Handbook of Spent Hydroprocessing Catalysts Meena Marafi,Anthony Stanislaus,Edward Furimsky,2017-01-18 Handbook of Spent Hydroprocessing Catalysts, Second Edition, covers all aspects of spent hydroprocessing catalysts, both regenerable and non-regenerable. It contains detailed information on hazardous characteristics of spent and regenerated catalysts. The information forms a basis for determining processing options to make decisions on whether spent catalysts can be either reused on refinery site after regeneration or used as the source of new materials. For non-regenerable spent catalysts, attention is paid to safety and ecological implications of utilizing landfill and other waste handling and storage options to ensure environmental acceptance. As such, this handbook can be used as a benchmark document to develop threshold limits of regulated species. Includes experimental results and testing protocols which serve as a basis for the development of methodologies for the characterization of solid wastes Presents a database which assists researchers in selecting/designing research projects on spent catalysts, i.e., regeneration vs. rejuvenation and metal reclamation Provides the environmental laws, acts, and liabilities to raise awareness in safety and health issues in all aspects of spent catalysts Contains solid waste management procedures specific to hydroprocessing that serve as a model for designing research projects in other solid waste areas

Catalysts for Change Maria Martinez-Cosio,Mirle Rabinowitz Bussell,2013-05-29 Winner of the Community Development Society's 2014 Current Research Award! 21st Century Philanthropy and Community fills a gap in the literature on philanthropic organizations and how they intertwine with community development. Drawing first on the history of philanthropic funding, Maria Martinez-Cosio and Mirle Bussell look at developments in the last twenty years in detail, focussing on five key case studies from across America. The authors use their own first hand experiences and research to forge a new path for academic research in an area where it has been lacking. With the current economic climate forcing shrewd spending, foundations need all the guidance they can find on how to appropriately channel their funds in the best way. But how can these sorts of community projects be analyzed for effectiveness? Is there a quantitative rather than qualitative element which can be studied to give real feedback to those investing in projects? Arguing against a one-size-fits-all model, the authors illustrate the importance of context and relationships in the success of these projects.

Public Catalyst Manuel Bailo,2022-03-11 Demonstrates the existence of public space catalysts, as well as the need for their presence for an expectant or indifferent place to be activated. This work -- which understands that the city, now and always, has had and must have public spaces of intensity -- proposes urban catalysts as agents that are capable of activating a place that was previously indifferent. The comparative work of historical and recent cases, developed by research and drawings, has allowed us to discover that the vivid public spaces of identity and reference have been formed due to the urban effect caused by these agents that we call catalysts. Manuel Bailo's work includes a wide range of projects, ranging from urban scale to interiorism. It has been widely published and presented with awards. Co-published with University of Virginia: School of Architecture.
