Coviability of Social and Ecological Systems: Reconnecting Mankind to the Biosphere in an Era of Global Change Olivier Barrière, Mohamed Behnassi, Gilbert David, Vincent Douzal, Mireille Fargette, Thérèse Libourel, Maud Loireau, Laurence Pascal, Catherine Prost, Voyner Ravena-Cañete, Frédérique Seyler, Serge Morand, 2019-03-12 This book considers the principle of 'sustainable development' which is currently facing a growing environmental crisis. A new mode of thinking and positioning the ecological imperative is the major input of this volume. The prism of co-viability is not the economics of political agencies that carry the ideology of the dominant/conventional economic schools, but rather an opening of innovation perspectives through science. This volume, through its four parts, more than 40 chapters and a hundred authors, gives birth to a paradigm which crystallizes within a concept that will support in overcoming the ecological emergency deadlock.

*Practical Forensic Imaging* Bruce Nikkel, 2016-09-01 Forensic image acquisition is an important part of postmortem incident response and evidence collection. Digital forensic investigators acquire, preserve, and manage digital evidence to support civil and criminal cases; examine organizational policy violations; resolve disputes; and analyze cyber attacks. Practical Forensic Imaging takes a detailed look at how to secure and manage digital evidence using Linux-based command line tools. This essential guide walks you through the entire forensic acquisition process and covers a wide range of practical scenarios and situations related to the imaging of storage media. You'll learn how to: –Perform forensic imaging of magnetic hard disks, SSDs and flash drives, optical discs, magnetic tapes, and legacy technologies –Protect attached evidence media from accidental modification –Manage large forensic image files, storage capacity, image format conversion, compression, splitting, duplication, secure transfer and storage, and secure disposal –Preserve and verify evidence integrity with cryptographic and piecewise hashing, public key signatures, and RFC-3161 timestamping –Work with newer drive and interface technologies like NVME, SATA Express, 4K-native sector drives, SSHDs, SAS, UASP/USB3x, and Thunderbolt –Manage drive security such as ATA passwords; encrypted thumb drives; Opal self-encrypting drives; OS-encrypted drives using BitLocker, FileVault, and TrueCrypt; and others –Acquire usable images from more complex or challenging situations such as RAID systems, virtual machine images, and damaged media With its unique focus on digital forensic acquisition and evidence preservation, Practical Forensic Imaging is a valuable resource for experienced digital forensic investigators wanting to advance their Linux skills and experienced Linux administrators wanting to learn digital forensics. This is a must-have reference for every digital forensics lab.

**Island Futures** Godfrey Baldacchino, Daniel Niles, 2011-06-25 Islands face one of the most pressing issues of our time: how to balance ecological integrity with economic development and collective quality of life, including the need for social and conservation space. Islands are sites of rich and varied human and ecological diversity, but they are also often characterized by narrow resource bases and dependency on links to the outside world, and by their limited ability to determine the actual character of those links. This volume reviews the challenges of island development and conservation in the Asia-Pacific region. With emphasis on nature reserves and UNESCO World

Heritage sites, chapters describe the benefits, barriers, and potential pitfalls in preserving such sites, managing biota, and attracting and controlling tourism. The book also provides a provocative challenge to move beyond the typical concerns of “sustainability” to the more holistic concept of “futurability”, or “future potential” for convivial human–environmental interactions.

*Conservation contre nature* Christophe Grenier, 2000 L'archipel des Galápagos, classé « patrimoine naturel de l'humanité », abrite un parc national prestigieux qui bénéficie d'aides internationales considérables. Destiné à faciliter les recherches naturalistes, censé servir de modèle à de nouvelles formes de valorisation touristique plus respectueuses de l'environnement (écotourisme), ce parc est aujourd'hui l'objet de nombreuses critiques. Le développement des réseaux touristiques et migratoires a accéléré le rattachement de l'archipel au territoire équatorien et au marché mondial. La nature « protégée » est devenue un espace soumis aux exigences de rentabilité d'un monde caractérisé par la marchandisation et l'uniformisation des lieux. Cette « conservation contre nature » a des conséquences catastrophiques pour les écosystèmes et les habitants de l'archipel. Au-delà de l'étude d'une région emblématique, l'auteur mène une réflexion sur la place de l'homme dans la nature, véritable plaidoyer en faveur de la préservation de la géodiversité. Son ouvrage novateur et stimulant s'adresse à tous les acteurs soucieux de l'avenir de notre planète.

Sirocco Dana Haynes, 2021-01-26 A serial bomber is wreaking havoc throughout Europe. Former New York City cop Michael Finnigan and former Spanish assassin Katalin Fiero—the brains behind St. Nicholas Salvage & Wrecking, a covert bounty-hunting operation based in Cyprus—may be the only ones who can stop the carnage. The partners have a reputation for tracking down the worst of the worst in international crime, all while staying firmly under the radar. But as they draw ever closer to the bombers, and as the terrorism sweeps up Katalin's own family, Finnigan and Fiero have to decide if they can continue to operate in the shadows. As the partners learn who they can—and can't—trust, they come face-to-face with shocking secrets at the highest echelons of the world's intelligence communities. Nonstop action and whip-smart dialogue power this compelling thriller to its final, heart-stopping conclusion.

