Migration Guide to Firebird 3 Carlos Cantu,2016-07-31 Why a Migration Guide? Firebird 3 brings numerous innovations, such as the long-awaited full SuperServer's SMP support, network and database encryption, local user authentication in the database, improvements in the communication protocol, in addition to several new features in different areas of the DBMS. All this made the migration process from an older Firebird version a bit more complicated than it was in previous versions, where, basically, all you had to do was replace the server with the new Firebird version or, at worst, a backup and restore of the database. Moving to Firebird 3 can be a tricky process, and this Guide will help you in the process of migrating your existing databases and servers to Firebird 3, avoiding headaches and bad surprises! It also will give you tips regarding the use of Firebird 3 with legacy applications. Translating Religion Michael DeJonge,Christiane Tietz,2015-06-26 Translating Religion advances thinking about translation as a critical category in religious studies, combining theoretical reflection about processes of translation in religion with focused case studies that are international, interdisciplinary, and interreligious. By operating with broad conceptions of both religion and translation, this volume makes clear that processes of translation, broadly construed, are everywhere in both religious life and the study of religion; at the same time, the theory and practice of translation and the advancement of translation studies as a field has developed in the context of concerns about the possibility and propriety of translating religious texts. The nature of religions as living historical traditions depends on the translation of religion from the past into the present. Interreligious dialogue and the comparative study of religion require the translation of religion from one tradition to another. Understanding the historical diffusion of the world's religions requires coming to terms with the success and failure of translating a religion from one cultural context into another. Contributors ask what it means to translate religion, both textually and conceptually, and how the translation of religious content might differ from the translation of other aspects of human culture. This volume proposes that questions on the nature of translation find particularly acute expression in the domains of religion, and argues that theoretical approaches from translation studies can be fruitfully brought to bear on contemporary religious studies.
