Imagine Math 6 Michele Emmer,Marco Abate,2018-11-06 Imagine mathematics, imagine with the help of mathematics, imagine new worlds, new geometries, new forms. Imagine building mathematical models that make it possible to manage our world better, imagine combining music, art, poetry, literature, architecture and cinema with mathematics. Imagine the unpredictable and sometimes counterintuitive applications of mathematics in all areas of human endeavour. Imagination and mathematics, imagination and culture, culture and mathematics. This sixth volume in the series begins with a homage to the architect Zaha Hadid, who died on March 31st, 2016, a few weeks before the opening of a large exhibition of her works in Palazzo Franchetti in Venice, where all the Mathematics and Culture conferences have taken place in the last years. A large section of the book is dedicated to literature, narrative and mathematics including a contribution from Simon Singh. It discusses the role of media in mathematics, including museums of science, journals and movies. Mathematics and applications, including blood circulation and preventing crimes using earthquakes, is also addressed, while a section on mathematics and art examines the role of math in design. A large selection presents photos of mathematicians and mathematical objects by Vincent Moncorge. Discussing all topics in a way that is rigorous but captivating, detailed but full of evocations, it offers an all-embracing look at the world of mathematics and culture.

Valperga (Volume 1 of 2) (EasyRead Super Large 18pt Edition) Mary Wollstonecraft Shelley,2007 Castruccio Castracani, one of the most celebrated captains of his time, lived in the fourteenth century. He was of the family of the Antelminelli of Lucca; and, having at a very early age borne arms in favour of the Ghibelines, he was exiled by the Gue;phs. He served not long after in the armies of Philip king of France, who made war on the Flemings. In the sequel he repassed the Alps; and, having joined Uguccione Faggiuola, chief of the Ghibelines of Tuscany, he reduced Lucca, Pistoia, and several other towns. He became the ally of the emperor Louis of Bavaria, against pope John XXII, Robert king of Naples, and the Florentines. Louis of Bavaria gave him the investiture of Lucca under the denomination of Duke, together with the title of Senator of Rome. Nothing seemed able to oppose his courage and good fortune, when he was taken off by a premature death in 1330, in the forty -seventh year of his age.-Pref.

Hunters, Predators and Prey Frédéric Laugrand,Jarich Oosten†,2014-10-01 Inuit hunting traditions are rich in perceptions, practices and stories relating to animals and human beings. The authors examine key figures such as the raven, an animal that has a central place in Inuit culture as a creator and a trickster, and qupirruit, a category consisting of insects and other small life forms. After these non-social and inedible animals, they discuss the dog, the companion of the hunter, and the fellow hunter, the bear, considered to resemble a human being. A discussion of the renewal of whale hunting accompanies the chapters about animals considered 'prey par excellence': the caribou, the seals and the whale, symbol of the whole. By giving precedence to Inuit categories such as 'inua' (owner) and 'tarniq' (shade) over European concepts such as 'spirit 'and 'soul', the book compares and contrasts human beings and animals to provide a better understanding of human-animal relationships in a hunting society.

Breaking Rank Steven W. Coutinho,2018-05-24 There's only one thing that keeps people and nations back... It's a story that explains who they are, what they can and cannot do. Breaking Rank helps you to understand the mind and unlock people's true potential. Back Cover: How can you motivate people and empower them to make better choices, when stories about their social rank have imprisoned their minds? How can people's mindset not only negatively influence their own well-being and wealth, but also that of an entire society? This book provides a fresh perspective on the answers, as well as the tools to change that mindset. Steven Coutinho takes you on a fascinating journey into how the mind has evolved, how it is shaped by society and how it shapes society in turn. You will learn why some people think they can't, while others are convinced they can, how the story of color has stagnated post-colonial economies, and the story of capitalism has kept the West unequal. Whether you are simply interested in understanding behavior, or are a parent, teacher or manager ready to lead change, Breaking Rank is bound to shift and sharpen your perspective. You will never look at your own behavior – or the behavior of others – the same way again. Ten things you will learn from reading this book: THE ORIGIN OF STORIES #1. Origins of emotions and thoughts: you'll learn why some people are demotivated, and others think they "can't". #2. The rise of stories and why the story of color = the story of capitalism. #3. Bizarre behavior: why genocides occur, why more minorities are in jail and some groups have more children out of wedlock. THE MAKING OF CHOICES #4. Why people make the choices they make. #5. Why postcolonial societies show similar choice patterns that stand in the way of welfare. #6. Why the wealth in capitalist societies is so unequally distributed THE ROAD TO CHANGE #7. How mindfulness strengthens areas in the brain that increase emotional self-control and lead to improved decision making. #8. How education can be reformed by helping children understand WHO they are, WHAT they can do, and HOW they can do it. #9. How to motivate and empower people in organizations by changing the perceptions they have about themselves, their level of control and their skills. #10. How to discover the potential you already are...
