Tales of the Rails Clayton Daniel Cook,1991

The Politics of Expertise in Cultural Labour Karen Patel,2020-03-16 What is expertise? In the arts, or cultural work, the experts in this area are commonly regarded to be art critics, dealers or intermediaries. Why are they considered experts? What about the expertise of the artists or cultural workers themselves? This book provides a much-needed account of the concept of expertise in cultural work, providing new insights into the individual experiences of cultural workers and the role of social media in their creative practice and development of expertise. It also explores the potential reasons for inequalities in the sector which centre not only on protected characteristics such as class, gender and race, but increasingly the digital divide. Drawing on interviews with cultural workers and an innovative social media analysis, this book highlights the characteristics of aesthetic expertise in production – the practical skills cultural workers hone and deploy over years of training and creative practice. This is a new take on aesthetic expertise, which is traditionally associated with those involved in the judgement of culture, such as critics, dealers and intermediaries. The book highlights how social media platforms both enable and constrain the development of practical aesthetic expertise, and the platforms' role in the mediation of the cultural object online. Finally, the book interrogates the power dimensions of expertise, focusing primarily on gender. Drawing on the work of Pierre Bourdieu, it explores how opportunities to develop aesthetic expertise, and the ability to use

social media platforms to signal that expertise, are not available to everyone. In this sense, the book adds new perspectives to the growing body of work on inequalities in the creative and cultural industries, as well as scholarship on social media and creative work. The book concludes with the argument that the term ‘expertise’ needs to be problematised and reclaimed by those who are not equally represented in the cultural industries, using gender as a case in point.

Our Biggest Experiment Alice Bell, 2021-09-21 Traversing science, politics, and technology, *Our Biggest Experiment* shines a spotlight on the little-known scientists who sounded the alarm to reveal the history behind the defining story of our age: the climate crisis. Our understanding of the Earth's fluctuating environment is an extraordinary story of human perception and scientific endeavor. It also began much earlier than we might think. In *Our Biggest Experiment*, Alice Bell takes us back to climate change science's earliest steps in the eighteenth and nineteenth centuries, through the point when concern started to rise in the 1950s and right up to today, where the “debate” is over and the world is finally starting to face up to the reality that things are going to get a lot hotter, a lot drier (in some places), and a lot wetter (in others), with catastrophic consequences for most of Earth's biomes. *Our Biggest Experiment* recounts how the world became addicted to fossil fuels, how we discovered that electricity could be a savior, and how renewable energy is far from a twentieth-century discovery. Bell cuts through complicated jargon and jumbles of numbers to show how we're getting to grips with what is now the defining issue of our time. The message she relays is ultimately hopeful; harnessing the ingenuity and intelligence that has driven the history of climate change research can result in a more sustainable and bearable future for humanity.

Undoing Optimization Alison B Powell, 2021-04-13 A unique examination of the civic use, regulation, and politics of communication and data technologies City life has been reconfigured by our use—and our expectations—of communication, data, and sensing technologies. This book examines the civic use, regulation, and politics of these technologies, looking at how governments, planners, citizens, and activists expect them to enhance life in the city. Alison Powell argues that the de facto forms of citizenship that emerge in relation to these technologies represent sites of contention over how governance and civic power should operate. These become more significant in an increasingly urbanized and polarized world facing new struggles over local participation and engagement. The author moves past the usual discussion of top-down versus bottom-up civic action and instead explains how citizenship shifts in response to technological change and particularly in response to issues related to pervasive sensing, big data, and surveillance in smart cities.

The Human Planet Simon L. Lewis, Mark A. Maslin, 2022-04-12 An exploration of the Anthropocene and “a relentless reckoning of how we, as a species, got ourselves into the mess we’re in today” (The Wall Street Journal). Meteorites, mega-volcanoes, and plate tectonics—the old forces of nature—have transformed Earth for millions of years. They are now joined by a new geological force—humans. Our actions have driven Earth into a new geological epoch, the Anthropocene. For the first time in our home planet's 4.5-billion-year history a single species is increasingly dictating Earth’s future. To some the Anthropocene symbolizes a future of

superlative control of our environment. To others it is the height of hubris, the illusion of our mastery over nature. Whatever your view, just below the surface of this odd-sounding scientific word—the Anthropocene—is a heady mix of science, philosophy, history, and politics linked to our deepest fears and utopian visions. Tracing our environmental impacts through time, scientists Simon Lewis and Mark Maslin reveal a new view of human history and a new outlook for the future of humanity in the unstable world we have created.

A Mink, a Fink, a Skating Rink Brian P. Cleary, 2017-08-01 What is a noun? It's easier to show than explain—and this book is brimming with examples. Free, Fair, and Alive David Bollier, Silke Helfrich, 2019-09-03 The power of the commons as a free, fair system of provisioning and governance beyond capitalism, socialism, and other -isms. From co-housing and agroecology to fisheries and open-source everything, people around the world are increasingly turning to 'commoning' to emancipate themselves from a predatory market-state system. Free, Fair, and Alive presents a foundational re-thinking of the commons — the self-organized social system that humans have used for millennia to meet their needs. It offers a compelling vision of a future beyond the dead-end binary of capitalism versus socialism that has almost brought the world to its knees. Written by two leading commons activists of our time, this guide is a penetrating cultural critique, table-pounding political treatise, and practical playbook. Highly readable and full of colorful stories, coverage includes: Internal dynamics of commoning How the commons worldview opens up new possibilities for change Role of language in reorienting our perceptions and political strategies Seeing the potential of commoning everywhere. Free, Fair, and Alive provides a fresh, non-academic synthesis of contemporary commons written for a popular, activist-minded audience. It presents a compelling narrative: that we can be free and creative people, govern ourselves through fair and accountable institutions, and experience the aliveness of authentic human presence.

The Art of Disruption Magid Magid, 2020-09-03 SHORTLISTED FOR BEST NON-FICTION BOOK BY A PARLIAMENTARIAN AT THE PARLIAMENTARY BOOK AWARDS 2021 'Read this book!' Caroline Lucas 'My money's on Magid.' Thandie Newton Thou shalt not ignore this book. Magid is magic! - Jarvis Cocker 'A man so inspiring you will have no choice but to cast your hopeless lethargy asunder' - Rufus Hound A guide to being courageous and community-minded, and to disrupting and dismantling age-old power structures in work, life and politics, written by someone who has done exactly that. Let's be honest. Magid Magid's story seems an unlikely one. He's a Somali-born black Muslim refugee who became the youngest ever Lord Mayor of Sheffield and one of the last UK MEPs. Magid has made headlines nationally and internationally for his creative ways of campaigning while not conforming to tradition and being unapologetically himself. Magid had no idea that the poster he dreamed up for a local music festival in 2018 would go viral. The poster contained the 10 commandments he tries to live by. He had no idea that this poster would come to represent a movement that has swept him to the heart of local and European establishment politics. Now, for the first time, he reveals the stories behind each of these 'commandments'; what drives him, the obstacles he overcame and what makes him hopeful. 'His voice and representation are inspirational and a force to reckon with.' Dr Shola Mos-Shogbamimu, lawyer, activist and author 'It's easy to problematise the world, but Magid has offered us answers, solutions and even the possibility of a new politics.' Jon McClure, lead singer of Reverend and The Makers 'Magid's book could not be more timely. A must read for anyone who wants to change the world.' Chunky Mark, The Artist Taxi Driver

This book introduces compelling visions of the future and vividly explores the human consequences of developing technologies.
