout their career (1968-79), Ant Farm conceived a series of time capsules that focused not on the eternal but rather on the fleeting aspects of postwar American culture: consumer goods, media archives and tchotchkes. For various reasons, all of Ant Farm's time capsules failed to function, that is, to be opened at the allotted future time and the intact contents examined. Ant Farm's successor group, LST, has taken up the project with their contemporary work Ant Farm Media Van v.08 [Time Capsule] (2008). This work not only functions but updates the original's line of questioning, exploring notions of the time capsule in the digital age. The Present Is the Form of All Life represents the first comprehensive documentation of these overlooked ephemeral works. Including many previously unpublished images, this publication also boasts essays by Constance M. Lewallen, Steve Seid and Gabriella Giannachi, and a discussion between curator Rudolf Frieling and LST.

A Capsule Aesthetic Kate Mondloch, 2018-01-23 How new media art informed by feminism yields important and original insights about interacting with technologies In *A Capsule Aesthetic*, Kate Mondloch examines how new media installation art intervenes in the fields of technoscience and new materialism, showing how three diverse artists—Pipilotti Rist, Patricia Piccinini, and Mariko Mori—contribute to the urgent conversation about everyday technology and the ways it constructs our bodies. *A Capsule Aesthetic* establishes the unique insights that feminist theory offers to new media art and new materialisms, offering a fuller picture of human-nonhuman relations. In-depth readings of works by Rist, Piccinini, and Mori explore such questions as the role of the contemporary art museum in our experience of media art, how the human is conceived of by biotechnologies, and how installation art can complicate and enrich contemporary science's understanding of the brain. With vivid, firsthand descriptions of the artworks, Mondloch takes the reader inside immersive installation pieces, showing how they allow us to inhabit challenging theoretical concepts and nonanthropomorphic perspectives. Striving to think beyond the anthropocentric and fully consider the material world, *A Capsule Aesthetic* brings new approaches to questions surrounding our technology-saturated culture and its proliferation of human-to-nonhuman interfaces.

Iliyasu, Ke-Lin Du, 2021-09-09 This book includes the papers presented in 2nd International Conference on Image Processing and Capsule Networks [ICIPCN 2021]. In this digital era, image processing plays a significant role in wide range of real-time applications like sensing, automation, health care, industries etc. Today, with many technological advances, many state-of-the-art techniques are integrated with image processing domain to enhance its adaptiveness, reliability, accuracy and efficiency. With the advent of intelligent technologies like machine learning especially deep learning, the imaging system can make decisions more and more accurately. Moreover, the application of deep learning will also help to identify the hidden information in volumetric images. Nevertheless, capsule network, a type of deep neural network, is revolutionizing the image processing domain; it is still in a research and development phase. In this perspective, this book includes the state-of-the-art research works that integrate intelligent techniques with image processing models, and also, it reports the recent advancements in image processing techniques. Micro Electronic Pill is a modern wireless type of endoscopic monitoring system. Imagine a vitamin pill-sized camera that could travel through your body taking pictures, helping diagnose a problem which doctor previously would have found only through surgery. · It is being beneficially used for disease detection & abnormalities in human body. · Therefore it is also called as “Magic Pill For Health Care” I have endeavored in this Booklet to provide the recent information about the innovation of new device called Micro Electronic Pill in the field of Bio-Medical Measurement, which is mainly used for diagnosis of internal part mainly gastrointestinal system which cannot be easily done with the help of normal endoscope. The Glass Capsule Arnold Richard Massengill,2018-11-15 I get out of my truck, reach for my cane, and slowly walk the back road that passes through

the land of the old home place. I reach a familiar Popular tree where I would sit and day-dream as a young boy. The tree is much bigger now, but from its base it still provides a good view of the hollows and ridges off in the distance. I decide to sit and rest awhile. I smile as I remember the days when I run these hills. I sit comfortable in the soft green moss and reflect on my past life. The morning sun is warm and before I know it I am completely relaxed and dozing off. As always, with sleep comes a dream.

Colonoscopy and Colorectal Cancer Screening Marco Bustamante, 2013-02-13
Colorectal cancer (CRC) represents a major public health problem worldwide. Fortunately most CRCs originate from a precursor lesion, the adenoma, which is accessible and removable. This is the rationale for CRC screening programs, which are aimed to diagnose CRC at an early stage or even better to detect and resect the advanced adenoma before CRC has developed. In this background colonoscopy emerges as the main tool to achieve these goals with recent evidence supporting its role in CRC prevention. This book deals with several topics to be faced when implementing a CRC screening program. The interested reader will learn about the rationale and challenges of implementing such a program, the management of the detected lesions, the prevention of complications of colonoscopy, and finally the use of other screening modalities that are emerging as valuable alternatives. The relevance of the topics covered in it and the updated evidence included by the authors turn this book into a very useful tool to introduce the reader in this amazing and evolving field.

Yablon details how diverse Americans – from presidents and mayors to advocates for the rights of women, blacks, and workers – constructed prospective memories of their present. They did so by contributing not just written testimony to time capsules but also sources that historians and archivists considered illegitimate, such as photographs, phonograph records, films, and everyday artifacts. By offering a direct line to posterity, time capsules stimulated various hopes for the future. *Remembrance of Things Present* delves into these treasure chests to unearth those forgotten futures.