*The St. Nicholas Salvage & Wrecking Series Box Set* Dana Haynes, 2023-11-14 A New York City ex-cop with too many rules and a Spanish ex-spy with too few make the perfect bounty hunters to track down the world's most wanted. St. Nicholas Salvage & Wrecking Michael Patrick Finnigan and Katalin Fiero Dahar of St. Nicholas Salvage & Wrecking, a largely illegal bounty hunting operation, get the assignment to track down and save a group of kidnapped Middle Eastern refugee children. But when they discover that the perpetrator is a Serbian mobster, the partners reach out to their “friends” to find justice. Sirocco A serial bomber is wreaking havoc throughout Europe. Former cop Michael Finnigan and former assassin Katalin Fiero—the brains behind St. Nicholas Salvage & Wrecking—may be the only ones who can stop the carnage. As the partners learn who they can—and can't—trust, they come face-to-face with shocking secrets at the highest echelons of the world's intelligence communities. The Saint of Thieves When Michael gets a panicked call that Sally Blue is in trouble, he and Katalin head to Rome to help. Sally's a friend, and her outfit of thieves, the Black Harts, have proved themselves

invaluable to St. Nicholas on numerous ops in the past. But saving Sally gets more complicated by the minute, for she's set her larcenous sights on astronomically valuable goods.

**Science and Conservation in the Galapagos Islands** Stephen J. Walsh, Carlos F. Mena, 2012-12-05 In this launch of the Galapagos series, this book provides a broad "framing" assessment of the current status of social and ecological systems in the Galapagos Islands, and the feedback that explicitly links people to the environment. It also highlights the challenges to conservation imposed by tourism in the Galapagos Islands and the attendant migration of people from mainland Ecuador to service the burgeoning tourism industry. Further, there is an emphasize on the status of the terrestrial and marine environments that form the very foundation of the deep attraction to the Islands by tourists, residents, scholars, and conservationists.

**On the Backs of Tortoises** Elizabeth Hennessy, 2019-10-29 An insightful exploration of the iconic Galápagos tortoises, and how their fate is inextricably linked to our own in a rapidly changing world. Finalist for the 2020 E.O. Wilson Literary Science Writing Award, sponsored by PEN America Literary Awards The Galápagos archipelago is often viewed as a last foothold of pristine nature. For sixty years, conservationists have worked to restore this evolutionary Eden after centuries of exploitation at the hands of pirates, whalers, and island settlers. This book tells the story of the islands' namesakes—the giant tortoises—as coveted food sources, objects of natural history, and famous icons of conservation and tourism. By doing so, it brings into stark relief the paradoxical, and impossible, goal of conserving species by trying to restore a past state of prehistoric evolution. The tortoises, Elizabeth Hennessy demonstrates, are not prehistoric, but rather microcosms whose stories show how deeply human and nonhuman life are entangled. In a world where evolution is thoroughly shaped by global history, Hennessy puts forward a vision for conservation based on reckoning with the past, rather than trying to erase it. "Fresh, insightful . . . Hennessy's melding of human and natural history makes for thought-provoking reading." —Booklist (starred review) "Gripping . . . well-researched and thought-provoking . . . whether you're well-versed in the intricacies of conservation or have only just begun to long for a look at the tortoises yourself. On the Backs of Tortoises is a natural history that asks important questions, and challenges us to think about how best to answer them." —Genevieve Valentine, NPR "Wonderfully interesting, informative, and engaging, as well as scholarly." —Janet Browne, author of *Charles Darwin: Voyaging* and *Charles Darwin: The Power of Place*

**The Saint of Thieves** Dana Haynes, 2023-01-24 St. Nicholas Salvage & Wrecking, a largely illegal bounty hunting operation, tracks down the worst of the worst criminals as they operate under the radar for the presiding judge of the International Criminal Court. In this action-packed international thriller, will the hunters become the hunted? Michael Finnegan might be off the NYPD but he's still a by-the-book kind of guy. By contrast, Katalin Fiero Dahar—ex-soldier and assassin extraordinaire—makes her own rules. Yet their partnership works magnificently. St. Nicholas Salvage & Wrecking—their high-flying international bounty-hunting business—has nabbed some of the world's most sought-after and heinous criminals. When Michael gets a panicked call that Sally Blue is in trouble, he and Katalin head to Rome to help. Sally's a friend, and her outfit of thieves, the Black Harts,

had proved themselves invaluable to St. Nicholas on numerous ops in the past. During a daring rescue in a shadowy Roman plaza, Michael recognizes Bobby McCool, a stone-cold killer, aider and abettor of a notorious drug lord. McCool was also once the partner of Michael's disgraced father, police detective Patrick Finnegan, now under house arrest in New York. Nabbing McCool would not only make the world a safer place, it might help Patrick Finnegan's legal woes. Saving Sally gets more complicated by the minute, for she's set her larcenous sights on astronomically valuable goods. The stakes are high, but the crew from St. Nicholas aims higher: seeking justice for these murderous criminals and their genocidal leader. Taking a fast-paced, twisty tour down Europe's most luxurious streets and terrifying back alleys, The Saint of Thieves delivers nonstop action with stylish wit and razor-sharp smarts.

