Global Perspectives on Stem Cell Technologies Aditya Bharadwaj, 2017-10-30 This book takes as its point of departure a humble cell lying on the intersection of ideas as diverse and yet interlaced as life, knowledge, commerce, governance, and ethics. It seeks to deepen the understanding of stem cell entities and the concerns, hopes, and aspirations that shape and make them viable therapeutic entities in the context of rapid globalization. Several key intersections between individual, group, and institutional relationships have become central to locating and debating the production of stem cells today. This edited collection addresses three overarching concerns: regenerating the notion of ethics, the emerging therapeutic horizons, and the position of the patient. As a whole this book seeks to explain how stem cells are accommodated, contested, and used in contemporary India and around the globe through an informed unpacking of issues underpinning contestation and promotion bestriding these technological developments. The authors offer a truly multi-disciplinary perspective, stimulating conversation between the social sciences, biological sciences and the patient. The concerns expressed and highlighted by these conversations are embedded in a vast geo-political expanse stretching from India to Euro-America and will be of great interest to academics and practitioners across fields including science technology studies, medicine and international development.

Nanomaterials in Biomass Conversion Komal Rizwan, Muhammad Bilal, 2024-03-01 *Nanomaterials in Biomass Conversion: Advances and Applications for Bioenergy, Biofuels and Bio-based Products* critically reviews the basic principles through to the latest advances in the emerging field of nanotechnology for the production of biofuels and

bioenergy. Divided into 3 parts, the first five chapters explain the fundamentals of nanomaterials, their properties, characterization, and basic processes for synthesis. Part 2, which constitutes the majority of the book, reviews the various methods and technologies for the conversion of biomass to bioenergy, biofuels, and value-added products using nanomaterials. This includes homogeneous and heterogeneous nano-catalytic systems, nano-photocatalytic conversion, nanomaterial-assisted anaerobic digestion, nanoparticles-immobilized enzymes conversion, the production of biogas, volatile fatty acids, and value-added products, and in carbon capture and conversion to sustainable energy products, as well as the potential of nano-biochar, nano-cellulose, and other nanomaterials in microbial fuel cells, bioelectrochemical systems, and batteries. Finally, Part 3 addresses the techno-economics and financial viability in the context of the circular economy, risk related to toxicology, stability, and environmental impacts, and considers the various challenges and future opportunities of biomass conversion through nanomaterials. Nanomaterials in Biomass Conversion is an invaluable resource for researchers and engineers involved in the production of bioenergy, biofuel, and bioproducts, and will also be of benefit to those interested in environmental remediation, pollution management, and cleaner energy production. Critically examines the role of nanomaterials in the management of waste biomass as applied to bioenergy and biofuels Explains various nanotechnological methods for the conversion of waste biomass into value-added products Discusses the basic principles, operational aspects, ongoing developments, and future perspectives related to the applications of nanotechnologies and nanomaterials in biomass conversion Provides solutions to the key challenges of nanotechnologies and nanomaterials in the conversion of biomass, along with future challenges and risks

Pathogenesis and Treatment in IgA Nephropathy Yasuhiko Tomino, 2016-03-10 This book discusses the latest findings on the pathogenesis and treatment of IgA nephropathy. It particularly focuses on recently recognized initiation and progression factors and the varying treatment strategies in different regions, such as Asia, Europe, and the United States. More than 40 years have passed since Dr. Jean Berger first described primary IgA nephropathy ("Nephropathy with mesangial IgA-IgG deposits") as a new disease entity. Immunohistopathologically, IgA nephropathy is characterized by the granular deposition of IgA (IgA1) and C3 in the glomerular mesangial areas with mesangial cell proliferation and the expansion of mesangial matrices. It is clear that IgA nephropathy is one of the most common types of chronic glomerulonephritis in the world. This disease may lead to end-stage kidney disease, with its enormous economic impact on healthcare everywhere. Efforts by many investigators around the world have gradually clarified various aspects of the pathogenesis and treatment of IgA nephropathy. However, there are many controversial strategies for the treatment of patients with IgA nephropathy throughout the world, as there are several limitations for treatment in each country. This volume provides nephrologists everywhere with an overview and comparison of both global and regional findings in basic and clinical fields in IgA nephropathy. It covers genetic variation, aberrant IgA1 production, and classification etiology, guidelines, and treatment goals, with all chapters written by top international researchers.

Advances in Multimedia Information Processing - PCM 2004 Kiyoharu Aizawa, Yuichi Nakamura, Shin'ichi Satoh, 2004-11-23 Welcome to the proceedings of the 5th Pacific Rim Conference on Multimedia (PCM 2004) held in Tokyo Waterfront City, Japan, November 30–December 3, 2004. Following the success of the preceding conferences, PCM 2000 in Sydney, PCM 2001 in Beijing, PCM 2002 in Hsinchu, and PCM 2003 in Singapore, the 5th PCM brought together the researchers, developers, practitioners, and educators in the field of multimedia. Theoretical breakthroughs and practical systems were presented at this conference, thanks to the support of the IEEE Circuits and Systems Society, IEEE Region 10 and IEEE Japan Council, ACM SIGMM, IEICE and ITE. PCM2004 featured a comprehensive program including keynote talks, regular paper presentations, posters, demos, and special sessions. We received 385 papers and the number of submissions was the largest among recent PCMs. Among such a large number of submissions, we accepted only 94 oral presentations and 176 poster presentations. Seven special sessions were also organized by world-leading researchers. We kindly acknowledge the great support provided in the reviewing of submissions by the program committee members, as well as the additional reviewers who generously gave their time. The many useful comments provided by the reviewing process must have been very valuable for the authors' work. This conference would never have happened without the help of many people. We greatly appreciate the support of our strong organizing committee chairs and advisory chairs. Among the chairs, special thanks go to Dr. Ichiro Ide and Dr. Takeshi Naemura who smoothly handled publication of the proceedings with Springer. Dr. Kazuya Kodama did a fabulous job as our Web master.

White Paper on Human Rights in North Korea 2017 Do Kyung-ok, Han Dong-ho, Rim Ye-joon, Lee Sang-sin, Min Tae-eun, Lee Woo-tae., 2017-12-12 The White Paper on Human Rights in North Korea 2017 aims to increase awareness on North Korean human rights issues in Korea as well as abroad by providing the basic materials required for related discussions and activities. Also, this White Paper comprehensively and systematically analyzes the human rights situation in

North Korea and North Korean human rights issues. This White Paper bases its views of the human rights situation of the North Korean people on the framework of international human rights standards. As is well known, North Korea is a State Party to major international human rights treaties. To identify the extent to which the individual rights recognized in each treaty are guaranteed, we first reviewed the relevant laws and regulations of North Korea and examined the related realities. Such analysis is meaningful in that we can identify the level of compliance by North Korea in the laws and regulations it has enacted on its own as well as the degree to which it has fulfilled its international obligations as a State Party to these treaties.