**Parameter Identification and Inverse Problems in Hydrology, Geology and Ecology** Johannes Gottlieb, Paul DuChateau, 2012-12-06 The Workshop on Parameter Identification and Inverse Problems in Hydrology, Geology and Ecology, Karlsruhe, April 10-12, 1995, was organized to bring to gether an interdisciplinary group drawn from the areas of science, engineering and mathematics for the following purposes: - to promote, encourage and influence more understanding and cooperation in the community of parameter identifiers from various disciplines, - to forge unity in diversity by bringing together a variety of disciplines that attempt to understand the reconstruction of inner model parameters, un known nonlinear constitutive relations, heterogeneous structures inside of geological objects, sources or sinks from observational data, - to discuss modern regularization tools for handling improperly posed problems and strategies of incorporating a priori knowledge from the applied problem into the model and its treatment. These proceedings contain some of the results of the workshop, representing a balanced selection of contributions from the various groups of participants. The reviewed invited and contributed articles are grouped according to the broad headings of hydrology, non-linear diffusion and soil physics, geophysical methods, mathematical analysis of inverse and ill-posed problems and parallel algorithms for inverse problems. Some of the issues addressed by the articles in these proceedings include the relation between least squares and direct formulations of inverse problems for partial differential equations, nonlinear regularization, identification of nonlinear constitutive relations, fast parallel algorithms for large scale inverse problems, reduction of model structures, geostatistical inversion techniques.

**Rapa Nui – Easter Island** Ian Conrich, Hermann Mückler, 2016-05-06 Easter Island (or Rapa Nui) has long captivated travellers and explorers since it was first encountered by European voyagers in 1722. The island's colossal stone carvings (moai) have been the primary attraction, yet these have overshadowed the broader culture of the Rapanui people. This significant edited collection brings together thirteen specialists from eight countries in a series of studies that address the pre-history, history, contemporary society and popular culture of Easter Island. Consideration is given to both the Rapanui and western cultures with topics covered including archaeology, anthropology, linguistics, tourism, literature, comic books and music. This is a multidisciplinary book with subjects ranging from fact to fiction and from Thor Heyerdahl and Katherine Routledge to Indiana Jones and Lara Croft.

as a way to train logic and help developers, hackers, and system administrators discover unconventional solutions to common IT problems. Users will learn to find bugs in source code, write exploits, and solve nonstandard coding tasks and hacker puzzles. Cryptographic puzzles, puzzles for Linux and Windows hackers, coding puzzles, and puzzles for web designers are included.

CentOS High Availability Mitja Resman, 2015-04-28 This book is targeted at system engineers and system administrators who want to upgrade their knowledge and skills in high availability and want to learn practically how to achieve high availability with CentOS Linux. **Rethinking Tourism and Ecotravel** Deborah McLaren, 2003 \* Exceptional overview of the tourism industry worldwide \* Case studies of indigenous people's responses to tourism development \* Detailed listing of tourism and ecotourism resources This is a fully revised and comprehensive overview of the history and global development of tourism--one of the largest industries in the world. Despite promising great benefits to hosts and guests alike, tourism often results in some very stark and painful consequences for local host communities and the environment. The second edition provides updated information on global tourism and examines how local communities in different parts of the world, especially indigenous peoples, have responded to the challenges and opportunities of tourism and ecotravel.

**Gut Anthro** Amber Benezra, 2023-05-09 A fascinating ethnography of microbes that opens up new spaces for anthropological inquiry The trillions of microbes in and on our bodies are determined by not only biology but also our social connections. Gut Anthro tells the fascinating story of how a sociocultural anthropologist developed a collaborative "anthropology of microbes" with a human microbial ecologist to address global health crises across disciplines. It asks: what would it mean for anthropology to act with science? Based partly at a preeminent U.S. lab studying the human microbiome, the Center for Genome Sciences at Washington University, and partly at a field site in Bangladesh studying infant malnutrition, it examines how microbes travel between human guts in the "field" and in microbiome laboratories, influencing definitions of health and disease, and how the microbiome can change our views on evolution, agency, and life. As lab scientists studied the interrelationships between gut microbes and malnutrition in resource-poor countries, Amber Benezra explored ways to reconcile the scale and speed differences between the lab, the intimate biosocial practices of Bangladeshi mothers and their children, and the looming structural violence of poverty. In vital ways, Gut Anthro is about what it means to collaborate—with mothers, local field researchers in Bangladesh, massive philanthropic global health organizations, with the microbiome scientists, and, of course, with microbes. It follows microbes through various enactments in scientific research—microbes as kin, as data, and as race. Revealing how racial categories are used in microbiome research, Benezra argues that microbial differences need transdisciplinary collaboration to address racial health disparities without reifying race as a straightforward biological or social designation. Gut Anthro is a tour de force of science studies and medical anthropology as well as an intensely personal and deeply theoretical accounting of what it means to do anthropology today.
